Interior, coastline design concept, front view

Interior, coastline design concept, rear view

Wheelchair lift, upon request

EURABUS GmbH

Pioneers of electric mobility

Founded in 2015, EURABUS GmbH is part of the EURACOM Group GmbH, a specialist vehicle builder and bus supplier that has been operating **for over 30 years**.

As a European technology leader, our smart e-buses reflect our commitment to playing an active and instrumental part in advancing the global transition to sustainable transport.

Our high-performance technology with a range of currently 650 km offers a reliable and efficient solution for sustainable and near noiseless passenger transport.

EURABUS is built around an innovative modular concept that allows quick and easy assembly directly in the target markets, ensuring locally customized models. This is a win-win situation for all stakeholders, e.g. creating local jobs at our customers. What is more, it enables instant scalability, with double the supply capacity of our competitors with 100 % emission-free, safe and low-noise mobility with a range of up to 600 km and more.
