

## Technical Requirements

\* All these requirements are ideal and can be discussed if necessary

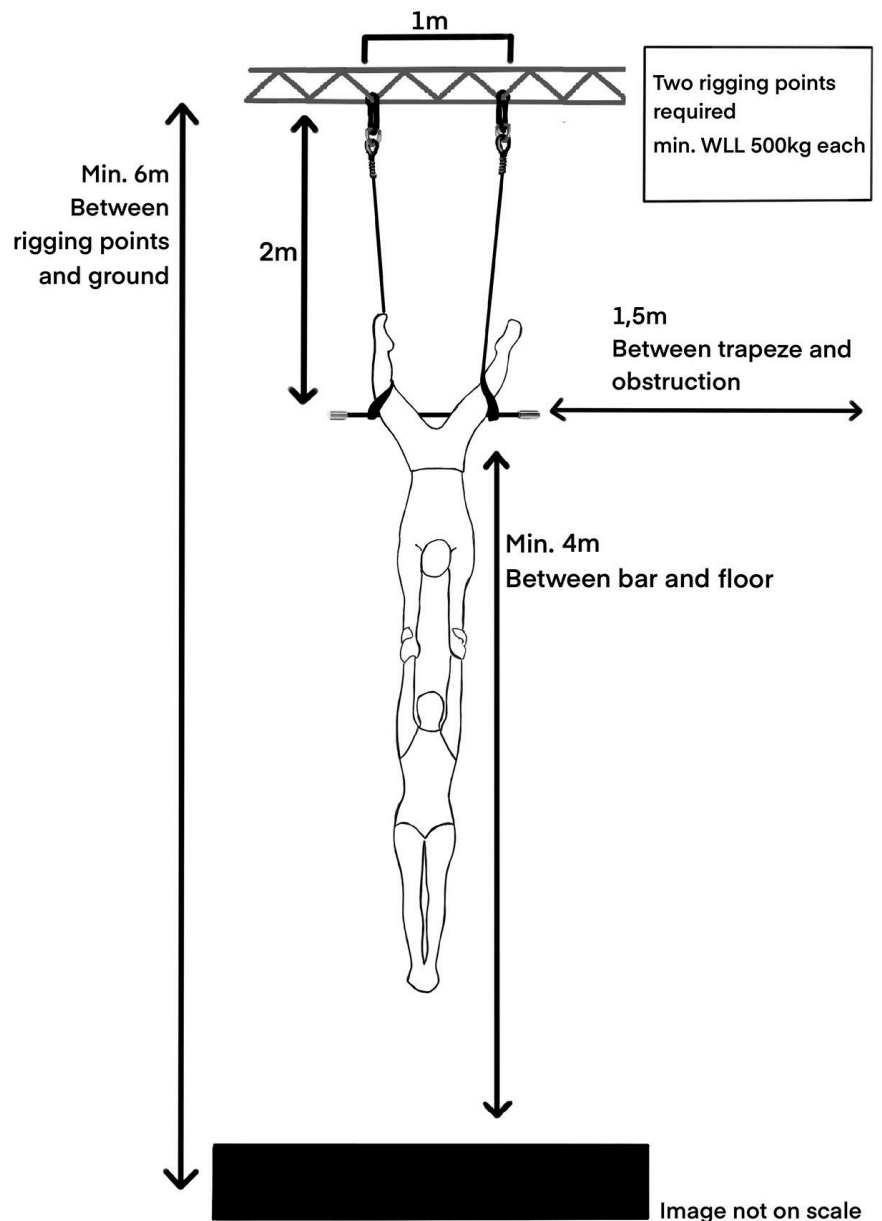

### Rigging requirements

2 rigging points required  
Min. WLL = 500 kg each  
Minimum height = 6 meters  
(between rigging points and ground)  
Maximum height can be discussed\*  
Distance between rigging points = 1 meter

A minimum of 1,5 meters between our trapeze and obstructions is required.

### Stage requirements

For our safety, **we require** a certified acrobatic crash mat (**not** provided by us).  
Mat dimensions = 200 x 300 x 30 centimeters\*  
A sound system must be available.  
A light plan is open and up for discussion.  
Any changes in for example costume and light need to be rehearsed beforehand for safety reasons.

## Notes

- The trapeze, carabiners and slings are provided by the artists, **the mat not**.
- The artists must have a private space available at least 2 hours before the performance for preparation.\*
- A warm up space, bathroom and safe place for belongings is ideal.
- The artists require at least 15 minutes on stage for light rehearsals.
- Music will be provided by artists via USB or different if requested (adjustable).
- Act duration: 5 minutes (adjustable).
- The artists have the right to adjust performance if there is any concern for safety (extreme weather / injury / unsafe rigging etc.).
