66 MX setr.055.001.02 SwitchOrderConfirmationCancellationInstructionV02

66.1 MessageDefinition Functionality

Scope

The SwitchOrderConfirmationCancellationInstruction message is sent by an executing party, for example, a transfer agent, to the instructing party, for example, an investment manager or its authorised representative, to cancel a previously sent SwitchOrderConfirmation.

Usage

To request the cancellation of one or more individual order executions, the order reference and deal reference of each individual order execution in the original SwitchOrderConfirmation are specified in the order reference and deal reference elements respectively. The message identification of the SwitchOrderConfirmation message in which the individual order execution was conveyed may also be quoted in PreviousReference but this is not recommended. The AmendmentIndicator is used to specify whether the switch order confirmation cancellation is to be followed by an amendment. An amendment of a switch order confirmation is carried out by sending a SwitchOrderConfirmation message in which the AmendmentIndicator contains the value 'true'.

Outline

The SwitchOrderConfirmationCancellationInstructionV02 MessageDefinition is composed of 8 MessageBuildingBlocks:

- A. MessageIdentification
Reference that uniquely identifies the message from a business application standpoint.
- B. PoolReference
Collective reference identifying a set of messages.
- C. PreviousReference

- D. RelatedReference

- E. AmendmentIndicator
Indicates whether a confirmation amendment message will follow the confirmation cancellation instruction or not.
- F. MasterReference

- G. OrderReferences
Identification of the individual order confirmation to be cancelled.
- H. CopyDetails

OrderConfirmationStatusReportV02

67.1 **MessageDefinition Functionality**

Scope

The OrderConfirmationStatusReport message is sent by an instructing party, for example, an investment manager or its authorised representative, to the executing party, for example, a transfer agent, to report the status of an order confirmation or an order confirmation amendment.

Usage

The OrderConfirmationStatusReport message is used to report on the status of one or more individual:

- subscription confirmations,
- subscription confirmation amendments,
- redemption confirmations,
- redemption confirmation amendments,
- switch order confirmations,
- switch order confirmation amendments.

One of the following statuses can be reported:

- confirmation rejected, or,
- amendment rejected, or,
- sent to next party, or,
- communication problem with next party, or,
- confirmation accepted, or,
- confirmation received.

It is likely that the OrderConfirmationStatusReport is only sent by the order instructing party to the order executing party to reject an order confirmation or to reject an order confirmation amendment, although if an intermediary party is used, the statuses sent to next party and communication problem with next party are also likely be used. The statuses confirmation accepted and confirmation received would only be used in the event the order executing party sends a RequestForOrderConfirmationStatusReport message and one of the other statuses does not apply.

If the status being reported is either confirmation rejected or amendment rejected, then a reason for the rejection must be given.

The individual order confirmation or confirmation amendment for which the status is given is identified with its order reference. The message identification of the message in which the individual order

confirmation or confirmation amendment was conveyed may also be quoted in RelatedReference, but this is not recommended.

Outline

The OrderConfirmationStatusReportV02 MessageDefinition is composed of 4 MessageBuildingBlocks:

A. MessageIdentification

Reference that uniquely identifies the message from a business application standpoint.

B. Reference

Reference to the message or communication that was previously received.

C. IndividualOrderConfirmationDetailsReport

Status report details of an individual order confirmation.

D. Extension

Additional information that cannot be captured in the structured elements and/or any other specific block.

68 MX setr.058.001.02 RequestForOrderConfirmationStatusReportV 02

68.1 MessageDefinition Functionality

Scope

The RequestForOrderConfirmationStatusReport message is sent by an executing party, for example, a transfer agent, to the instructing party, for example, an investment manager or its authorised representative, to request the status of one or more order confirmations.

Usage

The RequestForOrderConfirmationStatusReport message is used to request the status of either:

- one or several individual order confirmations, or,
- one or several order confirmation messages.

The response to a RequestForOrderConfirmationStatusReport message is the OrderConfirmationStatusReport message.

When the RequestForOrderConfirmationStatusReport message is used to request the status of several individual order confirmations or one or more order confirmation messages, the executing party may receive several OrderConfirmationStatusReport messages from the instructing party.

When the RequestForOrderConfirmationStatusReport is used to request the status of one or more individual order confirmations, each individual order confirmation is identified with its order reference. The message identification of the message in which the individual order confirmation was conveyed may also be quoted in PreviousReference.

When the RequestForOrderConfirmationStatusReport is used to request the status of an order confirmation message, then the message identification of the order confirmation message is identified in PreviousReference.

74 MX setr.065.001.01 InvestmentFundOrderCancellationRequestV01

74.1 MessageDefinition Functionality

Scope

An instructing party, for example, an investment manager, a custodian or its authorised representative, sends the InvestmentFundOrderCancellationRequest to the executing party, for example, the transfer agent or administrator, to request the cancellation of a previously sent investment fund order, such as the SubscriptionOrder, AlternativeFundsSubscriptionOrder, AlternativeFundsRedemptionOrder, etc.

There may be one or more parties between the instructing party and the executing party.

Usage

The InvestmentFundOrderCancellationRequest message is used to request the cancellation of one or more individual orders.

There is no amendment, but a cancel and re-instruct policy.

When the InvestmentFundOrderCancellationRequest message is used to request the cancellation of one or more orders:

- The order reference of each order to be cancelled (as specified in the original order message) is specified.
- Elements of the individual order, as listed in the original order message, may also be specified, but this is not recommended.
- The message identification of the order message in which the individual order was conveyed may also be quoted in PreviousReference, but this is not recommended.

The deadline and acceptance of a cancellation request is subject to a service level agreement (SLA). This cancellation message is a cancellation request. There is no automatic acceptance of the cancellation.

The rejection or acceptance of a InvestmentFundOrderCancellationRequest is made using an OrderCancellationStatusReport message.

75 MX setr.066.001.01 InvestmentFundCancellationAdviceV01

75.1 MessageDefinition Functionality

Scope

An executing party/account servicer, for example, a transfer agent or administrator, sends the InvestmentFundCancellationAdvice to the instructing party/account owner, for example, an investment manager, custodian or its authorised representative, to cancel a previously sent investment fund order confirmation or statement message.

There may be one or more parties between the executing party/account servicer and the instructing party/account owner.

Usage

The InvestmentFundCancellationAdvice message is used either to:

- cancel one or more previously sent order confirmations, such as the confirmation contained in a SubscriptionOrderConfirmation, AlternativeFundsSubscriptionOrderConfirmation, etc, or,
- cancel a previously sent statement message.

(1) When the InvestmentFundCancellationAdvice message is used to advise on the cancellation of an order confirmation message:

- The business references, for example, the OrderReference or DealReference as specified in the order confirmation message are specified.
- The amendment indicator element may be used to specify whether the order confirmation cancellation advice is to be followed by a new order confirmation.
- Elements of the individual order confirmation, as listed in the original order confirmation message, may also be specified, but this is not recommended.
- The message identification of the order confirmation message may also be quoted in PreviousReference, but this is not recommended.

(2) When the InvestmentFundCancellationAdvice message is used to advise on the cancellation of a statement:

- The reference of the statement is quoted.
- The report number, statement date and the account number, etc, may also be provided.
- The amendment indicator element may be used to specify whether the statement cancellation advice is to be followed by a new statement.
- The message identification of the original statement message may also be quoted in PreviousReference, but this is not recommended.

The rejection of a InvestmentFundCancellationAdvice is made using an OrderConfirmationStatusReport message.

(For an Entity that is a legal person, the term "Controlling Persons" means the natural person(s) who exercises control over the Entity. "Control" over an Entity is generally exercised by the natural person(s) who ultimately has a controlling ownership interest in the Entity. A "control ownership interest" depends on the ownership structure of the legal person and is usually identified on the basis of a threshold applying a risk-based approach (e.g. any person(s) owning more than a certain percentage of the legal person, such as 25%). Where no natural person(s) exercises control through ownership interests, the Controlling Person(s) of the Entity will be the natural person(s) who exercises control of the Entity through other means. Where no natural person(s) is identified as exercising control of the Entity, the Controlling Person(s) of the Entity will be the natural person(s) who holds the position of senior managing official.).

A "control ownership interest" depends on the ownership structure of the legal person and is usually identified on the basis of a threshold applying a risk-based approach (e.g. any person(s) owning more than a certain percentage of the legal person, such as 25%). Where no natural person(s) exercises control through ownership interests, the Controlling Person(s) of the Entity will be the natural person(s) who exercises control of the Entity through other means. Where no natural person(s) is identified as exercising control of the Entity, the Controlling Person(s) of the Entity will be the natural person(s) who holds the position of senior managing official.).
