

Job offer: Thesis at KONVOI

At KONVOI we develop a mobile, preventive security system for parked trucks in road freight traffic. With optimized radar sensors we create a detection area around the truck, which enables us to recognize movement patterns of unwanted persons and to initiate targeted prevention measures. We are currently working on several customer projects in a communicative, nine-person team and need your support!

Writing a bachelor's or master's thesis at the end of the studies often feels like a burden that it doesn't really have to be. Rather, it is a time that can be used proactively to gain practical experience in specialist areas, to make contacts in the corporate world and to boost your own steep learning curve. So there are good reasons to take profitable time for your thesis. Together we will surely find an exciting topic around our security solution with topics from hardware, software and engineering!

Your tasks & skills:

- The desire to learn new things and to reach your limits (just like us by the way)
- Analytical skills and readiness to develop close to our customer requirements
- Basic knowledge for a technical area of our security solution: hardware, software, engineering
- Independence and enthusiasm for change are important to you

What we have at KONVOI:

- Fun in daily work routine, which is mainly determined by many degrees of freedom (our great drive)
- Excitement for new things and openness for change
- Transparent communication and honesty are our strengths
- Open offices and all the benefits of the start-up network [StartUp Dock](#)

Ideally, you're up for trying your hand in an independent, super fun team, always tackling new projects with lots of question marks. Just get in touch with us with an email, via WhatsApp or call us directly. We look forward to hearing your story and your interest in joining us. We would be happy to introduce you to KONVOI and look forward to hearing from you.
