Senior Systems Network Engineer

MarineSecure is a fast-growing IT company in the superyacht industry. We operate worldwide with 24/7 service in a niche market of the maritime sector. As a growing company, there are many challenges and we are looking for new talent to help us with them.
Due to the growth of our business, we are looking for Systems - Network Engineer, who wants to work on cutting edge consulting projects. You design and support high-quality infrastructures for superyacht owners worldwide. We work with demanding customers who have high expectations.

Your days will never be dull, hourly schedule changes are a daily occurrence in our field. We offer you a full-time job with new challenges, opportunities to travel to locations that are often unreachable for normal people and a great young team of colleagues.

Responsibilities to include:

- Provide consultancy on build and design advanced IT networks for superyachts.
- Perform site surveys and deploy solutions in the Cloud and on board the ships, wherever they are (worldwide).
- Take charge of projects or provide IT technical support and advice to project managers and clients on the most suitable IT solutions during projects.
- Create proposals, BOM's and solution and service designs.
- Troubleshooting on-site and off-site: quickly and efficiently solving a technical problem.
- Grow and share your expertise with junior stuff and parties involved in the projects.
- Protect our and our customers organization from cyber threats.

If this position is right for you and you would like to come and work for us, you will need some skills to be successful in this job. If you have the skills below and recognize yourself in the following description, we need you!

Required Skills & Experience:

- Active CCNP, CCNI other vendor equivalent, or evidence or relevant industry experience as this level
- Must possess ISE knowledge, DNA Centre experience and Wireless CCNP or equivalent.
- Minimum of 5 years experience in designing and deploying Cisco SD-WAN solutions, ISE (Identity Service Engine), SDA solutions, IP LAN/WAN/WLAN networks.
- Have experience with network management (Cisco, Juniper) and operating Systems management (Linux, Windows).
- Problem solving attitude and take ownership.
- Thriving in a fast-paced environment.
- You like to work independently and can communicate clearly with customers and collegues.
- Are you resistant to stress, in all kinds of environments.
- Speak and write English fluently and preferably also Dutch or German

What do we offer you in short?

Working in a niche market in the maritime sector, with opportunities to travel to unreachable destinations to support our customers. An always varied job, with many challenges and opportunities to further develop yourself. A team with nice colleagues in a company that is in full development and with whom you can also talk about the growth opportunities of the company.

- A 40 hour contract for 12 months with a probationary period of 1 month and prolongation opportunities.
- Laptop, iPhone and subscription from the company
- Reimbursement of public transport
- Training budget options
