

## HASI TUNED SLEEVE REMOVER

Thank you for choosing Hasi Tuned Products!

With this tool, you can easily remove all .21 sleeves from your engine's crankcase.

### What's Included:

- n°01 Sleeve extractor;

### INSTRUCTIONS

1. Remove the cooling head and underhead from your engine, (the back plate can stay) and position the piston at the bottom dead center.

2. Install the extraction plug in the exhaust port.

3. Insert the stopper from the top.

4. From the top, install the main body of the extractor.

5. Tighten the nut and begin to unscrew. The sleeve will start to come out.
