PROBLEMS WITH RUST WATER? WE HAVE THE IDEAL SOLUTION AT HOME!

The problem

Do you recognize the problem? Your water has the taste of iron, a glass of tap water shows a brownish color. The white sealant joints gradually discolour, first yellowish, then even brown.

Cause? Your tap water contains (strong) ferrous content! A standard universal water filter may slow that process down slightly, but it won't fix the problem.

Here a more drastic approach is needed to remove the iron.

H2Optimizer ZF-series iron removal water filters

For our **ZF series** ZeroFerro water filters, we provide the renowned Aquaphor Viking water filter with a special Aquaphor Gross deferrization water filter that is integrally connected to the Viking universal water filter as a pre-filter.

AQUAPHOR GROSS IRON REMOVAL PRE-FILTER with Iron Removal filter cartridge

Thanks to the latest generation of Aqualen™ fibres, this exchange filter effectively and irreversibly filters dissolved and colloidal iron and rust. The CarbFiberBlock technology (CFB) makes it possible to remove organic compounds, active chlorine, microparticles >5 microns.

in combination with:

AQUAPHOR VIKING WATER FILTER with Aqualen™ ion exchange filter cartridge

Thanks to the latest generation of water filter technology, this exchange filter effectively filters and dissolved heavy metals thanks to the Aqualen™ ion exchange technology. The CarbFiberBlock technology (CFB), the Dynamic Fixation of Silver (DFS) and Ion Adsorption Matrix (IAM) patent makes it possible to remove organic compounds, active chemicals and microparticles >5 microns. It also provides fine water conditioning.

Model	Iron removal pre-filter	Universal water filter	Ltr/min
ZF-1015	Gross 10" + B510-18 cartridge	Viking Midi + B515 PRO cartridge	10
ZF-2025	Gross 20" + B520-18 cartridge	Viking 300 + B520 PRO cartridge	20
