DIGITOL Homepage

Intergenerational synergies for the active participation in society

Duration: 15.01.2020 -15.12.2021

DIGITOL is a European project, funded by the Erasmus+ program of the European Commission.

The purpose of DIGITOL is to promote EU common values, such as solidarity and diversity, by developing and delivering innovative digital literacy training with younger trainers and older learners.

The project aims to make the Internet accessible and more respectful for all. DIGITOL will contribute to combating discrimination within the EU that are driven by xenophobia, populism, and homophobia by gathering younger and older people around the challenge to identify and contain fake news and online hate speech.

At times where intense digital communications tend to facilitate the dissemination of fake news that fuel populism and discrimination, DIGITOL will participate in building an inclusive alternative for our digital worlds.

Key activities:

- Intergenerational exchange on combatting online disinformation and „fake news“.
- Strengthening the digital competence and media literacy of both younger and older adults
- Strengthening the participation of older adults in society and the digital world

## Project Partners

- CCB, Italy
- HELLAS 50+, Greece
- ZNANIE, Bulgaria
- AGE PLATFORM Europe, Belgium
