# PHOTOVOLTAIC – EOLIC - COGENERATION

- **Energetic and Enviromental** master Plan
- Feasibility studies for the interconnection of HV networks for both AC and DC solutions
- Integration of **renewables** on **HV** and **MV** networks
- Increasing of **Reliability, Availability** and **Quality** of the grid
- Systems of **Energy management** and **Energy trading**
- Civil and Structural Engineering
- **Integrated** System Plant **design**

## TURN-KEY PLANTS

## TEST – INSPECTION – CONFORMITY

## MAIN ACTIVITIES:

- **Assembly Management and Supervision**
- **Quality control & Safety**
- **Maintenance**
- **Surveying and Training**
- **Test and verifications** of plant's correct functioning
- **Administration of Contracts and site activities**

## MONITORING & MEASUREMENT

- **Commissioning & Start-up** Plants
- On field **Inspection** – **Inspection Reports**
- Operation & Maintenance activity
- **Enviromental performance** of industrial Plant

Thanks to its team of specialized technicians PRG ENGINEERING can provide Commissioning and Start-Up of mechanical and electrical plants all over the world.
