IF WATER SHOULD NOT ONLY BE PURE BUT ALSO RICH IN ESSENTIAL MINERALS...

Then you have come to the right place at **H2Optimizer!** The RO-101S Morion reverse osmosis system covers all the problems of domestic water purification and completely replaces premium bottled water. The quality of the incoming water does not matter, the RO-101S Morion membrane is a long-lasting shield against toxic substances, heavy metals, pesticides, bacteria and viruses. The Morion RO is primarily intended for a single tap (POU: Point-Of-Use) and is usually placed in the kitchen.

The system is designed differently from the classic RO systems. Thanks to its innovative water-on-water tank, it takes up half the space under the sink, saves up to 9 tons of water per year and works even at low pressure in the water supply. The savings compared to buying bottled water are significant with guaranteed high quality cleaning.

With RO-101S Morion, there is plenty of clean, soft and tasty water for drinking, cooking, baby food and household appliances. Morion completely removes hardness salts from the water, making the coffee machine, kettle, iron and steamer last longer. The humidifier will no longer cover the furniture with a white dust.

Versatile protection against waterborne threats:

Reduces common contaminants in tap water including chlorine, organic compounds, heavy metals, nitrates and nitrites, bacteria and viruses, hard water minerals.

THE AQUAPHOR 101S MORION REMOVES OTHERWISE:

- Chlorine, lead, mercury, cadmium
- Hard water minerals
- Bacteria and viruses
- Nitrates and nitrites
- Organic Ingredients
