

The recot²® approach – reduce, reuse, recycle

recot²®

by Gebr. Otto

OTTO

Future since 1901

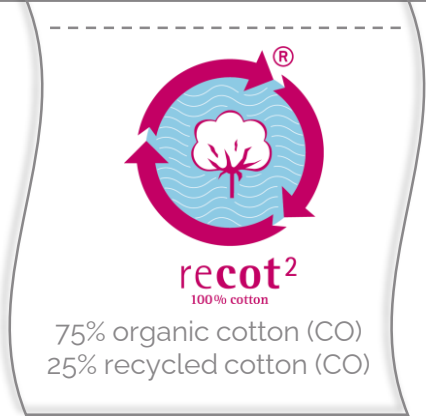

recot²® is a blend of finest, GOTS-certified organic cotton with recycled cotton from pre-consumer waste. The perfect combination of the best raw materials, high-tech spinning and environmentally friendly dyeing results in a high-quality premium yarn made of 100% cotton with an improved eco-balance.

recot²® is a product that delivers an exceptional saving of resources, especially water and energy, as well as a reduction in CO₂ emissions. From a global perspective, ca. 5,000 litres of water can be saved with every kilogram of recot²®-textiles.

In cooperation with our partners, we only use selected raw materials and process waste that are certified according to the Global Recycled Standard (GRS). recot²® yarns are being tested for harmful substances regularly according to the strict guidelines of the STANDARD 100 by OEKO-TEX®, product class I. By meeting the criteria of the OEKO-TEX® STeP and the GRS additionally, the production of the yarns is especially environmentally friendly.

Fields of application

- | leisure textiles
- | trousers & jeans
- | home textiles
- | day & nightwear
- | socks & stockings

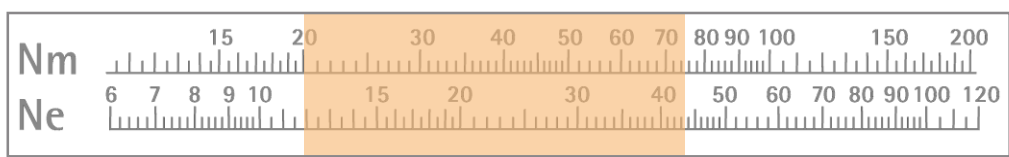

Good to know

- | Sustainable manufacturing process of fibres & yarns
- | recot²® meets the requirements for the product label **MADE IN GREEN** by OEKO-TEX®
- | Good pilling values through high-quality organic cotton & selected spinning process
- | Durable with high strength
- | recot²® is a Europe-wide registered trademark of Gebr. Otto Baumwollfeinzwirner GmbH + Co. KG
- | Example of excellence in the project
»100 companies for resource efficiency in Baden-Wuerttemberg«
- | Raw & dyed
