Recycle

Media Kit 2020

Dear Readers,

RE³ deals with the entire **circular economy**. Besides the recycling of products, the main focus of the circular economy is on the beginning of the **product life cycle**.

Whether you are a technician, chemist or administrative staff, **RE³** provides you with information, stories and solutions from your industry. A critical review of the current discussion is also necessary within the industry. „Sugarcoating“ and „green washing“ are out of place in **RE³**. The focus is on a future-oriented and responsible handling of the **VALUABLE RESOURCE*** “plastics”.

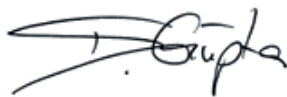

The focus is on the **solutions** developed by the industry – new products, technical innovations and information about companies that provide systemic solutions. In addition, we cover definitions of terms, academic research results, pro-contra comparisons, business news, and articles about people in industry and associations. Information that is interesting for you as an employee, service provider, manufacturer, customer and also as a consumer.

We are all consumers and representatives of the plastics industry.

Join us on the journey of plastics from a disposable product to a recyclable and valuable material!

Let us shape our future responsibly together – with curiosity, imagination, know-how, courage and most of all with heart.

Kind regards

Indira Gupta

* WERTSTOFF = German word for recyclable and valuable material.

The reproduction of common names, trade names, product designations etc. does not justify the assumption that such names are to be regarded as free within the meaning of trademark and brand protection legislation and may therefore be used by anyone. Often these are legally protected registered trademarks, even if they are not expressly marked as such.

Copyright and publishing law:

Articles marked with the author's name or signature are not necessarily the opinion of the editors. Unwanted manuscripts will only be returned if return postage is enclosed. The publisher assumes that the author is the owner of the copyright and exploitation rights with regard to all components of the submission, i.e. also with regard to the illustrations, tables, etc. submitted. Upon acceptance of the manuscript, the right of publication as well as the rights to translation, to the granting of reprint rights, to electronic storage in databases, to the production of reprints, photocopies and microcopies shall pass to the publisher. The journal and all articles and illustrations contained therein are protected by copyright. Any use outside the limits set by copyright law is not permitted without the publisher's consent.
