Hornady® 1949-2024

Hornady Manufacturing was born out of one man's vision of a better product for his own use. Joyce Hornady grew up learning to shoot and hunt. After working as a milkman, he moved from Lincoln to Grand Island, NE, to teach marksmanship in a guard training unit at the Cornhusker Army Ammunition Plant during World War II. After the war, he opened a sporting goods store in downtown Grand Island that sold everything from basketballs to hunting and shooting products.

Many shooters and hunters used military surplus ammunition for sport shooting, but it didn't offer the accuracy Joyce wanted. His aspiration was **"10 bullets in the same hole."** That's why he partnered with Vernon Speer to build a machine that converted spent .22 rimfire cases into bullet jackets and produced bullets from a garage on Fourth Street.

1949

Ultimately, the business relationship between Hornady and Speer faltered, resulting in two independent companies. Vernon Speer moved his portion of the business to Lewiston, Idaho, the current location of Speer Bullets.

Using a surplus bullet assembly press, Joyce Hornady began to produce his own 30 caliber bullet. Since its initial production in 1949, the 30 caliber 150 grain Spire Point bullet remains one of our most popular bullets to this day.

HORNADY

1958

The company moved to its current headquarters location and opened an **8,000-square-foot plant** with 40 employees.

1964

Hornady introduced **Frontier® Cartridges**, remanufactured ammunition made with military surplus brass.

1960

A **200-yard underground testing facility** was added, creating an environment unaffected by Nebraska's changing weather and eliminating the need to go offsite for testing.

1971

Hornady diversified into the reloading tool market by acquiring **Pacific Tool Co.**, reinvigorating its product line and developing new offerings.

1972

Joyce's son, **Steve Hornady**, joined the company full time.

1977

Hornady innovations continued with **InterLock®**, it was designed to keep jacket and core together to retain mass and energy.

1981

The company's founder and visionary, **Joyce Hornady**, was tragically killed in a plane crash, along with engineer, Edward Heers and customer service manager, Jim Garber.

2001

A complete departure from anything the company had done before, the **17 HMR** (Hornady® **Magnum Rimfire**) cartridge was introduced. It quickly became an industry staple.

1981

Steve Hornady became president and his sister, Margaret Hornady David, became vice president. Along with their mother, Marval, **they carried on the legacy of Joyce Hornady.**

2004

Hornady introduced the **204 Ruger**, the second-highest velocity commercially produced ammunition and the only 20 caliber centerfire cartridge produced commercially.

1984

Hornady began producing **cartridge cases** for its own line of factory ammunition and for sale as component products for reloaders.

2005

LEVERevolution® brought higher BCs to lever guns thanks to the new Flex Tip.® The patented elastomer tip made a pointed bullet safe to use in guns with tubular magazines, while enabling immediate and reliable bullet expansion across a wide range of velocities.

1988

New Dimension Dies were introduced, and Hornady made a larger commitment to the reloading industry.

2006

Jason Hornady, grandson of founder Joyce Hornady, joined the company as sales director after serving in the outdoor industry for many years.

1990

Designed to consistently expand and penetrate at varying velocities, the **XTP**® (**Extreme Terminal Performance**) pistol bullet debuted in 1990 and continues to achieve deep, terminal penetration for hunting, self-defense and law enforcement applications.

HORNADY

2008

Hornady introduced the world to the **6.5 Creedmoor**, which is now one of the most popular cartridges in the world.

2011

Zombie Max™ ammunition debuted, preparing shooters just in case of a Zombie Apocalypse.

Critical Defense® was introduced to deliver threat-stopping power in low-light, personal-defense situations.

2011

With the growth of our tool offerings, reloading tools production was moved to a **110,000-square-foot facility** in Alda, Nebraska.

2009

In order to keep up with consumer demand, Hornady underwent a plant expansion that ultimately added **58,000 square feet of manufacturing, distribution and office space** to the main Grand Island location.

2012

Critical Duty® was introduced, providing superior barrier penetration for full-size handguns.

2013

Hornady Security® was born with the first **RAPiD® Safe**, which featured RFID technology for touch-free, quick access to your handgun.

2015

Hornady purchased **SnapSafe®** which offered a complete array of innovative modular safes, vault doors, lock boxes and safe accessories.

2015

American Gunner® ammunition debuted, offering tried-and-true, versatile loads that were popular for target shooting, hunting and self-defense.

Local and state dignitaries helped Jason and Steve celebrate the new ammunition plant.

2016

The **FBI awarded Hornady a contract for Critical Duty®** ammunition after its consistent performance in handgun ammunition tests.

2018

As business continued to increase, the **Hornady West facility** opened six miles west of Hornady headquarters. The project provided 155,000 square feet of space for all ammunition manufacturing, as well as testing, packaging and distribution operations.

Hornady introduced the revolutionary **Ballistics Calculator with 4DOF®** (4 Degrees of Freedom), which provides trajectory solutions based on projectile drag coefficient, not ballistic coefficient.

2019

Hornady revolutionized the match shooting world with **A-Tip® Match**, a long-range bullet featuring a precision-machined aluminum tip.

ELD-X® and ELD® Match bullets introduced the new **Heat Shield® Tip**, which resists aerodynamic heating to deliver highest-in-class BCs.

2022

The new **7mm Precision Rifle Cartridge** delivers results from the treestand to the mountain top. This high performance, modern 7mm cartridge utilizes long, heavy for caliber bullets in a standard long action.

2024 AND BEYOND

A message from Steve and Jason Hornady:

"10 bullets through one hole." 75 years ago, Joyce Hornady embarked on an exhaustive journey founded on this belief, convinced that he could design and manufacture a better product for the handloader. While there were skeptics, the spirit of innovation, hard work, and determination helped make Hornady a name synonymous with that original philosophy.

Still family-owned and American-made - 75 years strong! We hope you enjoyed the first few pages of the 2024 catalog. As you can see, we've been incredibly busy the last 75 years and we don't plan on stopping anytime soon. In fact, we have a comprehensive lineup of 2024 new products to introduce to you.

The new **22 ARC** (Advanced Rifle Cartridge) is an exciting and innovative cartridge that provides exceptional performance. Rivaling the 22-250, it's elegantly packed into a compact and versatile cartridge that fits into an AR-15.

We often say, "The bullet makes the H." Our foundation was built on bullets, so we do everything we can to remain innovative in that regard. The new **ELD-VT™ bullets** are the culmination of years of ballistic research. This dual-purpose bullet redefines varmint hunting and competition shooting by pairing the aerodynamics of low-drag match bullets with the lighter weight of varmint bullets.

Loaded with the new ELD-VT™ bullets is Hornady **V-Match® ammunition**. By utilizing the highest quality components, loaded to exacting specifications, the V-Match line of ammunition provides match-grade accuracy for extended range varmint hunting or competition shooting.

Our Security line has expanded as well. Available in three sizes, the new **Mobilis® Safes** offer an innovative modular design that ensures you get the security you need without the complexities of traditional welded safes. You'll also find new accessories that incorporate the space-maximizing Square-Lok® organizational system.

As we celebrate our 75th Anniversary, we thank you, our customers. Many of our most successful products were born from customer requests and suggestions and we especially love hearing about your hunting and shooting experiences. Thank you for believing in us, motivating us, and inspiring us! Here's to 2024 and beyond.

75th Anniversary Bullets

Limited edition commemorative bullets pay homage to the first bullet and packaging Hornady® manufactured.

75 years. Three generations. One family.

Steve Hornady

Jason Hornady

2024 NEW PRODUCT HIGHLIGHTS

See page 18

Innovation, precision and excitement! Elevate your varmint shooting experience, shatter records, and make your mark like never before with Hornady® V-Match® ammunition.

ELD-VT™

EXTREMELY LOW DRAG VARMINT | TARGET

- Dual-purpose for competition or long-range varmint hunts.
- Combines the low-drag aerodynamics of a match bullet with the lighter weight of a varmint bullet.
- Patented Heat Shield® tip combats aerodynamic heating for ballistic consistency across the entire trajectory.
- Delivers rapid, dramatic fragmentation.
- AMP® bullet jacket for optimum concentricity and accuracy.

See page 66

22 ARC

ADVANCED RIFLE CARTRIDGE

The 22 ARC rivals the exceptional power and performance of the 22-250 cartridge, all elegantly packed into the compact and versatile AR-15 platform.

See pages 18, 26 & 42

Introducing 5.7x28mm

Using carefully selected components that ensure reliable cycling and optimized propellants that burn quickly to reduce recoil and limit muzzle flash, the new 5.7x28mm features a 40 gr. FTX® bullet in Critical Defense® and a 40 gr. V-MAX® in Hornady BLACK®.

See pages 42 & 52

Discover the ultimate solution for safeguarding your valuable firearms, ammo and gear with the revolutionary Hornady Security® Mobilis® Safes.

Available in 3 sizes

See page 136

Click-Adjust Bullet Seating Micrometer

Precisely set bullet seating depth, just like dialing a scope turret, in click adjust .001" increments. It's a quick and easy way to achieve benchrest accuracy and consistency without the extra cost of another seating die.

See page 133

HIT® Target Impact Indicator

You get that steel target in your sights. You squeeze the trigger and — BAM! — you hit it! Or did you? The HIT® Impact Indicator means never guessing again. Attach it to a target stand and it easily distinguishes impacts by blinking "H-I-T" in Morse code. Being on target is just six dots and a dash away.

Hornady® Ammunition Guide

HUNTING

Outfitter®

Adventure awaits!

Featuring corrosion resistant nickel-plated cases that are sealed watertight and topped with the accurate and rugged CX™ bullet, Outfitter® ammunition is designed to perform under the toughest conditions.

RIFLE BULLETS LOADED:

CX™

Precision Hunter®

Never compromise at any distance!

Precision Hunter® is the ideal load for any hunting situation because of its effective terminal performance at all practical ranges. Great care has been given to develop superior, match-accurate hunting loads that allow the ELD-X® bullet to achieve its maximum ballistic potential.

RIFLE BULLETS LOADED:

ELD-X®

Superformance®

It IS rocket science!®

Superformance® ammunition uses progressive propellants that deliver performance that's simply unattainable from conventional ammunition. Increase your rifle's performance up to 200 fps without extra chamber pressure, recoil, muzzle blast, temperature sensitivity, fouling, or loss of accuracy.

RIFLE BULLETS LOADED:

CX™ | INTERLOCK® | SST®

SHOTGUN:

12 GA 300 GR MONOFLEX® 2¾"

American Whitetail®

Make it a knock-down, drag-out hunt!®

Loaded with our legendary Hornady® InterLock® bullets in weights that have been deer hunting favorites for decades, American Whitetail® ammunition combines generations of ballistics know-how with modern components.

RIFLE BULLETS LOADED:

INTERLOCK®

SHOTGUN:

12 GA 325 GR INTERLOCK® 2¾"

12 GA RIFLED SLUG 2¾"

LEVERevolution®

The tip of performance for lever guns and revolvers.

LEVERevolution® represents a breakthrough in ammunition design for lever action rifles and revolvers. The key to its innovation and performance is the Flex Tip® technology of the FTX® and MonoFlex® bullets. Safe to use in tubular magazines, these bullets deliver flatter trajectories for increased down range performance.

RIFLE BULLETS LOADED:

MONOFLEX® | FTX®

HANDGUN BULLETS LOADED:

FTX®

Dangerous Game™ Series

Fear no evil.

From the African savannas to the Asian jungles, Dangerous Game™ Series ammunition is loaded with only the finest components, under strict quality control measures. Our classic bullet designs are tailored to meet the needs of the serious safari hunter.

RIFLE BULLETS LOADED:

DGS® | DGX® BONDED | INTERLOCK®

Subsonic

The sound of silence.

Hornady® Subsonic Ammunition — designed for accuracy and performance below the speed of sound. Handgun loads utilize tried-and-true XTP® bullets that expand reliably at subsonic velocities and the Sub-X® bullet used in rifle loads feature a lead core and Flex Tip® technology to aid in expansion, even at low velocities.

RIFLE BULLETS LOADED:

SUB-X®

HANDGUN BULLETS LOADED:

XTP®

V-Match®

Varmints shudder. Records shatter.

Whether you're outwitting varmints or taking aim in competition, make V-Match® your ammunition of choice. This dual-purpose ammunition for long range varmint and target shooting combines the exceptional aerodynamics of ELD-VT bullets with high-quality components for match-grade accuracy and violent expansion.

RIFLE BULLETS LOADED:

ELD-VT™

Varmint Express®

Tack-driving accuracy.

Hornady® Varmint Express® ammunition is designed around the hard-hitting performance of our famous V-MAX® bullet. Polymer tipped V-MAX® bullets deliver match accuracy, high ballistic coefficients, wind defying trajectories, and rapid fragmentation upon impact. Available in centerfire and high-speed rimfire loads.

RIFLE BULLETS LOADED:

NTX® | V-MAX® | XTP®

SHOTGUN:

12 GA #4 BUCKSHOT 2¾"

Superformance® Varmint

Fuel your varmint rifle!

Superformance® Varmint ammunition delivers muzzle velocity increases of 100 to 200 feet per second from EVERY gun. Its tack-driving accuracy, increased range, flatter trajectory, less wind drift and devastating terminal performance will send varmints packing.

RIFLE BULLETS LOADED:

NTX® | V-MAX®

Custom Lite®

Keep recoil to a minimum.

Hornady® Custom Lite® ammunition provides reduced recoil and muzzle blast from the most popular calibers, and puts the fun back into shooting for those looking to keep recoil to a minimum while still enjoying their favorite rifle.

RIFLE BULLETS LOADED:

SST®

SHOTGUN:

20 GA FTX® SLUG 2¾"

12 GA FTX® SLUG 2¾"

Handgun Hunter®

Power and performance for today's handgun hunter.

Hornady® Handgun Hunter® ammunition is built around a bullet as rough and rugged as the conditions and game demand. The MonoFlex® handgun projectile is manufactured with a tough copper alloy that achieves deep penetration and 95% weight retention.

HANDGUN BULLETS LOADED:

MONOFLEX®

Custom™

Innovation since 1949.

Shooters looking for supreme accuracy and maximum knock-down power turn to Hornady® Custom™ ammunition. Loaded with a variety of Hornady® bullets for rifle and pistol, the excellent terminal performance of Hornady® Custom™ ammunition makes it the preferred choice for hunters, competitive shooters and plinkers.

RIFLE BULLETS LOADED:

CX™ | FTX® | INTERLOCK® | SST® | V-MAX®

HANDGUN BULLETS LOADED:

COWBOY | FTX® | XTP® | XTP® MAG

Hornady® Ammunition Guide

TARGET

Match®

The difference between competing and dominating.

Every component of our Match™ ammunition is loaded to stringent specifications that provide precision, uniformity and repeatable performance.

RIFLE BULLETS LOADED:

A-MAX® | BTHP MATCH™ | ELD® MATCH

Vintage Match™

Exceptional accuracy for classic service rifles.

Vintage Match™ offers exceptional accuracy for classic service rifles such as the M1 Garand, Mauser or any other rifles chambered for these storied cartridges.

RIFLE BULLETS LOADED:

BTHP MATCH™ | ELD® MATCH

Superformance® Match™

Supercharge your match rifle!

Highpower competitors, as well as law enforcement and military shooters and snipers, benefit from the Superformance® Match™ advantages – higher muzzle velocity, phenomenal accuracy, increased range and reduced wind drift.

RIFLE BULLETS LOADED:

BTHP MATCH™ | ELD® MATCH

Frontier®

American made and built on tradition.

American made and built on tradition, Frontier® cartridges feature Hornady® bullets and are available in 223 Rem, 5.56 NATO, 300 Blackout and 6.5 Grendel. Applications range from plinking, target shooting and hunting to law enforcement training and self-defense.

RIFLE BULLETS LOADED:

BTHP MATCH™ | FMJ

Hornady BLACK®

America's gun runs on Hornady BLACK.®

Hornady BLACK® ammunition features versatile loads optimized for excellent performance from America's favorite guns. Loaded with legendary Hornady® bullets, Hornady BLACK® ammunition is designed to fit, feed and function in a variety of platforms.

RIFLE BULLETS LOADED:

A-MAX® | BTHP MATCH™ | ELD® MATCH | FMJ
FTX® | INTERLOCK® | MONOFLEX® | NTX®
SST® | V-MAX®

SHOTGUN:

12 GA 00 BUCKSHOT 2¾"

American Gunner®

Life. Liberty. Hornady.®

Available in rifle, handgun, and shotgun, the American Gunner® line of ammunition represents a collection of tried-and-true, versatile loads that are popular with shooters for their target shooting, hunting or self-defense needs.

RIFLE BULLETS LOADED:

BTHP MATCH | HP MATCH

HANDGUN BULLETS LOADED:

XTP®

SHOTGUN:

12 GA RIFLED SLUG 2¾"
12 GA 00 BUCKSHOT 2¾"

SHOTGUN

Heavy Magnum® Shotgun

Silence the song dog.

Hornady® Heavy Magnum® Coyote delivers lethal results and minimal pelt damage out to 50 yards. Loaded with 1½ ounces of nickel plated lead shot in your choice of BB or 00 buckshot, these 3 inch, 12 gauge shotshells are the perfect answer for close range predators.

SHOTGUN:

12 GA BB 3"
12 GA 00 BUCKSHOT 3"

DEFENSE

Critical Defense®

When lives are on the line, only the best will do.

Critical Defense® is engineered to deliver the pinnacle of threat-stopping power using a patented Flex Tip® bullet that aids expansion and eliminates clogging when passing through clothing. Nickel-plated cases increase visibility in low light situations and low-flash propellants won't disrupt night vision.

RIFLE BULLETS LOADED:

FTX®

HANDGUN BULLETS LOADED:

FTX®

SHOTGUN:

410 TRIPLE DEFENSE
12 GA 00 BUCKSHOT 2¾"

Critical Duty®

Barrier blind performance.

Designed to meet the needs of those who demand superior barrier penetration and prefer a full-size handgun for their personal protection. Critical Duty® is loaded with the tough Hornady® FlexLock® bullet that delivers barrier blind performance when shot through common urban barriers.

HANDGUN BULLETS LOADED:

FLEXLOCK®

SST® Shotgun Slugs

A favorite for years!

Hornady® SST® Shotgun Slugs feature patented Flex Tip® technology. Take the proven performance of our super-accurate patented bullet and transform your favorite rifled barrel slug gun into a firearm that outperforms some centerfire rifles. In both 12 gauge and 20 gauge cartridges, Hornady® SST® Shotgun Slugs deliver sub-2" groups at 100 yards and feature the flattest trajectory on the market.

SHOTGUN:

20 GA 250 GR SST® SLUG 2¾"
12 GA 300 GR SST® SLUG 2¾"

MUZZLELOADING

Bore Driver®

Maximize your range.

FTX® and ELD-X® bullets incorporate an InterLock® ring that helps retain bullet weight upon impact, delivering deep penetration and expansion for the ultimate in on-game lethality.

MUZZLELOADING PROJECTILES:

ELD-X® | FTX®

SST®-ML™

An excellent choice for long range blackpowder hunters.

The Hornady® SST®-ML™ features a sabot that fully engages the rifling to keep the SST® projectile centered and sealed during firing, allowing for maximum velocity and unparalleled long range performance. Upon impact, the Flex Tip® is compressed into the front of the bullet, causing the bullet to expand. The speed sabot option features a fumble-free method of pre-loading pellets.

MUZZLELOADING PROJECTILES:

SST®-ML

MonoFlex® ML™

High Speed/Low Drag Sabot.

Specifically engineered to provide phenomenal accuracy, penetration and high weight retention, the MonoFlex® ML™ is a nontraditional / alternative metal construction projectile that is a fantastic choice for ALL hunters.

MUZZLELOADING PROJECTILES:

MONOFLEX® ML

XTP® Muzzleloading

A huge boost in performance.

Effective in both traditional and modern muzzleloading rifles, these green sabot projectiles use the XTP® bullet which is specifically designed for deep penetration and proper expansion at all practical muzzleloading velocities.

MUZZLELOADING PROJECTILES:

XTP®

Hornady® Bullet Guide

A-Tip® Match

- » Patented precision-machined aluminum tip design delivers tighter groups and reduced drag variability.
- » Doppler radar verified low drag coefficient (high BC) bullets are forgiving of twist rate, seating depth and muzzle velocity.
- » AMP® bullet jacket offers uniformity and concentricity.
- » Sequentially packaged right off the press one after another, minimizes handling throughout the manufacturing process, ensuring the ultimate in consistent performance.
- » Available in boxes of 100 or cases of 1000 consecutive bullets.

IDEAL PERFORMANCE ENVELOPE:

All Practical Ranges

ELD® Match

- » Patented Heat Shield® tip forms the perfect meplat.
- » Combats aerodynamic heating and retains its shape.

FACTORY LOADED AMMUNITION:

LEVEREVOLUTION. **BLACK**
Custom™ CUSTOMLite®

DGX® Bonded

- » Dangerous Game eXpanding bullet designed and built for the toughest game in the world.
- » Copper-clad steel jacket is bonded to lead core for ultimate reliability.
- » Deep penetration with highly controlled expansion up to 1.5x to 2x bullet diameter.
- » Exposed lead and flat profile with serrations aid in expansion while creating a large wound channel.

IDEAL PERFORMANCE ENVELOPE:

1800-2500fps 0-200yds

FACTORY LOADED AMMUNITION:

DGS®

- » Dangerous Game Solid bullet designed and built for the toughest game in the world.
- » Flat nose reduces possible deflections and resists deformation to achieve straight, deep penetration.
- » The heavy copper-clad steel jacket and high antimony lead core penetrate deeply through hide, muscle and bone.

IDEAL PERFORMANCE ENVELOPE:

1800-2500fps 0-200yds

FACTORY LOADED AMMUNITION:

Sub-X®

- » Designed specifically to expand at subsonic velocity.
- » Patented Flex Tip® technology aids in expansion down to 900 fps.
- » InterLock® ring keeps jacket and core together during expansion.
- » Cannelured jacket aids in use for tubular magazines and semi-autos.

IDEAL PERFORMANCE ENVELOPE:

800-1200fps 0-400yds

FACTORY LOADED AMMUNITION:

SUBSONIC
AMMUNITION

Hornady® Bullet Guide

ELD-VT™

- » Dual-purpose for competition or long-range varmint hunts
- » Combines low-drag aerodynamics with lighter weights to increase velocity
- » Patented Heat Shield® tip combats aerodynamic heating for ballistic consistency across the entire trajectory
- » Delivers rapid, dramatic fragmentation
- » AMP® bullet jacket for optimum concentricity and accuracy

IDEAL PERFORMANCE ENVELOPE:

2500-4000fps 0yds-Extended Range

FACTORY LOADED AMMUNITION:

V-MATCH

FMJ Rifle

- » Traditional lead alloy core bullet.
- » Aerodynamic secant ogive delivers flat trajectories and great accuracy.
- » Minimal pelt damage.

IDEAL PERFORMANCE ENVELOPE:

All Practical Ranges

FACTORY LOADED AMMUNITION:

BLACK **FRONTIER**
Custom™

V-MAX®

- » Small game match accurate bullet choice.
- » AMP® jacket design for enhanced accuracy.
- » Rapid, explosive expansion, even at low velocities.
- » Most popular varmint bullet in the world.

IDEAL PERFORMANCE ENVELOPE:

3000-4000fps 0-400yds

FACTORY LOADED AMMUNITION:

VARMINT EXPRESS **SUPERFORMANCE VARMINT™**
BLACK **Custom™**

FTX® Handgun

- » Patented Flex Tip® technology ensures safe use in all tubular magazines.
- » Rapid, controlled expansion with deep penetration.
- » InterLock® ring locks core and jacket together.

IDEAL PERFORMANCE ENVELOPE:

600-1500fps 0-50yds

FACTORY LOADED AMMUNITION:

LEVER EVOLUTION

NTX®

- » Polymer tip and streamlined design for ultra flat trajectories.
- » Lead-free core that is California compatible.
- » Dependably accurate.

IDEAL PERFORMANCE ENVELOPE:

3000-4000fps 0-400yds

FACTORY LOADED AMMUNITION:

VARMINT EXPRESS **SUPERFORMANCE VARMINT™**
BLACK

FMJ Handgun

- » Traditional lead alloy core bullet.
- » Rugged bullet jacket.
- » Carefully designed and manufactured to give superior functioning in semi-automatic handguns.
- » Delivers match-grade accuracy.

IDEAL PERFORMANCE ENVELOPE:

0-100yds

Velocity for Optimal Expansion

Varmint
< 50 lbs

Medium Game
50 - 300 lbs

Large Game
300 - 1500 lbs

Dangerous Game

Target/Match

Personal Defense

XTP®/XTP® Mag™

- » Personal defense and medium game bullet choice.
- » Controlled expansion to 1.5x its original diameter.
- » Deep penetration at high velocities.
- » Unique drawn tapered jacket.
- » Most popular Hornady® pistol bullet.

IDEAL PERFORMANCE ENVELOPE:
 **800-1800**fps    **0-150**yds

FACTORY LOADED AMMUNITION:

HAP®

- » Competition-specific design, with a sleek profile for unmatched performance.
- » Copper jacket protects the nose and ensures smooth feeding every time.
- » Cold swaged core of pure lead delivers consistency, balance, flight stability, and pinpoint accuracy.

IDEAL PERFORMANCE ENVELOPE:
 **All Practical Ranges**

Frontier® Lead

- » Traditional conical and flat designs achieve perfect symmetry when combined with knurling on the bearing surface of the cold swaged bullet, delivering increased stability and accuracy.
- » Our exclusive knurling system retains an even distribution of lubricating wax over the entire bearing surface of the Cowboy™ bullet, resulting in less leading in the barrel.

IDEAL PERFORMANCE ENVELOPE:
 **600-1000**fps   **0-50**yds

FACTORY LOADED AMMUNITION:
Custom™

BULLETS LOADED IN HORNADY® AMMUNITION

(Not available as component bullets)

MonoFlex® Handgun

- » Superior copper alloy performance retains 95% of its weight for deep penetration.
- » A unique elastomer material is added to the bullet's open cavity, causing the bullet to expand quicker than a standard hollow point.
- » California compatible.

IDEAL PERFORMANCE ENVELOPE:
 **800-1600**fps   **0-100**yds

FACTORY LOADED AMMUNITION:
HANDGUN HUNTER®

FTX® (Critical Defense®)

- » Patented FlexTip® design resists clogging when fired through thick and heavy clothing.
- » Provides consistent and reliable expansion and performance.
- » Limited penetration for home and self defense applications.

IDEAL PERFORMANCE ENVELOPE:
 **Handgun: 600-1500**fps  **0-50**yds
Rifle: 1400-2200fps

FACTORY LOADED AMMUNITION:
CRITICAL DEFENSE.

FlexLock®

- » Personal protection for full-sized handguns.
- » No-clog, patented Flex Tip® design.
- » High-antimony lead core and InterLock® band for controlled expansion and unparalleled terminal performance through all FBI test barriers.
- » Cannelure ensures consistent crimp location and no bullet setback during feeding.

IDEAL PERFORMANCE ENVELOPE:
 **600-1500**fps  **0-50**yds

FACTORY LOADED AMMUNITION:
CRITICAL DUTY.

THE *Anatomy* OF A HORNADY® CARTRIDGE

At Hornady, we started manufacturing ammunition to give the hunter and non-reloading shooter an extra advantage—handloaded accuracy in a factory-loaded round. We start with Hornady bullets. The same bullets reloaders use for pinpoint accuracy and dependable performance. Every cartridge is loaded with these bullets on our precision presses one after another.

We carefully inspect cartridges before they go into a box. Brass, primers and bullets are carefully screened one last time for flaws, scratches or imperfections. Unless every round is right, we don't sell it.

BULLETS

The most important part of a loaded cartridge is the bullet. Used by handloaders around the world, Hornady bullets are legendary because of their dependability and performance.

BRASS

Most Hornady ammunition is loaded in Hornady manufactured cases. We carefully manufacture our brass cases for reliable feeding, corrosion resistance, proper hardness and the ability to withstand maximum chamber pressures. We measure for consistently tight wall concentricity and even run our cases through a pressure calibration test to ensure uniform case expansion during firing. Thanks to this kind of manufacturing care, Hornady cases will ensure proper seating of the bullet, both in the case and in the chamber and ultimately yields optimal velocity, repeatable accuracy and numerous reloads.

POWDER

The powder in each cartridge is specifically chosen, based on performance, pressure, velocity and accuracy. We use only the highest quality powders on the market. Each new lot of powder we use is double-checked for consistency. Our continued testing and research guarantees the optimum powder choices for lower extreme spread and standard deviation.

PRIMERS

Primers are selected for proven ability to work efficiently. They are carefully matched to each load and chosen for their ability to quickly and consistently ignite the entire powder charge.

V-Match®

Records Shatter, Varmints Shudder!

NEW ELD-VT™ BULLET

Designed using state-of-the-art technology, the ELD-VT™ bullet boasts high velocity retention, minimal wind deflection, and reduced weight to length ratio for ultra-flat trajectories and rapid expansion. Whether you're seeking to outwit varmints or aiming for victory on the competition range, this bullet's design will provide the ultimate in precision and performance.

PREMIUM COMPONENTS

Every round uses the highest quality components that are meticulously loaded to exacting specifications, resulting in match-grade accuracy that's second to none.

MODERN, CLEAN BURNING PROPELLANTS

Carefully chosen for their consistency no matter the temperature, you can shoot with confidence, knowing that every trigger pull will be met with the same exceptional performance, whether you're competing in the heat of summer or varmint hunting in the chill of winter.

BEST-IN-CLASS BCs

Verified by Doppler radar, the Heat Shield® tip resists the effects of aerodynamic heating and retains its shape to maintain the highest-in-class BC over its entire trajectory.

MATCH-ACCURATE HUNTING AMMUNITION

Streamlined secant ogive with optimum boattail design, highly concentric AMP bullet jackets and Heat Shield tip combine for radically superior aerodynamic efficiency.

DEVASTATING CONVENTIONAL RANGE PERFORMANCE

With high velocity, 0-400 yard impact, the bullet continually expands throughout its penetration path. The thick shank of the jacket and high InterLock® ring work to keep the core and jacket together providing 50-60% weight retention.

BEST EXTENDED RANGE TERMINAL PERFORMANCE AVAILABLE

Upon low velocity, 400+ yard impacts, the Heat Shield® tip drives backward into the bullet to initiate expansion. Exhibiting controlled expansion with a large mushroom and 85-90% retained weight, the bullet provides deep penetration and large cavities.

TRULY MATCH ACCURATE

Loaded with ELD® Match or BTHP Match™ bullets and held to the tightest accuracy standards in the business.

SPECIALLY SELECTED CASES

The strictest criteria determines case selection. Wall thickness uniformity, internal capacity and consistent wall concentricity all play roles in producing the most reliable rounds.

SPECIFICALLY MATCHED PROPELLANTS

Powders are carefully matched to each load for optimal pressure, velocity and accuracy. By pairing the powder with the bullet and primer, we ensure tight extreme spread and standard deviation.

STRINGENT QUALITY CONTROL

Hornady Match™ ammunition is quality controlled for proper bullet seating, consistent charges and pressures, optimal velocity, consistent overall length and repeatable accuracy.

BENNIE COOLEY

LEVERevolution®

Patent No.
8,413,587 & 7,380,502

SCAN TO
LEARN MORE

All other lever gun loads are pointless.

FLEX TIP® TECHNOLOGY

Patented Flex Tip® technology provides higher ballistic coefficients and increased speed up to 250 fps over traditional flat-point loads while remaining safe in tubular magazines.

MORE ENERGY ON TARGET

LEVERevolution® outperforms conventional loads for high weight retention, delivering up to 40% more energy. Flatter trajectories provide outstanding downrange terminal performance.

RELIABLE EXPANSION, EVEN IN HANDGUNS

In handguns, hollow point bullets expand too quickly and sacrifice penetration at higher velocities. Flex Tip® technology allows bullets to expand reliably from 800 to 2,000+ fps.

MODERN PROPELLANTS

New propellants result in maximum muzzle velocity while maintaining conventional pressures.

HEAVY, HARD-HITTING BULLETS

They call it big game for a reason. Dangerous Game™ Series provides big, heavy bullets with copper-clad steel jackets to tackle Africa's Big Five or the biggest game wherever you hunt.

ULTIMATE ONE-TWO PUNCH

Begin the ultimate one-two punch with the controlled expansion of the DGX® Bonded bullet. Follow up with the deep penetration of DGS® through thick hide, dense muscle and hard bone.

BEST POWDERS FOR BIG GAME

Powders are carefully matched to each load to ensure optimum pressure and velocity, and to regulate in double rifles. Some of our Dangerous Game™ Series loads feature Superformance® propellant technology.

RELIABILITY FAR FROM HOME

Produced with strict quality controls for optimal performance on your destination hunt.

MATT SIEMENS

Subsonic

The silence is deafening.

SO QUIET, YOU CAN HEAR A PIG DROP

Hornady® Subsonic Ammunition doesn't have the loud report of a supersonic round, and paired with a suppressor, it's even quieter.

TRULY EXPANDING AND ACCURATE

The Flex Tip® of the Sub-X® bullet, combined with long grooves in its gilding metal jacket and the bullet's flat profile, help it expand at low velocities with no loss in accuracy.

IDEAL FOR NEW SHOOTERS

With its reduced noise and less recoil, Hornady® Subsonic makes an ideal training round for new shooters and provides a more enjoyable and successful shooting experience for anyone.

POWDERS OPTIMIZED FOR SUBSONIC USE

Unique powders for subsonic use result in low flash signature with or without a suppressor.

OUTSTANDING BULLET OPTIONS

Available in a wide variety of hunting calibers, Hornady® Custom™ ammunition is loaded with InterLock®, SST®, InterBond®, V-MAX®, FTX® and CX™ bullets, providing an all-around line of hunting ammunition for your preferred shooting experience.

EXPANSION AND PENETRATION

An industry leader and customer favorite, Custom™ ammunition balances expansion and is well-suited to medium and large sized game.

PIONEERING SECANT OGIVE DESIGN

Most Custom™ ammunition loads feature bullets with the secant ogive design. The profile, developed by Hornady®, creates the optimum blend of ballistic efficiency and bearing surface for flatter shooting and less drag.

VERSATILE AND EFFECTIVE

Custom™ ammunition provides an all-around solution for hunting, target practice or just plain fun.

DESIGNED FOR MATCH ACCURACY

With its polymer tip and streamlined design, the V-MAX® bullet delivers high ballistic coefficients, wind-defying trajectories and tack-driving accuracy at all practical ranges.

RAPID FRAGMENTATION UPON IMPACT

The gilding metal jacket, specially designed lead core and polymer tip combine to initiate expansion from the inside out and cause rapid fragmentation of the V-MAX® bullet.

CASES CHOSEN FOR TOP PERFORMANCE

Brass is chosen to ensure that it meets high Hornady® standards for reliable feeding, corrosion resistance, proper hardness and the ability to withstand maximum chamber pressures.

PROPELLANTS AND PRIMERS

Powders and primers are carefully selected to provide the best performance for each load.

CORTNEY JARZYKA

Superformance® Varmint

Speed Kills®

PREMIUM POWDERS FOR MORE SPEED

Highly efficient propellants maintain peak pressure longer for velocities that are 100 to 200 fps faster than conventional loads without additional chamber pressure, recoil, muzzle blast, temperature sensitivity or fouling.

RAPID FRAGMENTATION UPON IMPACT

Both the V-MAX® with its lead core and the NTX® with its core of frangible copper alloy feature a polymer tip that initiates near instant expansion and rapid fragmentation.

INCREASED RANGE AND ENERGY

With its boost in speed, Superformance® Varmint produces superior accuracy, increased range, flatter trajectories and less wind drift, as well as better energy on target.

VERSATILE PERFORMANCE

Superformance® Varmint achieves optimal results for all firearms, including semi-autos.

SCOTT MCGREGOR

Critical Duty®

Barrier blind performance.

FLEXLOCK® BULLET

The FlexLock® bullet incorporates two revolutionary Hornady® features: the no-clog, patented Flex Tip® design and the heavy duty jacket-to-core InterLock® band.

INTERLOCK® BAND

Large mechanical jacket-to-core InterLock® band keeps the bullet and core from separating for maximum weight retention and proven terminal performance through all FBI test barriers.

HIGH-ANTIMONY CORE

The high-antimony lead core is extremely tough and delivers controlled expansion. It also provides a more economical choice than similar bonded bullets.

NICKEL-PLATED CRIMPED CASES

Nickel plating resists corrosion and greatly enhances low-light chamber checks, while combining the cannelured bullet with a crimped case ensures no bullet setback during feeding.

Critical Defense®

Your best defense for personal protection.

SCAN TO
LEARN MORE

FTX® BULLET TECHNOLOGY

The patented FTX® bullet with its Flex Tip® expands reliably and resists the clogging and inconsistency that often plague other hollow points when fired through heavy clothing.

DEFENSE-CENTERED DESIGN

Critical Defense® was developed to provide the best performance for personal protection situations and is the ultimate choice for short-barreled, concealed-carry style firearms.

EFFECTIVE IN LOW-LIGHT SITUATIONS

Nickel-plated cases resist corrosion and simplify chamber checks in low light. Optimized propellants burn quickly to reduce recoil and limit muzzle flash, preserving night vision.

WON'T OVER-PENETRATE

Critical Defense® performs especially well in close quarters and short-range situations.

SUPERIOR COPPER ALLOY PERFORMANCE

Harder and tougher than solid copper, the copper alloy of the MonoFlex® bullet doesn't separate, achieving deep penetration. Plus, it retains 95% of its weight upon impact and is fully California-compliant.

ELASTOMER TIP AIDS IN EXPANSION

A unique elastomer material is added to the bullet's open cavity. It compresses upon impact, then pushes out, causing the bullet to expand quicker than a standard hollow point.

ROUGH AND RUGGED

Whether you're bagging a bull, buck or boar, Handgun Hunter® is as rough and rugged as the game demands. Its deep penetration also makes it a great round for your backup handgun.

PRODUCED WITH PREMIUM COMPONENTS

MonoFlex® bullets, combined with premium cases, primers and powders, offer superior performance.

SST® Shotgun Slugs

SST® Shotgun Slugs

For fully rifled barrels

Add the accuracy and impact of our SST® bullet to a traditional lead-core slug, and you've got a shotgun that can outperform some centerfire rifles. Thanks to Flex Tip® technology, SST® Shotgun Slugs expand quickly and reliably. The reigning champ in slug states, SST® slugs deliver sub-3" groups at 100 yards and pack a target-dropping punch — up to 1,793 foot-pounds of energy in 12 gauge.

Custom Lite® Shotgun Slugs

For fully rifled barrels

Custom Lite® Shotgun Slugs offer an alternative for anyone who wants to tame the recoil of their rifled-barrel slug gun. Modified fast-burning propellants result in 25% less recoil in 20 gauge and 40% less recoil in 12 gauge compared to standard options.

Shotgun

Heavy Magnum® Coyote

Hornady® Heavy Magnum® Coyote delivers lethal results and minimal pelt damage out to 50 yards. Loaded with 1½ ounces of nickel plated lead shot in your choice of BB or 00 buckshot, these 3 inch, 12 gauge shotshells are the perfect answer for close range predators.

Both loads feature the Hornady® Versatite® wad that strips cleanly from the shot string for excellent pattern density and a short shot column for maximum effect on target. Not only are these loads extremely effective, they're also an economical choice when compared to expensive tungsten options.

Black Powder Muzzleloading

Great Plains Bullets

Pre-lubricated for easy loading, the tapered base lets you start the bullet easily. Cold forming from pure lead eliminates air pockets and the thin skirt, long bearing surface, and hollow point bullet design make it a highly devastating and accurate black powder legend.

50 Cal. 385 gr.
Hollow Base Hollow Point (20 ct.)
No. 6620

Whether it's the rolling smoke or the deep booming sound of a muzzleloader, the challenge of shooting a tight group with a primitive firearm is enjoyable and satisfying to shooters and hunters who prefer a traditional muzzleloading rifle. Hornady® appreciates this elite group of shooters and offers the products to make their experience successful.

Hornady® Round Balls

Completely uniform in size, weight, and roundness, Hornady® Round Balls deliver consistent and accurate performance. They're cold swaged from pure lead which eliminates air pockets and voids common to cast soft balls. And the smoother, rounder surface assures better rotation, consistency, and easy loading.

SCAN TO LEARN MORE

PA Conical Bullets

For those using a longer barreled, slower twist firearm, this heavier conical style 50 caliber bullet has about 35% more weight than a typical lead round ball. On impact, it provides reliable terminal performance and better penetration than a typical lead round ball.

Muzzleloading

SST®-ML™ and SST®-ML™ Speed Sabot®

The sabot of the SST®-ML™ fully engages the rifling, keeping it centered and sealed during firing for maximum velocities, flat trajectories and accuracy beyond 200 yards. The Flex Tip® compresses on impact, causing the bullet to expand. The SST®-ML™ is 50% easier to load than other sabot bullets, and the Speed Sabot® offers a fumble-free method of preloading pellets.

50 CAL XTP®	.430"	240 gr.	6720	20

See pages 170-179 for ballistics information.

BORE DRIVER®

LOADS FAST AND EASY

Without a sabot, the Bore Driver® seats quickly and easily for shot-after-shot performance.

MAXIMUM LETHALITY

FTX® and ELD-X® bullets incorporate an InterLock® ring that helps retain bullet weight upon impact that when coupled with a tough copper alloy jacket, delivers deep penetration and expansion for the ultimate in on-game lethality.

POLYMER TIP

Upon impact, the polymer tip drives into the lead core like a wedge, initiating lightning-fast, yet controlled expansion.

PERFORMANCE-BOOSTING BASE

The polymer base features a post that fits into the bottom of the bullet. This post swells in diameter at ignition for better torque engagement from inside the bullet and the centering petals grip the bullet's boattail while the skirt engages the rifling to maximize energy transmission.

ELD-X®

The Bore Driver® ELD-X® delivers range and accuracy that other non-saboted muzzleloader bullets just can't match. Take your muzzleloader's effective range out to 300 yards or more — without switching guns or even changing to a faster twist barrel.

With its superior ballistic coefficients, reduced drag and less than half the wind drift at 200 yards, the Bore Driver ELD-X drives its 340 gr. bullet to target with the energy and accuracy that turn shots into success.

TOM AND KYLE MARQUARD

ALUMINUM TIP

This precision machined tip is longer, moving the center of gravity to enhance stability and reduce drag variability.

HEAT SHIELD® TIP

This tip resists the effects of aerodynamic heating and retains its shape to provide a perfect and consistent meplat (tip).

FLEX TIP®

Allows for more aerodynamic bullets in tubular magazines. The soft Flex Tip® initiates expansion, even at lower velocities. It penetrates deep with high weight retention.

POLYMER TIP

This tip increases ballistic coefficient and initiates dramatic expansion upon impact, even at low velocities.

SPIRE POINT

Used as hunting bullets, the spire point offers dependable expansion at moderate ranges.

HOLLOW POINT

Traditional way of finishing an ogive that allows smaller, tighter points, yielding a more aerodynamically efficient bullet.

FLAT POINT

This hunting bullet design provides controlled expansion with a profile that is safe for tubular magazines.

ROUND NOSE

This hunting bullet design is for use at short-to-moderate ranges. When it penetrates game, it is designed to expand and mushroom dependably.

FULL METAL JACKET

Traditional method of forming economical projectiles that provide reliable feeding in semi- and fully automatic platforms.

THE Anatomy OF A HORNADY® BULLET

Joyce Hornady recognized innovation as the product of a quest for perfection, and a belief that the next big breakthrough was just around the corner. Founded on the principle of making better shooting products, that desire has led to a wave of ingenuity ever since.

SECANT OGIVE DESIGN

Pioneered by Hornady® for use in hunting bullets, this technology broke new ground in ballistic engineering and is now used in bullets for everything from match to varmint shooting. The secant ogive is a geometrically developed design that creates the most ballistically efficient profile, yet retains the optimum bearing surface. The combination of the slender point and increased bearing surface results in lower drag, increased stability, flatter trajectories, and amazing accuracy.

THE MEPLAT

Defined as "the diameter of the end of the tip of the projectile." Careful attention is paid to the meplat because its diameter and uniformity contribute to the aerodynamic efficiency of the bullet.

THE TIP

Hornady® is recognized as a world leader in bullet tip development. Although small, the tip has a bigger impact on overall performance than perhaps any other portion of the bullet. Innovations in shape and material have led to breakthroughs in accuracy and aerodynamic efficiency. At extended range, the proper tip can reduce vertical stringing, retain downrange velocity and energy, and initiate expansion.

THE JACKET

Using advanced manufacturing processes and decades of bullet engineering experience, we precisely control jacket thickness for optimum controlled expansion. Our AMP® bullet jackets* have virtually zero runout and near zero wall thickness variation.

THE CORE

Hornady® bullets have three core varieties. First, the traditional swaged lead core provides uniformity and balance for consistent performance and accuracy. Second, the nontraditional lead-free core (NTX) offers a phenomenal option when non-lead bullets are required. Lastly, our coreless monolithic one-piece copper alloy bullets won't separate and deliver deeper penetration.

THE CANNELURE*

The cannelure provides a consistent crimp location, and works with the InterLock® ring to control expansion. Cannelures are also found in select Hornady® bullet lines where semi-automatic or lever gun use is desired.

THE INTERLOCK® RING*

The raised InterLock® ring is embedded in the bullet's core, ensuring the core and jacket remain locked during expansion to retain mass and increase penetration. This is found in many Hornady® hunting bullets, but is not used in match or varmint offerings.

THE BASE

Hornady® bullets primarily come in two styles: boattail and flat base. A boattail design is used to lower the drag at extended range, while the traditional flat base design is often used for shooting at moderate range.

*Not found on all bullets.

Shooting application Legend

Varmint < 50 lbs	Medium Game 50 - 300 lbs	Large Game 300 - 1500 lbs	Dangerous Game	Target/Match	Personal Defense

ELD-VT™

The Hornady ELD-VT™ bullet is here to redefine your varmint hunting and shooting pursuits, offering unmatched accuracy, rapid fragmentation, and the confidence to take on any challenge – from long-range varmint hunts to long-range competitions.

PRECISION PERFECTED

Born from a culmination of years of ballistic research, the ELD-VT™ pairs the aerodynamics of low drag match bullets with the lighter weight of a varmint bullet, giving the ELD-VT™ a level of uncompromising dual-purpose performance. Say goodbye to compromise, as this bullet's match-winning accuracy and rapid expansion will set new standards.

RAPID FRAGMENTATION

The Hornady ELD-VT™ bullet isn't just about hitting the bullseye – it's about making a statement when it gets there. Upon impact, the polymer tip drives rearward through the large air gap and into the bullet core, causing rapid and dramatic fragmentation, even at low velocity.

ADVANCED MANUFACTURING PROCESS (AMP®) BULLET JACKETS

A testament to an unwavering commitment to excellence, AMP® bullet jackets provide unrivaled consistency in concentricity and thickness, ensuring every ELD-VT™ bullet performs at its peak.

HEAT SHIELD® TECHNOLOGY

ELD-VT™ bullets incorporate the Heat Shield® tip, which resists the effects of aerodynamic heating. They retain their shape to maintain the lowest drag over their entire trajectory.

UNIQUE WEIGHT TO LENGTH DESIGN

Long, sleek, match bullet profile with reduced core to bullet length ratio, maximizes muzzle velocity and moves the center of gravity rearward which enhances aerodynamic performance.

Hornady Podcast #97: ELD-VT™ Bullets

On this episode, Seth is joined by Assistant Director of Engineering, Joe Thielen, Senior Ballistician Jayden Quinlan, and Project Engineer, Miles Neville. The discussion covers our new ELD-VT™ bullet specifically, the design, and the application. This exciting new bullet takes our extremely low-drag match bullet shape and pairs it with the rapid fragmentation of our varmint bullets, creating a dual-purpose, long-range varmint and target bullet. By utilizing a unique core configuration, the bullets have excellent drag characteristics and exceptional terminal performance. We hope you enjoy the show.

A-Tip® Match

Years of research and testing by the Hornady® Ballistic Development Group, combined with advanced manufacturing processes and quality control measures, have led to the creation of the ultimate low-drag, high-performance match bullet.

PATENTED ALUMINUM TIP DESIGN

Precision machined and longer than polymer tips, the patented aluminum tip moves the center of gravity for enhanced in-flight stability and reduced drag variability.

ADVANCED ELEMENTS

The aeroballistically advanced A-Tip® Match features the perfect blend of ogive, tip length, bearing surface and boattail, resulting in tighter groups.

PERFORMANCE

Bullets verified by Doppler radar for low-drag coefficient and high ballistic coefficient are forgiving of twist rate, seating depth and muzzle velocity.

CONSISTENT FROM BULLET TO BULLET

A-Tip® Match bullets are sequentially packaged right off the press, one after another, for the ultimate in consistent performance. Minimal handling throughout the manufacturing process ensures consistency from bullet to bullet. Unlike other bullets, A-Tip® Match bullets are not bulk washed so they are packaged with a polishing bag in each box to prepare bullets for loading.

CUSTOM-PROFILED SEATING STEMS AVAILABLE FOR A-TIP® BULLETS.

See page 130.

The best in the world choose Hornady.®

Austin Orgain took first place at the 2023 Hornady Precision Rifle Challenge shooting Hornady A-Tip® Match bullets.

Jake Vibert won the Open Division and took first place overall at the THS Steel Classic PRS Match, 6.5mm 153 gr. A-Tip® Match bullets in his 6.5 Creedmoor.

Sean Murphy and Greg Hamilton took first place at the Real World Sniper Challenge, shooting Hornady 6.5mm 135 gr. A-Tip® Match bullets in their precision rifles and 9mm 125 gr. HAP bullets in their pistols.

Clay Blacketter won the Peterson's Cartridge Challenge PRS Match and AG Cup Qualifier, using 6mm 110 gr. A-Tip® Match bullets.

Hornady recommends the following twist rates for our larger caliber A-Tip® Match bullets:

- .375 caliber 390 grain: 1:11 twist rate
- .416 caliber 500 grain: 1:12 twist rate

ELD® Match

Superior accuracy and industry leading ballistic design are the hallmarks of the ELD® Match Bullet. The groundbreaking Heat Shield® tip resists aerodynamic heating, which can deform conventional polymer tips. Combined with other features, it creates a competitive shooting bullet with superior accuracy and extreme consistency from bullet to bullet, lot to lot.

BEST-IN-CLASS BCs

Conventional polymer tips can melt and deform in flight, reducing ballistic coefficients and degrading accuracy. The Heat Shield® tip resists the effects of aerodynamic heating and retains its shape, providing a perfect meplat that is always the same.

BULLET SHAPED FOR ACCURACY

Along with the Heat Shield® tip, the streamlined secant ogive with optimum boattail design and highly concentric AMP® bullet jackets combine for remarkable accuracy and best in class BCs.

DOPPLER RADAR VERIFIED DATA

ELD® Match bullet BCs are measured and verified by Doppler radar and corrected to standard atmospheric conditions.

SWAGED LEAD CORE FOR UNIFORMITY

ELD® Match bullets feature a precision swaged lead core, which provides consistent uniformity and contributes to the bullet's aerodynamics and accuracy, even at extended ranges.

THE PERFECT TIP!

The Heat Shield® tip creates the perfect meplat and outperforms BTHP bullets.

Hornady engineers used Doppler radar to test new products.

Ten bullets through one hole

"Ten bullets through one hole" was the philosophy of Joyce Hornady, the company's founder. This great idea of accuracy and perfection has continued from the first bullet made more than 70 years ago, right through today. Shown is a quality control group that was shot from an 8-twist Bartlein barrel during our normal production process using a 6.5mm Creedmoor 140 gr. ELD[®] Match bullet at **200 yards**. This target exemplifies J.W. Hornady's ideal in accuracy and consistent performance.

Match™

We combined technological advancements in design, tooling and manufacturing to produce Match™ bullets with superior consistency and unrivaled accuracy. With the tightest standards in the industry, Match™ bullets incorporate every possible design feature to deliver a well-balanced, exceptionally accurate bullet.

AMP® BULLET JACKET

The consistently concentric AMP® (Advanced Manufacturing Process) bullet jackets feature virtually zero runout and near zero variation in wall thickness.

SWAGED LEAD CORE

Our lead cores are swaged for excellent uniformity and balance, providing consistent performance from bullet to bullet.

SECANT OGIVE PROFILE

The geometric profile produces low drag and flatter trajectories. The optimum bearing surface provides stability in flight and the best ballistic coefficients.

4DOF® available on the Hornady® Kestrel® 5700 Ballistics Weather Meter

BOATTAIL

The unique angle and length of the boattail is optimized for each caliber and weight of Match™ bullet to maximize ballistic coefficients and performance.

A-MAX®

To meet the demands of match shooters, the A-MAX® bullet design grew from a relentless application of everything we know about ballistics and flight characteristics. The aerodynamic secant ogive profile, sharp pointed tip and unequalled concentricity result in an extremely high ballistic coefficient and near perfection in flight.

OPTIMAL TIP

The uniform tip raises the ballistic coefficient and precisely balances the center of pressure relative to the center of gravity for optimal in-flight stability.

SECANT OGIVE PROFILE

The geometric profile creates low drag, flatter trajectories, and an optimum bearing surface for in-flight stability and best possible ballistic coefficient.

SWAGED LEAD CORE

The swaging process produces cores with excellent uniformity and balance for consistent performance and superior accuracy.

AMP® BULLET JACKET

The consistently concentric AMP® (Advanced Manufacturing Process) bullet jacket has virtually zero runout and near zero variation in wall thickness.

6.5 PRC | 300 PRC

For more information, see page 99.

ELD-X®

The ELD-X® (Extremely Low Drag — eXpanding) provides match accuracy in an expanding bullet that's effective at all practical hunting distances. The Heat Shield® tip not only contributes to high ballistic coefficients and accuracy but also delivers consistent, controlled expansion for extreme lethality whether shooting near or far.

BEST-IN-CLASS BCs

Verified by Doppler radar, the Heat Shield® tip combats aerodynamic heating and retains its shape, providing a perfect meplat, for highest-in-class BCs over its entire trajectory.

MATCH ACCURATE HUNTING BULLET

Streamlined secant ogive with optimum boattail design, highly concentric AMP® bullet jacket and Heat Shield® tip produce superior aerodynamic efficiency.

DEVASTATING AT CONVENTIONAL RANGES

Along with the thick shank of the jacket, the InterLock® ring works to keep the bullet's jacket and core together in high-velocity impacts up to 400 yards, providing 50-60% weight retention.

BEST EXTENDED RANGE TERMINAL PERFORMANCE AVAILABLE

In low-velocity impacts past 400 yards, the Heat Shield® tip drives backward into the bullet to initiate expansion with 85-90% weight retention. Exhibiting conventional expansion with a large mushroom, the bullet provides deep penetration and large wound cavities.

CUSTOM-PROFILED SEATING STEMS AVAILABLE FOR ELD-X® BULLETS.

CX™

The new CX™ (Copper alloy eXpanding) bullet from Hornady represents the most advanced monolithic hunting bullet on the market. Its optimized design offers extended range performance, greater accuracy, high weight retention, and deep penetration.

MONOLITHIC COPPER ALLOY BULLET

One-piece copper alloy bullet delivers devastating terminal performance, deep penetration, and 95% weight retention.

PATENTED HEAT SHIELD® TIP

The Heat Shield® Tip is made of a heat resistant polymer that resists aerodynamic heating and provides a consistently high BC for the bullet's entire flight path. The Heat Shield® tip also gives the bullet the perfect patented meplat for bullet-to-bullet and lot-to-lot consistency.

OPTIMUM GROOVE GEOMETRY

The grooves on the CX™ bullet maximize aerodynamic performance while effectively reducing bearing surface and fouling.

NONTRADITIONAL OPTION FOR LARGE GAME

Fully California compatible and appropriate for use in other areas that require nontraditional bullets, CX™ provides a great option for everything from medium-size to large game.

CUSTOM-PROFILED SEATING STEMS AVAILABLE FOR CX™ BULLETS.

See page 130.

SST®

Short for "Super Shock Tip,"™ the Hornady® SST® is designed to deliver tremendous shock on impact while expanding quickly and reliably, particularly at higher velocities. Flat shooting and deadly accurate, it's an ideal bullet for whitetails, as well as most North American game animals from antelope to moose and similar-sized African plains game. The SST® creates a devastatingly large wound channel.

POLYMER TIP

The hard, sleek polymer tip increases aerodynamic efficiency and drives into the lead core like a wedge on impact, initiating fast yet controlled expansion.

INTERLOCK® RING

The InterLock® ring keeps the core and jacket locked solid during expansion, so the SST® retains the mass and energy needed for dramatic wound channels.

CANNELURE

The cannelure works with the InterLock® ring to keep the core and jacket together while providing a consistent, accurate crimp location during loading.

SECANT OGIVE PROFILE

The profile produces low drag and flatter trajectories. The optimum bearing surface provides stability in flight and the best ballistic coefficients.

BULLETS

75th Anniversary Bullets

Limited edition commemorative bullets pay homage to the first bullet and packaging Hornady® manufactured. The 30 Cal. 150 grain Spire Point remains one of our best-selling bullets today.

No. 3031-75

InterLock®

InterLock® provides a classic option for hunting medium to large game. Hard hitting and deep penetrating, InterLock® sets the standard by which all hunting bullets are measured. InterLock® bullets include exposed lead tips for controlled expansion and an InterLock® ring that locks the core and jacket together for devastating wound channels. Most feature our secant ogive design for superior ballistic efficiency.

INNER GROOVES

Inner grooves strategically control the upper portion of the copper jacket, initiating consistent, controlled expansion even at long range.

ONE-PIECE CORE

The one-piece core won't separate like two-piece divided cores. As a result, InterLock bullets retain more mass, energy and momentum, providing deep penetration and large, consistent wound channels for clean kills.

INTERLOCK® RING

The raised InterLock® ring is embedded in the bullet's core, ensuring the core and jacket are locked together during expansion to retain mass and energy.

CANNELURE

The cannelure in the bullet jacket on most InterLock® bullets provides accurate and consistent crimping and works with the InterLock® ring to hold jacket and core together.

DGX[®] Bonded

The DGX[®] Bonded (Dangerous Game™ eXpanding) bullet features a copper-clad steel jacket bonded to a lead core to provide limited, controlled expansion with deep penetration and high weight retention. Bonding the jacket to the core prevents separation from high-energy impact on tough material like bone, ensuring the bullet stays together for deep expansion.

BONDED JACKET AND CORE

Bonding the jacket to the antimony-hardened lead core locks them together so they won't separate during a high-energy impact, improving the retained weight.

COPPER-CLAD STEEL JACKET

The copper-clad steel jacket of DGX[®] Bonded sets it apart from other dangerous game bullets, allowing it to tear through tough hide, muscle and bone.

CONTROLLED EXPANSION

DGX[®] Bonded features a flat nose with serrated sections for uniform expansion and straight penetration, reducing possible deflections.

SHARED PROFILE

DGX[®] Bonded (Dangerous Game™ eXpanding) bullets are built to the same profile as corresponding DGS[®] bullets but expand up to twice their original diameter.

DGS®

Hunting the toughest game in the world demands a bullet that's tougher! Featuring a copper-clad steel jacket, the DGS® (Dangerous Game™ Solid) lives up to its name with an advanced profile built of the toughest materials around to penetrate through thick hide, dense muscle and hard bone. The perfect companion to our DGX® Bonded bullet, count on DGS® to deliver maximum stopping power.

WIDE, FLAT NOSE

DGS® bullets feature a flat nose that delivers maximum energy on impact while resisting deformation and deflection to achieve deep penetration.

COPPER-CLAD STEEL JACKET

With its copper-clad steel jacket and high-antimony lead core, DGS® maintains integrity and overall weight to drive through the toughest muscle and bone.

UNIFORMITY WITH DGX®

Follow DGX® Bonded with a DGS® bullet from the same firearm with little to no shift in point of impact thanks to their uniformity in size and shape.

TOUGHER THAN THICKEST HIDES

The non-expanding DGS® bullet provides maximum penetration from all angles on thick-skinned, heavy-boned animals such as buffalo, elephants, rhinos and hippos.

V-MAX[®]

A combination of gilding metal jacket, polymer tip and specially designed core puts the "max" in V-MAX.[®] The industry's leading varmint bullet delivers enhanced accuracy, rapid expansion and dramatic fragmentation at a wide range of distances and velocities.

POLYMER TIP

The streamlined polymer tip increases the ballistic coefficient and also initiates dramatic expansion upon impact — even at velocities as low as 1,600 fps.

AERODYNAMIC DESIGN

The bullet's aerodynamic profile results in flat trajectories, high ballistic coefficients and maximum bearing surface for in-flight stability.

SWAGED LEAD CORE

The lead core includes a cavity under the tip's stem that allows the tip to build up energy before smashing into the core, causing violent fragmentation.

GILDING METAL JACKET

The concentricity of the match-grade jacket design provides maximum accuracy at all practical ranges, as well as contributing to the bullet's expansion.

EXCEPTIONAL ACCURACY

By utilizing a swaged lead core and the concentricity of our match-grade AMP[®] bullet jacket, the V-MAX[®] provides maximum accuracy at all practical ranges.

NTX®

Made with a lead-free core material, NTX® bullets provide peerless performance against small game in areas that restrict the use of traditional lead bullets. With its polymer tip, streamlined design and match-grade AMP® jacket, NTX® delivers ultra-flat trajectories, maximum accuracy and reliable expansion at all practical ranges.

POLYMER TIP

The copper-colored polymer tip contributes to the streamlined design of the NTX® bullet, creating straight-line trajectories and initiating expansion upon impact.

LEAD-FREE CORE

Designed specifically for shooting and hunting in areas that restrict lead, this California compatible alternative provides near-instant expansion and explosive fragmentation.

Traditional Varmint™

Hornady® Traditional Varmint™ bullets have been a varmint hunting favorite for decades. With their lead cores and match-grade copper jackets, our traditional Varmint™ bullets reflect the standard Joyce Hornady established for classic varmint hunting. Mostly spire points with flat bases, these bullets provide flat trajectories, maximum accuracy and explosive expansion, even at low velocities. They perform extremely well in many classic varmint rifles.

Sub-X®

Sub-X® bullets were designed to perform below the speed of sound. They still give reliable expansion, deep penetration and high weight retention even at velocities as low as 900 fps. So they're tough on target but tame on noise and recoil. Sub-X® bullets deliver big results without the big bang.

DESIGNED FOR SUBSONIC USE

When loaded at speeds below 1,100 fps, Sub-X® loads don't have the loud report of most ammunition, and game will never hear it coming.

TRULY EXPANDING

Long serrations in the bullet's gilding metal jacket combine with its flat profile and patented Flex Tip® insert to produce reliable expansion even at low velocities.

DEVASTATING IMPACT

The InterLock® ring keeps the bullet's jacket and lead core together during expansion for deep penetration, 90% or greater weight retention and repeatable results.

VERSATILE PERFORMANCE

Ideal for hunting, target shooting or plinking, Sub-X® is designed to feed and function in a variety of firearms, including gas system guns. Its cannelured jacket provides positive case crimp for use in semiautomatics.

MonoFlex®

Combining the technologies of CX™ and FTX® bullets, MonoFlex® offers another option for lever gun shooters. The copper alloy won't separate, allowing deep penetration and high weight retention. Plus, it expands reliably even at lower velocities.

PATENTED FLEX TIP® DESIGN

Safe for use in tubular magazines, the Flex Tip® initiates expansion upon impact, even at the lower velocities often encountered in lever gun shooting.

COPPER ALLOY CONSTRUCTION

The copper alloy used in the MonoFlex® bullet coupled with the pressure relieving grooves won't foul or increase chamber pressure.

HIGH WEIGHT RETENTION

The MonoFlex® bullet retains 95% of its original weight, causing deep penetration and making it ideal for medium to large game.

SECANT OGIVE DESIGN

The ballistically efficient secant ogive profile delivers the flattest trajectories from lever guns, giving you an edge in medium- to long-range shooting.

FTX® Rifle

Faster, flatter, farther — that's the story behind FTX®. The patented Flex Tip® brings the accuracy, power and extended-range performance of a tipped bullet to the classic lever rifle while remaining safe in tubular magazines. Its aerodynamic design achieves accuracy beyond traditional ranges to bring down heavy-bodied game animals.

PATENTED FLEX TIP®

While contributing to the bullet's aerodynamic shape, the soft tip compresses into the core on impact, initiating expansion across a wide range of velocities. Safe to shoot in tubular magazines and other firearms.

BALLISTICALLY EFFICIENT

Pioneered by Hornady®, the secant ogive design includes a thinner, tapered front section and extended bearing surface for stability and flat trajectories.

INTERLOCK® RING

The InterLock® ring mechanically locks the high-antimony lead core and jacket together, causing maximum weight retention and deep penetration on large game.

SPECIALY ENGINEERED JACKET

The heavy jacket over the shank of the bullet, combined with our proven InterLock® design, controls expansion and enhances accuracy.

FTX[®] Handgun

The same Flex Tip[®] technology that revolutionized the performance of lever-action rifles is available for handguns, as well. FTX[®] Handgun achieves reliable expansion over a wide range of velocities, unlike typical hollow point pistol bullets, which can expand too quickly and sacrifice penetration at higher speeds.

PATENTED FLEX TIP[®]

While contributing to the bullet's aerodynamic shape, the soft tip compresses into the core on impact, initiating expansion across a wide range of velocities.

BALLISTICALLY EFFICIENT

Pioneered by Hornady[®], the secant ogive design includes a thinner, tapered front section and extended bearing surface for stability and flat trajectories.

INTERLOCK[®] RING

The InterLock[®] ring mechanically locks the high-antimony lead core and jacket together, causing maximum weight retention and deep penetration on large game.

SPECIALLY ENGINEERED JACKET

The heavy jacket over the shank of the bullet, combined with our proven InterLock[®] design, controls expansion and enhances accuracy.

XTP®

Designed for hunting and self-defense, XTP® bullets have demonstrated the kind of accuracy competitive shooters count on. Specifically designed to expand at a wide range of velocities, XTP® bullets have built a world-class reputation for stopping power and deep penetration. Its reliability makes it the most popular handgun bullet among both hunters and target shooters.

CONTROLLED EXPANSION

Precise serrations divide the XTP® into symmetrical sections, initiating expansion even at low velocities. Varying the thickness down the gilding metal jacket helps control expansion and provides an advantage over plated bullets which have a uniform jacket thickness over the entire bullet.

NO EXPOSED LEAD

The jacket protects the nose of the bullet, so the hollow cavity functions properly on impact, while the uniform core density ensures balanced expansion and in-flight stability.

CANNELURES FOR REVOLVERS

On revolver bullets, the cannellure helps achieve accurate, consistent crimping. All cannellures are applied before final forming to eliminate any distortions to the finished bullet.

DEVASTATING WOUND CHANNELS

The XTP® design resists fragmentation to penetrate deeper and hit harder, creating devastating wound channels with expansion up to 1½ times the bullet's original diameter.

FMJ Handgun

Full metal jacket handgun bullets have long served as a standard for target shooting applications. Hornady® FMJ bullets are built with a rugged jacket and the difference in performance is clear. The thinly plated full metal jacket from other manufacturers is easily distorted and often breaks or separates when the bullet impacts the target. Hornady® FMJ bullets are carefully designed and manufactured to give superior functioning in semi-automatic handguns, and they deliver match-grade accuracy!

HAP®

Hornady® refined the XTP® design into the perfect competition projectile. The HAP® (Hornady® Action Pistol) bullet eliminates the serrations that aid in expansion on the XTP® to create a sleek and balanced projectile. Precision-swaged cores and bullet jackets with industry-leading concentricity result in a bullet that delivers accuracy every time.

SLEEK AND ACCURATE

Expansion isn't an issue in action pistol shooting, so we removed the expansion-aiding skives. The result is a bullet that delivers the accuracy its sleek appearance promises.

NO EXPOSED LEAD

A jam can cost the match for a competitive shooter, and that's why our copper jacket protects the nose of our HAP® bullet.

SWAGED CORE

The core of the HAP® bullet is cold swaged from pure lead to deliver consistency, balance and stability in flight, resulting in the pinpoint accuracy competition shooters rely on.

GILDING METAL JACKETS

The gilding metal jacket ensures smooth feeding while its concentricity improves accuracy.

JESSIE HARRISON

HARRISON WINS 25TH NATIONAL TITLE

Team Hornady® sponsored shooter **Jessie Harrison** won her 25th national title in 2023 using HAP® (Hornady Action Pistol) bullets. She won the Ladies Limited Optics Division at the Sig Sauer Handgun National Championships on Oct. 4-8 in Marengo, Ohio, shooting 9mm 125 gr. HAP® bullets in her 38 Super Comp. "The HAP bullets are amazingly accurate and were a vital component in securing my 25th USPSA national title," she said.

Frontier® Lead

Frontier® Lead bullets represent the perfect blending of Western authenticity and Hornady® quality. Our Cowboy™ bullets are built to SASS (Single Action Shooting Society) specifications while being held to the same stringent production standards as all of our products. Our lead pistol bullets are pre-lubricated and cold swaged for total uniformity and balance.

CLASSIC AND CONVENTIONAL DESIGNS

Traditional conical and flat designs achieve perfect symmetry when combined with knurling on the bearing surface of the bullet, delivering increased stability and accuracy.

SPECIAL KNURLING SYSTEM

Our exclusive knurling system retains an even distribution of lubricating wax over the entire bearing surface of the Cowboy™ bullet, resulting in less leading in the barrel.

Hornady® 4DOF® Ballistic Calculator

Four Degrees of Freedom

Why compare the flight of your bullet to a standard G1 or G7 projectile when you can use your own projectile as the standard?

Most ballistic calculators consider three degrees of freedom: windage, elevation, and range. The Hornady® Ballistic Calculator with 4DOF® (Four Degrees of Freedom) also incorporates the projectile's movement about its center of gravity and angle relative to line of flight.

Its trajectory solutions are based on projectile drag coefficient (not ballistic coefficient), along with exact physical modeling of the projectile, its mass and aerodynamic properties. It also correctly calculates aerodynamic jump, a bullet's vertical shift as it encounters a crosswind.

Using Doppler radar, Hornady engineers calculated exact drag versus velocity curves for each bullet in the database, making the 4DOF® calculator more accurate at longer ranges than BC-based systems or custom drag curves with limited data.

New in-app features give shooters the edge.

GROUP ANALYSIS:

Allows users to capture group analytics such as raw group size, group size in MOA, mean radius, and group mean point of impact distance from point of aim. Analyzed targets can be saved, shared, and used to set rifle zero angle.

SHARE PROFILE:

This feature lets the user share their exact favorite profile with another 4DOF® user.

RANGE CARD:

Lets the user input target and environmental data for an infinite number of targets and then allows the shooter to view trajectory solutions quickly for each.

Find the free Hornady® Ballistic Calculator with 4DOF® at hornady.com/4dof or download from the Apple or Android app stores.

FREE BALLISTIC APP WITH 4DOF®

The free Hornady Ballistic Calculator App includes the advanced 4DOF® calculator as well as a standard BC calculator. Providing more accurate trajectory solutions, the 4DOF® calculator incorporates the projectile's movement in the standard 3 degrees but also adds its movement about its center of gravity and subsequent angle relative to its line of flight, which is the fourth degree of freedom.

- Calculates more accurate trajectories, especially at extreme ranges
- Can be used without wireless connectivity
- Pre-populated with long range match and hunting style bullets

Using Doppler radar, Hornady engineers measured exact drag versus velocity curves for each bullet in the 4DOF® database. Combined with the physical attributes of the projectiles, the 4DOF® calculator is simply more accurate for long-range hits than using BC-based systems or drag curves based on limited data collection points.

The Hornady® 4DOF® Ballistic Calculator is free to use and available at hornady.com/4dof, or download the app from the Apple or Android app stores.

KESTREL® 5700 BALLISTICS WEATHER METER WITH HORNADY® 4DOF®

The Kestrel with Hornady 4DOF is a comprehensive, weather-proof ballistics meter built for unprecedented accuracy and uncompromising performance even in harsh environments. Whether you're up in the mountains, down in the mud or competing in a match, count on the Kestrel to keep working alongside you despite any challenging outdoor conditions.

EXTREMELY RUGGED AND DURABLE

Kestrel meters are waterproof, dust proof and drop-tested to military standards.

EASY OPERATION FOR OUTDOOR USE

Large buttons make it easy to navigate screens and input information even with gloves on. The bright, clear backlit display is readable in direct sunlight or low light situations.

LONG-LASTING POWER

Powered by one AA lithium battery, expect hundreds of hours of use for a reliable tool that won't quit when you need it most.

For more information and to purchase, go to hornadykestrel.com

At Hornady®, we make great ammunition for almost every situation. Just take it out of the box, load it in your firearm and shoot. **So why would anyone want to load their own?**

There are almost as many answers as there are reloaders, but chief among them are economy, accuracy and personal satisfaction.

By reloading, you can significantly **reduce the cost** of your ammunition.

Not only can you shoot more, but you can also **shoot better**. Today's factory loads are designed to work well in a variety of firearms. Reloaders can tailor their ammunition to fit their rifle, handgun or shooting conditions, giving them an edge in accuracy.

Then there's the **sense of accomplishment** reloading brings. You can learn which bullet weights and powders get the best performance from your firearm. You can experiment with wildcat loads or loads for that vintage rifle.

By using the Hornady® Ballistic Calculator, you can compare performance from one cartridge to another for the best results.

THE *Science* OF RELOADING

What you'll need to get started:

- 1 **PRESS**
Begin with one of our dependable single-stage presses, or step up to the auto-indexing, five-station Lock-N-Load® AP™.
- 2 **SHELL HOLDER OR SHELL PLATE**
Choose precision-machined shell holders for our single-stage presses or smooth-functioning shell plates for the AP™.
- 3 **RELOADING DIES**
Hornady® Custom Grade™ and Match Grade™ reloading dies are guaranteed never to break or wear out from normal use.
- 4 **POWDER SCALE**
Hornady® offers everything from the basic Balance Beam Scale to more sophisticated electronic scales.
- 5 **POWDER MEASURE**
Dispense charges of .5 to 265 grains for small pistol cartridges to large magnums with Hornady® powder measures.
- 6 **RELOADING MANUAL**
The Hornady® Handbook of Cartridge Reloading is the ultimate resource for beginning and seasoned hand loaders. It is available in hardcover, mobile app, Kindle and Apple Books.
- 7 **COMPONENTS**
Cases, bullets, powder, primers.
- 8 **CALIPERS**
For measuring inside, outside, depth and step.

How Lock-N-Load® works:

THE HORNADY® LOCK-N-LOAD® SYSTEM IS AS EASY AS 1-2-3:

- ① Insert the Lock-N-Load® die bushing into the press and lock into place.
- ② Insert your die into the the Lock-N-Load® die bushing.
- ③ Adjust to the desired position and lock the setting in place with the Sure-Loc™ lock ring.

Any time you want to change calibers, the die can be removed with a counter-clockwise turn. Since the Lock-N-Load® bushing remains on the die, the die set remains exactly as you left it.

Cartridge Cases

The foundation of Hornady® ammunition

At Hornady®, brass is the foundation for what could be the most memorable shot of your lifetime. We produce our cases in smaller lots and take extra time and care to ensure they meet strict quality standards.

Our cases offer reloaders excellent uniformity in wall thickness and internal capacity. We measure for consistently tight wall concentricity and even run our cases through a pressure calibration test to ensure uniform case expansion during firing. Our cases allow proper seating of the bullet not only in the case but in the chamber as well. High-quality brass is a substantial contributor to consistent charges and pressures.

RELOADING

Reloading Manual and App

11TH EDITION HORNADY® HANDBOOK OF CARTRIDGE RELOADING

The 11th Edition Handbook of Cartridge Reloading includes the latest Hornady bullets, along with new cartridges, powders and more. It is filled with handloading techniques, bullet information and reloading data – it's a one-stop shop for support of Hornady component bullets.

New cartridges include the latest efficient and accurate Hornady developments like the 6mm ARC, match-winning 6mm Creedmoor and high-powered 6.5 PRC and 300 PRC.

FEATURING

- Over 1,000 pages of reloading data, techniques and bullet information.
- 200+ different calibers featuring a variety of loads using Hornady® bullets.
- An impressive lineup of new and expanded data that incorporates new powders, new bullets like the A-Tip® Match and new additions in the ELD-X®, ELD® Match, GMX®, FTX®, Sub-X® and more.
- New cartridge additions like the 6mm ARC, 6.5 PRC, 300 PRC, 224 Valkyrie, 350 Legend and 28 Nosler.
- Well over 1,500 load combinations were shot to update and expand the reloading pages in this edition.

No. 99241

HORNADY® RELOADING GUIDE APP

Derived from extensive testing by Hornady, this app includes reloading data for over 200 cartridges and 300 bullets. Under carefully controlled conditions using the components and test equipment specified, we report only data that has proved safe in our research. Users have the ability to purchase data for individual cartridges, purchase the whole current edition of the handbook, or subscribe and receive the entire handbook plus more. Subscription provides access to all handbook data on your mobile device and real updates for all new data without waiting for the new handbook publication to be produced.

Lock-N-Load® Iron Press®

The Lock-N-Load® Iron Press® is the most advanced single-stage press Hornady offers. Its rugged cast-iron frame makes it the heaviest, most rigid press in its class. Featuring superior strength with ambidextrous design, a patented shell holder platform, and the quick change Lock-N-Load® bushing system, the Iron Press® provides an efficient and enjoyable reloading experience for the both the novice and seasoned handloader.

Lock-N-Load® Iron Press® Loader with Manual Prime

No. 085520

Lock-N-Load® Iron Press® Auto Prime System Upgrade

No. 085570

RELOADING

LOCK-N-LOAD® IRON PRESS® FEATURES:

SUPERIOR STRENGTH WITH AMBIDEXTROUS DESIGN

Industry-leading strength comes from the 1-1/8" solid steel ram, and a heavy duty spring returns the press to a neutral position for ease of use. An interchangeable handle offers ambidextrous functionality.

PATENTED SHELL HOLDER PLATFORM

The Iron Press® loader, with its patented shell holder platform, allows handloaders to deprime, pause and remove the case to chamfer and deburr, etc., then easily replace and prime.

LOCK-N-LOAD® BUSHING SYSTEM

Incorporating our patented Lock-N-Load® bushing system, changeovers are lightning fast.

Lock-N-Load® Iron Press® Accessories:

POWDER MEASURE ATTACHMENT

This metal bracket attaches to the Iron Press® and holds your Powder Measure in place for convenient use.

**Powder Measure Attachment
No. 399694**

AUTOMATIC PRIMING SYSTEM

The gravity fed Automatic Priming System helps increase reloading efficiency by allowing more processes to happen simultaneously. Sold separately or with the Kit.

No. 085570

IRON PRESS® DIE CADDY

The optional die caddy provides storage for dies, as well as mounting points for cutting tools and component bins to hold bullets, cases, or loaded rounds.

**Iron Press® Die Caddy
No. 399683**

Lock-N-Load® Iron Press® Kit

Blurring the lines between single stage and progressive reloading, the Lock-N-Load® Iron Press® Kit is a full-featured reloading kit offering rugged reliability for years of precision reloading.

No. 085521

INCLUDES:

- Automatic Priming System
- Die Caddy
- Component Feed Bin & Bracket
- Lock-N-Load® Bench Scale
- Powder Measure
- Reloading Handbook

No. 399684**

Lock-N-Load® Classic™

Lock-N-Load® Classic™ Press

Includes Primer Catcher and three Lock-N-Load® Die Bushings. Dies, Shell Holders and Auto Primer Feed sold separately. **No. 085001**

FEATURES

- (A) LOCK-N-LOAD® QUICK CHANGE BUSHING SYSTEM**
Lock-N-Load® bushings not only let you switch from one die to another in a matter of seconds, they also offer the quickest and easiest die setup on the market. Just set the die and tighten the Sure-Loc™ ring on the Lock-N-Load® bushing. Quickly remove and re-install without the need to readjust the die or keep a separate seater die for each of your pet loads.
- (B) EASY GRIP HANDLE**
Large, ball-style grip reduces fatigue. The long handle increases leverage and reduces effort.
- (C) POWER-PAC LINKAGE AND SOLID STEEL ARMS**
Arms rotate on steel pins that run completely through the cast frame. The Power-Pac linkage design multiplies the leverage you apply to the handle, making it easier to size cases and reduces user fatigue.
- (D) STRONG ANGLED FRAME**
This high strength alloy frame offers the rigidity and stability needed for precision reloading, and is never going to break or fail. The frame's unique angle gives the reloader greater visibility and easier access to the cartridge in the press.
- (E) POSITIVE PRIMING SYSTEM™ (PPS)**
Once the spent primer ejects at the top of the stroke, you can add a new primer to the PPS and it self-aligns to feed and insert the primer at the bottom of the stroke where leverage is best. Our self-aligning primer arm also allows for easy manual inserting of primers without having to raise the handle. All the work is done at the bottom of the stroke. Works easier than ram prime units and much better than old style primer arms. Small and large punch included.
- (F) AUTOMATIC PRIMER FEED (OPTIONAL)**
Includes both large and small primer tubes. Use with our Positive Priming System™ and there's no more fumbling with primers — priming is 100% hands off. Sold separately. **No. 070905**

RELOADING

- 1 L-N-L® Impact Bullet Puller**
Remove bullets from cartridges without damaging the bullets. Hollow head of bullet puller captures bullet and powder for reuse. Three collet sizes allow for use with cartridges from .22 up to .45 caliber. Collets are stored inside the handle.
No. 050092

Loading Blocks
The universal size holds 50 cases and fits 223, 308 and magnum case size heads. The magnum size holds fifty 50 caliber cases or shotgun shells.
- 2 Magnum Loading Block**
No. 480042
- 3 Universal Loading Block**
No. 480040
- 4 One Shot® Case Lube**
One Shot® Case Lube with DynaGlide Plus® technology is a micro-penetrating high pressure dry film. It contains no petroleum, teflon or other synthetic silicone so it will not contaminate powder or primers.
5 oz. Aerosol No. 9991
10 oz. Aerosol No. 99913
- 5 Deluxe ID/DD Chamfer/Deburr Tool**
No. 050117
- 6 Powder Trickler**
Trickle the last few tenths of a grain of powder into a dropped and weighed charge for "0" variation.
No. 050100
- 7 G3-1500 Electronic Scale**
This compact, battery operated trickle-compatible scale offers a maximum reference measurement of 1500 grains. Features a precision load cell with 1/10th grain accuracy and constant readout up to 500 grains, offering the flexibility to trickle powder into the pan or weigh charges, bullets or cases directly.
No. 050104
- 8 Powder Funnel**
Anti-static funnel fits all calibers between 22 and 45. Squared rim design won't roll off the table.
No. 586051
17 Cal. Adapter No. 586055
- 9 Handheld Priming Tool**
One-piece primer tray with integral molded primer bushings eliminate the need for separate bushings. Ergonomic design reduces fatigue. Designed for easy changeovers, shell holders and primer trays can be changed without removing the spring and punch. Includes tray for RCBS® shell holders.
No. 0500021
- 10 Dial Caliper**
Stainless steel construction with shock-resistant dial is accurate to +/- 0.001". Measures inside, outside, depth and step. Slide may be locked in any position for precise measurements. Thumb wheel aids in easy opening and closing. Includes plastic storage case.
No. 050075 (inches)
- 11 Lock-N-Load® Straight O.A.L. Gauge**
See page 125.
No. C1000
- 12 Universal Shell Holders**
Wide mouth and rounded edge at the opening allow smoother case insertion. A single shell holder may be used for multiple calibers. (See chart on pages 162-169.)
- 13 3-Pack Die Bushings**
Save time with the Lock-N-Load® quick change bushing system.
No. 044093
- 14 Sure-Loc™ Lock Rings**
Make precise adjustments of all standard 7/8"-14 dies and accessories. Clamps around the whole die and won't damage the threads. See page 132 for more information.
No. 044606
- 15 Fast Load Powder Measure Stand**
Features a rigid frame and extra long arm that lets you fill an entire 50-count Universal Loading Block. The Lock-N-Load® bushing system accommodates any measure with 7/8"-14 thread.
No. 050008
- 16 Pistol Rotor & Standard Metering Insert**
This pistol rotor features a smaller chamber for more precise metering of charge weights between .5 and 17 gr.
No. 050128
- 17 Deluxe Die Wrench**
See page 132.
No. 396495

Lock-N-Load® AP™

Lock-N-Load® AP™

The Hornady® Lock-N-Load® AP™ press is a professional grade, auto indexing, 5-station progressive press that features the Lock-N-Load® bushing system, as well as a host of other features that make it more intuitive and better-equipped for all your reloading needs.

No. 095100

ALL YOU NEED ARE DIES AND SHELL PLATES TO START LOADING WITH YOUR AP™!

See pages 162-169.

QUICK CHANGE LOCK-N-LOAD® BUSHING SYSTEM

Lock-N-Load® AP™ has a 5-station quick change bushing system that allows quick and easy change overs from one caliber to another.

QUICK CHANGE METERING INSERTS

The Lock-N-Load® powder measure uses quick change metering inserts that allow you to switch from one powder to another with the push of a button. Add one to each die set for the ultimate in quick change overs.

SEE HOW IT WORKS
AT HORNADY.COM

RELIABLE EZ-JECT™ SYSTEM

Ensures reliable ejection of cartridges every time, without any adjustments.

UNIVERSAL CASE RETAINER SPRING

Allows quick and easy removal or insertion of cases at any point in the loading process.

PRIMING SYSTEM

Change from large to small primers in three easy steps:

1. Change the primer seater punch.
2. Change the primer shuttle.
3. Change the primer feed tube.

CASE ACTIVATED POWDER DROP

Dispenses a powder charge only when a cartridge case is present.

AUTOMATIC INDEXING

Each station moves half a stage on the down stroke and half on the up stroke, making for ultra smooth functioning. This process is much smoother than presses that do all their indexing on the down stroke.

LARGE CAPACITY CARTRIDGE CATCHER

A large capacity catcher comes standard with the Lock-N-Load® AP™ Press and is also sold separately. An extra large capacity catcher is available as an option.

No. 480038

Lock-N-Load® Ammo Plant™

Turn your progressive press into a bench-mounted ammo factory!

This kit represents the ultimate reloading setup for maximum production in shorter sessions.

INCLUDES:

- Lock-N-Load® AP™ Press
- Lock-N-Load® AP™ Pistol Bullet Feeder
- Lock-N-Load® AP™ Case Feeder
- Lock-N-Load® Powder Measure
- Lock-N-Load® Die Bushing 10 pack
- Cartridge Bins (x3)
- Large Primer Pickup Tubes (x3)
- Small Primer Pickup Tubes (x3)
- Primer Slide Spring (x2)
- Pistol Metering Insert and Rotor
- Rifle Metering Insert and Rotor
- Powder Cop
- Deluxe Die Wrench
- Case Activated Powder Drop
- Vintage Tin Sign
- Deluxe Spent Primer Catcher

No. 095160

Complete your reloading experience by choosing a caliber and these essential tools (sold separately):

- Die Sets
- Bullet Feeder Die
- Shell Plates
- Case Feeder Plates

See charts on pages 162-169 for listings.

Lock-N-Load® AP™ Accessories

RELOADING

The case-activated Rifle Bullet Feeder is also compatible with the Dillon model XL 650. See more at hornady.com

Rifle Bullet Feeder

Turn your progressive reloading press into a bench mounted ammo factory! Sold as a complete unit for 22 caliber bullets. We also offer a conversion kit for 30 caliber bullets, giving the reloader the versatility to load the two most popular calibers. Plus, it's compatible with other presses and uses the industry standard 7/8"-14 die threads (30 Cal. Conversion Kit sold separately).

Coupled with the Lock-N-Load® Case Feeder, you'll realize dramatic increases in efficiency and reloading speed — up to 50% faster (depending on experience and proficiency).

The Bullet Feeder Die is case activated; the bullet will only feed upon contact with the case. A single station is used to feed, seat, and crimp the bullet.

Rifle Bullet Feeder (22 Cal.) No. 095340

30 Cal. Conversion Kit No. 095345

Note: The Rifle Bullet Feeder System must be purchased separately from the Hornady® Pistol Bullet Feeder because the hopper systems and die bodies are not compatible. Cast lead bullets cannot be used in any Hornady® bullet feeders.

Pistol Bullet Feeder

The Lock-N-Load® Pistol Bullet Feeder is designed for the Lock-N-Load® AP™, but can be used with any other press using 7/8"-14 die threads, and requires an open station. Coupled with the Lock-N-Load® Case Feeder (sold separately), you'll realize dramatic increases in efficiency and reloading speed. (Up to 50% faster!)

Pistol Bullet Feeder does not work with lead or plated bullets.

The easy-feed bullet hopper holds up to 200 pistol bullets and features an adjustable center plate and bullet feed wipers to ensure smooth feeding.

No. 095320

Pistol Bullet Feeder Dies

(NEEDED FOR LOCK-N-LOAD® BULLET FEEDERS)

Bullet Feeder Dies are case activated – a bullet will only feed upon contact with a case. The collets are precision machined of solid steel for each caliber.

PISTOL	ITEM
380 Auto/9mm Luger	095330
38 Spl/357 Mag	095331
40 S&W/10mm Auto	095332
44 Spl/Mag	095333
45 Auto (.451/.452)	095334

Lock-N-Load® Case Feeder

With our high volume Lock-N-Load® Case Feeder, the Lock-N-Load® AP™ just got faster. It has the highest torque motor in the industry and an extra large case bowl that makes it possible to load over 500 rounds of high quality ammunition per hour, depending on experience and proficiency. The Lock-N-Load® Case Feeder comes complete with everything you need except the case feeder plates, which are sold separately. (See charts on pages 162-169.) **No. 095300**

ADAPTS TO YOUR LOCK-N-LOAD® AP™ PRESS

The Case Feeder bolts to Lock-N-Load® AP™ presses with serial number 7000 and higher. For serial numbers below 7000, we offer a sub-plate conversion kit.

*For details, give us a call at 1-800-338-3220.
(Not compatible with the Projector™ press.)*

CHANGE OVERS ARE EASY

Changing the Lock-N-Load® Case Feeder from one cartridge to another is quick and simple. Change overs typically take about 5 minutes.

FEEDS EVERY CARTRIDGE

If Hornady® makes a standard shell plate for it, the cartridge will also feed through the hopper.

FAIL-SAFE CASE SLIDE MECHANISM

Slotted cam wire fixture prevents damage from misfed cases or incorrectly adjusted shuttle.

CARTRIDGE ADAPTORS INCLUDED

The Case Feeder comes with six cartridge adaptors to ensure proper feeding of your cases into the shell plate. The instructions include a V-Block usage chart so there's no guessing about which adaptor to use.

Case Feeder Plates

Sold separately.

See charts on pages 162-169.

Lock-N-Load® AP™ Accessories

Powder Through™ Expanders

Powder Through™ Expanders (PTX™) are designed to work in conjunction with the Case Activated Powder Drop. These Expanders eliminate the need for a separate case mouth expander die on the Lock-N-Load® AP™ press, freeing up an extra station for a taper crimp die or powder cop. The Expanders work for lead, plated and jacketed bullets.

Caliber	Bullet Dia.	PTX™ Item No.
308	.308"	290050
9mm	.355-.356"	290030
357	.357-.359"	290031
10mm	.400-.401"	290032
44	.429-.430"	290033
45 Auto	.451-.452"	290034
45 Colt	.452-.454"	290036
475	.475-.476"	290037
50	.500-.501"	290038

PTX™ Powder Measure Stop

This component is an add-on to your Case Activated Powder Drop that allows the reloader to adjust the flare on cases utilizing the top and bottom adjustment screws.

No. 290049

(Comes standard with new AP™ presses and Case Activated Powder Drop)

Hornady® Powder Cop

Install on your progressive press after the powder drop station to automatically check dropped charges. Checking powder charges on your progressive press can be difficult, and is sometimes ignored, even though it's a smart practice. Hornady® uses a similar device on our own ammo manufacturing presses. It won't replace careful attention, but helps monitor the reloading process. Works with 22 cal and larger cartridges.

No. 050063

Over Charge

Correct

Under Charge

Quick Change Powder Die

Designed specifically for use with the Case Activated Powder Drop (#050073), this accessory makes changing over your Lock-N-Load® AP™ faster and easier than ever! Includes lower bracket with guide bushing and lock ring. Our Powder Through™ Expanders (left) are compatible with the Quick Change Powder Die.

No. 050074

Case Activated Powder Drop

Engineered with quick change-overs in mind, the case activated powder drop only dispenses a powder charge when a case is present. Designed for the Lock-N-Load® AP™ but will work in any progressive press that uses 7/8"-14 threads.

Not compatible with Blackpowder Measure.

No. 050073

**.17 cal. Powder Sleeve (sold separately)
No. 392703**

Lock-N-Load® AP™ Primer Pocket Swage Tool

Quickly and cleanly removes crimps on cartridge case primer pockets. Designed to be used on the Lock-N-Load® AP™ press, the Primer Pocket Swage Tool comes with shell plate and dies for feed, swage, and eject to make your job easier.

Swage depth can be adjusted to accommodate various case brands. Swaging out the crimps on primer pockets instead of cutting them eliminates trimmings and mess.

**223/5.56 No. 041217
308/7.62x51 No. 041218**

Powder Funnel Die

For ultra precision on the AP™ press, this die allows handloaders to trickle and weigh each individual powder charge. Includes two insert bushings that accommodate cases from .22 to .50 caliber.

No. 095360

Lock-N-Load® AP™ Tool Caddy

Improve efficiency and convenience by storing frequently used tools directly on your AP™ press. Install the bracket and caddy on either side of the press and rotate to the desired position. Then, insert supplied tools, including three combination wrenches, four hex wrenches, needle nose pliers, and a Hornady® Deluxe Die Wrench, for quick access and efficient organization.

No. 095140

Universal Accessory Bin and Bracket

The swiveling base of this cartridge bin bracket allows for adaptability on the Lock-N-Load® AP™ and Classic™ Presses. Use it to conveniently store finished rounds.

No. 399692

Shell Plates

The subtle radius of each shell holder mouth ensures smooth and reliable functioning. The retainer spring is designed to stay in place when inserting cases into the shell plate. To determine the shell plate required for your application, please refer to the chart on pages 162-169. A single shell plate may be used for multiple calibers.

SEE SIZING CHART ON PAGES 162-169.

(Custom plates are also available.)

Lock-N-Load® Die and Conversion Bushings

Simply thread a Hornady® Lock-N-Load® Conversion Kit into your RCBS® Rock Chucker or other reloading press using a 1¼"-12 thread, and you're ready to start using the Lock-N-Load® System. It's the easiest way to get the most out of your reloading press. These bushings let you take advantage of Hornady's® Lock-N-Load® technology even if you own a competitor's reloading press. The Lock-N-Load® Conversion Kit includes three Lock-N-Load® bushings and one conversion bushing.

Reloading Kits

RELOADING

Lock-N-Load® Classic™ Kit

Perfect for the reloading novice, this kit offers everything you need to get started. (Reloading dies and shell holders sold separately.)

No. 085003

INCLUDES:

- Lock-N-Load® Classic™ single stage press
- Lock-N-Load® Powder Measure
- Digital Scale
- Three Lock-N-Load® Die Bushings
- Primer Catcher
- Positive Priming™ System
- Handheld Priming Tool
- Universal Reloading Block
- Chamfering and Deburring Tool
- Powder Trickler and Funnel
- One Shot® Case Lube
- Hornady® Handbook of Cartridge Reloading

Lock-N-Load® Classic™ Kit Deluxe

In addition to everything you receive in the Classic™ Kit, the Deluxe Classic™ Kit includes shell holders in the most popular sizes, bushings and Sure-Loc™ rings, as well as some other handy tools.

No. 085010

INCLUDES:

- Lock-N-Load® Classic™ Kit contents
- Sure-Loc™ Lock Ring 6 Pack
- Powder Measure Stand
- Shellholders 1,2,5,16,35
- Kinetic Bullet Puller
- Lock-N-Load® OAL Gauge (Straight)
- Vintage Tin Sign
- Pistol Rotor & Metering Assembly
- Steel Dial Caliper

Lock-N-Load® Precision Reloaders Kit

Designed to help you produce the most accurate reloads possible, the Lock-N-Load® Precision Reloaders Kit includes tools and gauges that allow the user to fine-tune the reloading process. This time and money-saving kit helps precision reloaders check for bullet runout, head spacing and overall consistency of round-to-round production.

No. 095150

INCLUDES:

- Concentricity Tool
- Cam Lock™ Trimmer
- Cam Lock™ Power Adapter
- Lock-N-Load® OAL Gauge Curved
- Lock-N-Load® Case Prep Trio
- Steel Dial Caliper
- Lock-N-Load® Comparator Set
- Lock-N-Load® Comparator Headspace Kit

Lock-N-Load® 50 Cal BMG

Reload your own 50 BMG rounds with accuracy and precision. This single stage press features our exclusive Lock-N-Load® technology in the ram, which means you can change your shell holder over to ram-prime, then move the shell holder to the top plate. Once the holder and ram-prime are set, they stay that way. A quick change to a Lock-N-Load® bushing makes switching over from ram-prime to die use faster, too.

No. 085004

- 50 Cal. BMG Powder Measure . . . No. 050127**
- High Capacity Metering Kit . . . No. 050126**
- Primer Seating Gauge No. 050150**

- Conversion Bushing No. 392301**

50 Caliber BMG Press Kit

Includes the Hornady® 50 BMG reloading press, a complete set of Hornady® 50 BMG reloading dies, and a 50 BMG shell holder. It also comes with a 1½"x12 bushing to convert the die head to our Lock-N-Load® system which will hold any standard 7/8"-14 die.

No. 085005

Powder Measures & Accessories

Hornady® Lock-N-Load® Powder Measure

The pioneering design of the quick change Lock-N-Load® Powder Measure has been copied by others but never replicated. Offering the most flexible operation and widest range of use, the Lock-N-Load® Powder Measure can handle charges of .5 to 265 grains of powder when paired with the appropriate insert and rotor. Metering inserts can be changed with the push of a button, giving handloaders the ability to load everything from small pistol cartridges to large magnums without having to purchase multiple powder measures. Includes rifle rotor and metering insert. Pistol rotor and inserts sold separately.

No. 050069

FEATURES

LARGEST CHARGE RANGE IN THE INDUSTRY

By simply changing rotor and inserts, you can use one Lock-N-Load® Powder Measure to load powders and charges from .5 grain to 265 grains.

PUSH-BUTTON RELEASE FUNCTION

To change metering inserts, simply push the release button and change over to another metering insert. Verify the new charge and you're reloading again right away. Inserts can be swapped in seconds. Go from reloading 30-06 to 45 Auto in no time. Keep the preset inserts with your die sets.

PRECISION TOLERANCE

With only .002" clearance between the drum and rotor, it's the tightest in the industry for a standard measure. This tight tolerance helps eliminate powder binding between the frame and drum, delivering smooth function with all types of propellant – extruded or ball.

MULTIPLE MOUNTING METHODS

Mount to your bench using a standard mounting bracket and lock ring, or use our Lock-N-Load® bushings to mount this versatile measure on the Fast Load Powder Measure Stand (featured on page 103).

ADJUSTABLE TENSION

The O-ring on the metering insert adjustment lets you put a slight amount of tension on the metering unit to make fine, incremental adjustments. Once you've set your charge, tighten the lock ring to secure the setting.

SMALL AND LARGE DROP TUBES

These tubes speed up powder flow. Two drop tubes are included for .204 to 45 calibers. Use the largest drop tube that fits the case mouth. Optional 17 caliber drop tube sold separately. **No. 390709**

RELOADING

Pistol Rotor and Standard Pistol Metering Insert

For use in your Lock-N-Load® Powder Measure, this pistol rotor features a smaller chamber for more precise metering of charge weights between .5 and 17 gr.

No. 050114

High Capacity Metering Kit

The kit's two metering units have capacities of 80 to 180 grains and 165 to 265 grains of powder, and come with the clear drop tube and large hopper tube. The clear drop tube visually ensures a complete powder drop and the extended hopper tube allows you to reload more rounds between refills of powder. Fits Hornady® Lock-N-Load® Powder Measure.

No. 050126

Lock-N-Load® Bench Rest Grade Powder Measure

You'll receive all the advantages of Lock-N-Load® technology with the added benefit of more precise measuring. That precision comes from a specially designed chrome-plated metering insert and a smaller metering chamber to promote more consistent and uniform filling.

The micrometer adjustment gives positive reference for metering adjustments and you can install pre-set metering units by simply pushing the button on the outside of the metering chamber. Measurements adjust from 20 to 65 grains. All moving parts have been plated for protection and long life, and the rotor requires NO lubrication.

No. 050130

Scales & Accessories

Hornady® Precision Lab Scale

When precision is your goal, you need the most precise tool available for measuring on your reloading bench. The Hornady® Precision Lab Scale provides a .01 grain readout. The Hornady® Precision Lab Scale brings science to reloading — the science of success to your reloading bench.

No. 050118

FEATURES

- Bubble level/leveling feet
- Steel scale tray
- Large windscreen with doors
- Cast aluminum base
- 3000 grain capacity
- Print to spreadsheet function
- Compare, percent and count modes

Lock-N-Load® Balance Beam Scale

The Hornady® Balance Beam Scale is an essential tool for any well-stocked reloading bench. Its classic, time-proven balance system provides a measurement range from 0 to 500 grains with 0.1 grain sensitivity, and will easily handle most reloading tasks. A magnetic dampener provides fast, accurate measurements. The balance bar is laser etched, easy to read, and will not flake or peel. Made in the USA.

No. 050109

M2 Digital Bench Scale

Made from the same high quality, precision load cell found on the Lock-N-Load® Auto Charge®, the high performance Lock-N-Load® Bench Scale is the perfect addition to your reloading bench. With a capacity of 1500 grains, you can weigh powder, bullets, cases, cartridges and more. The large LCD display is easy to read and weighs precisely to a tenth (0.1) of a grain. Included are two calibration weights, AC adaptor, 220V adaptor, and metal powder pan.

(Non-hazardous)**

M-1 Case Tumbler

Add to the quality of your reloaded ammunition by using the M-1 Case Tumbler to clean and polish large quantities of cases quickly and efficiently. Coupled with Hornady® Tumbling Media, the cyclonic and vibratory action of the Tumbler cleans brass to a brilliant shine. Use the included sifter to separate the polished brass from the media. Running time may be varied based on the condition of the cases and degree of cleanliness desired. Holds up to (400) 38 Spl cases, (180) 30-06 Sprg cases, or the equivalent of other like-sized cases.

No. 050202

Digital Cases & Parts Dryer

Dry hundreds of cartridge cases as well as small and large gun parts at the same time with the revolutionary Digital Cases & Parts Dryer. Four fixed trays hold cases and small parts while a fifth, adjustable tray holds larger gun parts. The unit's tall lid makes accommodating larger parts even easier.

The dryer's innovative top-mounted digital powerhead ensures that cases and parts dry thoroughly and efficiently.

- Digitally adjust drying time from 15 minutes to two hours
- Choose from seven temperature levels with digital selector
- Unit disassembles for easy cleaning

No. 053311

Magnum Digital Vibratory Tumbler

Clean and polish large quantities of brass to a brilliant finish before loading, eliminating abrasive foreign particles that can scratch the inside of your dies. Brass cases cleaned with vibratory action enhances the smooth function of reloading presses and dies, and makes finished reloads look like new.

- Large drum holds up to (600) 38 Spl cases, (250) 30-06 Sprg cases or equivalent.
- Digital timer allows tumbling for up to eight hours.

No. 050240

Place the included sifter over a 5-gallon bucket (not included) to separate clean brass from media.

Tumbler bowl is notched for easy sifting and cleanup.

Sonic Cleaners & Accessories

Hornady® Hot Tub™ Sonic Cleaner

Featuring a 9 liter capacity, the Hot Tub™ is long enough to accommodate and clean a 16 inch AR-15 upper. In addition to having 4 transducers, there are heating elements that enhances cleaning action, which is especially useful when cleaning gun parts. Combined with One Shot® Sonic Clean™ solution, its microjet action removes carbon residue and other debris from cartridge cases, gun parts and other metal equipment.

- Cleans internal and external surfaces of cartridge cases and primer pockets.
- Includes one inner tank for cleaning multiple smaller batches or to use separate solutions at the same time.
- Hanging cords allow large objects to take full advantage of the ultrasonic energy.
- Includes small parts basket.
- De-gas function.
- 5 temperature settings from 100-140°F.

Hot Tub™ main tank dimensions:
25.5" x 7.0" x 4" (9 Liters/2.3 Gallons)

Internal divider tank dimensions:
6.7" x 4.7" x 3.2" (1.6 Liters/1.7 Quarts)

No. 043310

Lock-N-Load® Sonic Cleaner™ 2L

Features an 80 watt ceramic heater that enhances cleaning action, which is especially helpful when cleaning gun parts. Its large 2 liter stainless steel tank holds up to three hundred 223 cases or one hundred fifty 308 cases. Combined with One Shot® Sonic Clean™ solution, its microjet action removes carbon residue and other debris from internal and external surfaces of cartridge cases, small gun parts and other small metal equipment. The cleaner's 5 to 30 minute timer allows you to choose the appropriate cycle for your application.

Tank dimensions: 7.25" x 6" x 3" (2L)

No. 043320

One Shot® Cartridge Cleaning Solution

Non-toxic and uniquely formulated to clean brass cases. Quickly removes most tarnish, oxidation and carbon buildup. Designed specifically for the Hornady® Lock-N-Load® Sonic Cleaners.™

32 fl oz. No. 043355

1 Gallon No. 043356

One Shot® Sonic Clean™ Gun Parts Formula

Cleans all gun parts and is safe for all firearms finishes. Quickly removes carbon, dirt, grease and powder residue. Designed specifically for the Hornady® Lock-N-Load® Sonic Cleaners.™

32 fl oz. No. 043360

**For best results,

Primer Pocket Reamer

Primer Pocket Reamer Package makes cases with crimped primer pockets reloadable by cutting away the crimp. Complete with handle, large and small cutter heads. Heads also fit on Power Case Prep Center and Case Prep Trio. (See page 123.)

No. 041210

(Extra reamer heads sold separately.)

Lg. Head **No. 390751**
Sm. Head **No. 390750**

Pilot Style Flash Hole Deburr Tool

Designed to deburr and uniform flash holes in cartridge cases quickly and easily, this tool uses floating pilots to guide the cutter directly toward the flash hole of the case, resulting in a clean and uniform hole every time.

No. 399693

Universal Shell Holders

Precision machined from solid steel and heat-treated to perform flawlessly. Wide mouth and rounded edge at the opening allow smoother case insertion. A single shell holder may be used for multiple calibers. (See charts on pages 162-169.)

4 Blade Outside Diameter Deburring Tool

Fits on Universal Handle, Power Case Prep Center, or Case Prep Trio. (See page 123.)

No. 050173

50 Cal. Deburr Tool No. 050153

6 Blade Inside Diameter Chamfer Tool

Fits on Universal Handle, Power Case Prep Center, or Case Prep Trio. (See page 123.)

3 Case Prep Duo

Make quick work of various reloading chores with this cordless, rechargeable multifunction tool that accommodates case neck brushes, primer pocket cleaners, and chamfer/deburr accessories. With the easy to swivel body and integrated rubber feet, use it in the straight configuration on your bench top, or rotate it 180 degrees for an ergonomic handheld power tool. Use with the 8-32 spindle head for various reloading functions or remove the spindle head and use as a powered screwdriver with standard 1/4-inch hex bits (not included).

Comes with plug-in charger, ID and OD chamfer tools.

No. 050180

4 Go/No-Go Cartridge Gauge

Hornady Cartridge Gauges allow the user to check their cases and ammo to ensure a correct fit in SAAMI chambers. Available calibers:

5 Unique™ Case Lube

For those who want to use a high quality paste lube, this non-petroleum product will not contaminate powder or primers.

No. 393299

6 One Shot® Case Sizing Wax

Simply dab on your index finger and thumb, then apply to cartridge case before sizing.

No. 9989

7 Premium Powder Funnel Kit

High-capacity, non-static aluminum funnel stores nicely in form-fitted storage case. Nine caliber-specific bushings allow funnel to fit a variety of case sizes: .224, .243/6mm, .257, .264/6.5mm, .277/6.8mm, .284/7mm, .308, .338, .375.

No. 586059

8 Vernier Ball Micrometer

With a ball anvil and chamfered spindle, the Vernier Ball Micrometer is ideal for accurately measuring case neck thickness within an accuracy of 0.0001". Ratchet stop ensures uniform pressure for measurement repeatability.

No 050059

9 Standard Micrometer

This versatile instrument accurately measures in 0.0001" increments for precise readings on bullets or objects up to 1 inch in size. Spindle lock preserves measurement when removing micrometer from work piece.

No. 050072

10 Dial Caliper

Stainless steel construction with shock-resistant dial is accurate to +/- 0.001". Four-way measurement capability: inside, outside, depth and step. Slide may be locked in any position for precise measurements. Thumb wheel aids in easy opening and closing. Includes plastic storage case.

No. 050075 (inches)

11 Digital Caliper

Precisely measure case length, inside and outside case diameter, bullet length, primer pocket depth and overall cartridge length. Features quick repeat and measuring speed, an extra large LCD screen and accuracy to .001." Battery and protective storage case included.

No. 050080 (inches/metric)

12 Stuck Case Remover

Easily remove stuck cases from dies by drilling and tapping the stuck case. Consists of #7 drill bit and 1/4 inch-20 tap.

No. 050033

13 Neck Wall Thickness Gauge

This accessory to the Concentricity Tool offers the next step in ultra-precision reloading. Its .0005" increment dial indicator helps identify neck thickness variations so you can sort and measure case necks or verify your neck turning operation – ultimately enhancing accuracy. (Concentricity Tool not included.)

No. 041223

14 Lock-N-Load® Concentricity Tool

This tool identifies and eliminates bullet runout (or wobble). Just place ammunition in the tool, roll it, identify runout and use the dial indicator thumbscrew to adjust. Provides improved accuracy for handloaders, and can be used to true up factory ammo too.

No. 050076

15 Single Stage Primer Pocket Swage Tool

Quickly removes crimps on cartridge case primer pockets. Swage depth can be adjusted to accommodate various case brands. Swaging out the crimps on primer pockets instead of cutting them eliminates trimmings and mess.

223/5.56 ONLY No. 041227
308/7.62X51 ONLY No. 041228

16 Quick Change Hand Tool

Features a dual-sided chuck that allows for the quick changeover of popular case preparation tools. Includes 3 dual-sided chucks, chamfer/deburr tools, large and small primer pocket cleaners and neck brushes for the following calibers: 22 cal, 25 cal/6mm, 270 cal/7mm, 30 cal, 35 cal/9mm and 45 cal.

No. 050097

Case Prep Tools

Neck Turn Tool

The Hornady® Neck Turn Tool saves handloaders time and effort at the workbench.

Designed for use on a wide variety of case lengths, the Hornady® Neck Turn tool allows for the use of a drill (not included) to make neck turning faster and easier, while providing superior consistency and surface finish.

An adjustment knob enables the user to choose detents for .0005" adjustment increments, or no detents for infinite adjustment. Use only standard Hornady® shell holders. The mandrels for four popular calibers are included: 22 Cal., 6mm, 6.5mm & 30 Cal. Two cutters are also included: 30° and 40° shoulder angles.

The Hornady® Neck Turn tool is a winning solution for precision handloaders who want to maximize accuracy. **No. 041224**

Cam Lock™ Trimmer

Thanks to the unique way the case is locked in place in the shell holder, this trimmer accurately restores fired cases to the correct length no matter the thickness of the cartridge rim. The lever locks the case in place. The Micro Adjust cutter allows .001" changes without moving the case (extra cost on competitor trimmers). Plus, its large diameter, replaceable cutting head is made of ultra-hard tool steel and trims cases up to 50 caliber. Use only standard Hornady® shell holders and pilots. Includes ten of the most popular pilot sizes: 22 cal, 6mm, 25 cal, 6.5mm, 270 cal, 7mm, 30 cal, 35 cal, 38 cal, and 45 cal.

Choose your shell holder and trimmer pilots from the charts on pages 162-169.

Universal Trim Length Gauge

Use this tool to set the case overall length on the Case Prep Center. May be used with 12 popular calibers from the 6mm ARC to the 300 Win Mag, both fired and resized cartridge cases.

No. 050146

Lock-N-Load® Power Case Prep Center

The Lock-N-Load® Power Case Prep Center saves reloaders time and bench space by rolling all the necessary case prep functions into one unit. Its all-in-one versatility combines a power trimmer with chamfer/deburr tools, large and small primer pocket cleaners, six popular neck brush sizes (22 cal, 6mm/25 cal/6.5mm, 270 cal/7mm, 30 cal, 35 cal and 45 cal) and pilots in same calibers. Also includes shell holders 1, 2, 5, 16 and 35.

FEATURES

- The trimmer is micro adjustable to .001" for precise and consistent trimming.
- Rugged housing and a powerful motor will give years of dependable service.
- Trims small to large cases measuring ¾" to 3¼" in length.
- Innovative design keeps metal shavings in the catch trays and out of the cases.
- Easy grip handle offers leverage.
- Arrange the chamfer/deburr tools, primer pocket cleaners and neck brushes however you want on the front panel.

Use with Hornady® shell holders and trimmer pilots only (sold separately).

Optional flash hole deburr tool, primer pocket reamer, primer pocket uniformer and additional neck brushes can be purchased separately.

No. 050012

Lock-N-Load® Case Prep Trio

Speed up your case prep process with the 3-tool capacity and utilize the onboard storage for optional accessories like our primer pocket cleaners, primer pocket reamers, case neck brushes and any other 8-32 thread tools. With three active stations, you can chamfer, deburr and clean primer pockets without having to change tools. The Lock-N-Load® Case Prep Trio comes with both inside and outside chamfer and deburr tools. Made in the U.S.A.

Lock-N-Load® Precision Gauges

Lock-N-Load® Headspace Comparator

The Lock-N-Load® Headspace Comparator extends brass life, improves accuracy, and enhances safety. The gauge measures variations in brass before and after firing or re-sizing. It allows for headspace comparison between fire-formed brass and re-sized brass.

The five bushings that come with the Lock-N-Load® Headspace Comparator provide the ability to check most bottleneck cases, from .17 Rem through belted magnums. Ackley Improved chambers use the same bushing size as the parent case. See chart provided or consult product instructions for cartridge/bushing size details.

Determining the proper bushing diameter: If you add the neck diameter and the shoulder diameter and divide that number by two, use the bushing closest to that number.

Body with 5 Bushing Set
No. HK66

5 Bushings Only
No. HK55

Lock-N-Load® 17-22 Rim Thickness Gauge

Sorting ammo by rim thickness will provide ammo with similar ignition qualities for improved accuracy. This proven technique is used by competitive shooters and varmint hunters. The rimfire gauge attaches to your caliper and includes bushings for use with most .17 and .22 caliber rimfire ammo. (Not compatible with 17 WSM.)

No. RF17

Anvil Base Kit

The anvil attaches to the opposite blade of your caliper when utilizing the Hornady® Lock-N-Load® Headspace Comparator, supplying a large surface area for case heads and bullets to rest, making ogive and headspace measurements easier to obtain.

No. AB1

Lock-N-Load® Bullet Comparator

Measuring cartridge lengths across the bullet tips is not a reliable (or repeatable) method for measuring loaded rounds. It's common for variations of up to .025" to exist from one round to the next. Our Bullet Comparator measures rounds from the ogive to provide consistent, precise measurements. You can also use it to check uniformity of bullets from base to ogive.

Our Bullet Comparator easily attaches to the blade of your caliper and uses interchangeable inserts (available in sizes from .17 caliber to .45 caliber) to measure from the bullet ogive.

Used in conjunction with the O.A.L. Gauge, the Bullet Comparator provides the ultimate in precision measurement. The Bullet Comparator will properly align the O.A.L. Gauge for precise measurement using a caliper. This method allows direct comparison of your loads as you set up your bullet seating die for any selected bullet free-travel (jump).

Bullet Comparator – Basic Set **No. B234**

Comparator body and 7 bullet inserts for bullet diameters: .224" (5.56mm), .243" (6mm), .257", .264" (6.5mm), .277", .284" (7mm), .308" (7.62 & 8mm)

Bullet Comparator – Complete Set **No. B14**

Lock-N-Load® O.A.L. Gauges

Straight Model – For bolt-action and single-shot firearms, or any firearm with straight-line access to the chamber. This model is preferred, as it is most precise and user friendly.

No. C1000

Curved Model – For autoloader, lever-action, or pump-action rifles. Also fits all bolt-action and single-shot firearms. Inserts into chamber through ejection port.

Not compatible with Adapter "D" or short-bodied cases. (See chart below)

No. C1550

ACHIEVE PRECISE BULLET SEATING DEPTH.

Regulating seating depth and the resulting "jump" to the rifling is widely regarded as fundamental to improved accuracy. A few thousandths of an inch change between the bullet and the rifling can make the difference between average accuracy and real tack-driver performance. The Lock-N-Load® O.A.L. Gauge is universally acclaimed as the most accurate, easy-to-use and reliable method of obtaining that critical relationship.

To use the Lock-N-Load® O.A.L. Gauge, you will need a Modified Case (sold separately) to fit your firearm's chamber and thread it onto the gauge. These specially prepared modified cases are threaded at the case-head and have a .002" oversized neck to accept the same bullets you intend to load. This is critical, as the Lock-N-Load® O.A.L. Gauge dimensions obtained will be accurate to .001". These results cannot be attained with competitive products, which use a simulated bullet with an arbitrary shape.

Lock-N-Load® Modified Cases

Lock-N-Load® Modified Cases are readily available to fit most popular rifle chambers. All are manufactured to SAAMI specs.

Modified Case and Adapter D for 22 Hornet No. D1202

CUSTOM CASE MODIFICATION

Any of your brass, including all wildcat sizes, can be custom modified at our factory for use with either gauge. Simply send us two fired cases by mail for quick turnaround (visit our website for details).

Custom Grade™ Dies

What makes Hornady® dies better?

Hornady® reloading dies represent the finest in machined craftsmanship. Precise machining allows accurate reloading by offering easier adjustments, better alignment and smooth functioning. With one of the finest internal finishes in the industry, Hornady® Custom Grade and Match Grade Dies provide a lifetime of reloading. They're so well crafted that they will never break or wear out from normal use.

RELOADING

FULL-LENGTH SIZING DIE

STANDARD SEATING DIE

- 1 ZIP SPINDLE™ DESIGN**
A feature on all full length size dies, the Zip Spindle™ positively locks to eliminate slippage. A series of light threads cut on both the spindle and spindle collet allows incremental adjustments by turning the spindle or it can easily “zip” up or down for larger movements.
- 2 SMOOTH FINISH**
Internal die profile is precision machined and polished to a smooth finish for reliable functioning without case sticking or excessive friction. Most of our pistol dies feature a titanium nitride “gold ring” finish that’s harder than carbide and doesn’t require lubrication. The super hard coating is perfect for resizing soft pistol brass and won’t scratch cases.

- 3 LOCK RINGS WITH WRENCH FLATS**
The Hornady Sure-Loc™ lock rings clamp around the entire die applying constant pressure to hold the ring in place. The locking screw tightens the ring without coming into contact with the threads, eliminating possible damage from pliers.
- 4 ELLIPTICAL EXPANDER**
Superior to “ball expanders,” this Hornady® exclusive provides extremely smooth neck sizing and significantly reduces friction and case neck stretch. Internal threading prevents it from pulling loose and the elliptical expander eliminates the need for a separate expander die for necking-up to the next caliber.

- 5 SEATER ADJUSTMENT SCREW**
Seater adjustment screw easily adjusts for bullet seating depths.
- 6 COMPRESSION LOCK**
This o-ring provides the necessary tension to make fine adjustments easier, and keep the die set in place.
- 7 RETAINER RING**
Locking retainer ring removes in seconds for easy disassembly and cleaning of the die.

TAPER CRIMP/SEATING DIE

8 IN-LINE BULLET SEATING SYSTEM

Our seating system holds the bullet, the case neck and the seating stem in perfect alignment in the sleeve BEFORE the bullet enters the neck of the case. The system includes a floating bullet alignment sleeve, a floating steel seating stem and a built-in crimping mechanism for benchrest precision. Bullets are aligned in the sleeve as they enter the die for optimum seating and enhanced accuracy.

9 BUILT-IN CRIMPER

The built-in crimping mechanism allows roll crimping without the need for an extra crimp die, saving a station on your press.

STANDARD EXPANDING DIE

The replaceable decap pin (No. 390222) is unique to Hornady® Dies.

10 TAPER CRIMP/SEATING DIE

The intuitive design of this die allows seating and taper crimping to be completed in one step, eliminating the need for a separate taper crimp die. Available in 9MM, 40 S&W & 45 Auto.

11 TAPER CRIMP ADJUST SCREW

Easily adjusts amount of crimp on the cartridge without changing bullet seating depth or loosening the lock ring.

12 EXPANDER DIES

These dies put a consistent slight "bell" or flare on straight-walled rifle or pistol case mouths. They prepare the case so powder and bullet insertion are smoother.

STRAIGHT WALL SIZING DIE

13 STRAIGHT WALL SIZING DIES

Most of our straight wall sizing dies feature a titanium coated sizing ring (gold ring). This eliminates case sticking and requires no lubrication. The super hard, smooth coating is used in high-pressure, high-wear tools to reduce abrasion, so it's perfect for resizing relatively soft pistol brass, and won't scratch your cases. Less friction means less wear on cases for longer case life. Spindle locks in place with collet lock for positive decap and easy adjustment.

For a full list of available dies, see the charts on pages 162-169.

Match Grade™ Dies

RELOADING

FULL-LENGTH SIZING DIE

SEATING DIE WITH MICROJUST SEATING MICROMETER

- ① **SELF-CENTERING SPINDLE**
Free-floating spindle design ensures precise, concentric neck expansion.
- ② **KNURLED SPINDLE LOCK**
Provides easy adjustment of decapping features.
- ③ **SPINDLE ADJUST WITH O-RING**
Provides slight tension for fine adjustments, and holds setting once in place.
- ④ **BUSHING (SOLD SEPARATELY)**
Available in .001" increments, these bushings fully eliminate neck resizing problems. Tight tolerances here translate into tighter groups.
- ⑤ **REPLACEABLE HEADED DECAP PIN**
The replaceable decap pin (No. 390222) is unique to Hornady® Dies.
- ⑥ **ELLIPTICAL EXPANDER**
Our Match Grade™ Dies ship with both an elliptical expander and a replaceable decap pin retainer, allowing more versatility for user preference.
- ⑦ **MICRO-JUST SEATING MICROMETER**
Measures .001" adjustments for bullet seating depths.
- ⑧ **IN-LINE BULLET SEATING SYSTEM**
Floating seating stem holds bullet in alignment before the bullet enters the neck of the case.

The replaceable decap pin (No. 390222) is unique to Hornady® Dies.

Hornady® Match Grade™ Dies give you total control over neck tension when resizing. These dies feature the ability to use interchangeable, self-centering neck size bushings that eliminate the chance of over sizing your case necks and overworking the brass.* Tight tolerances at the press translate into tighter groups at the range. See below for a listing of available dies and bushings.

*Bushings sold separately.

Hydraulic Form Die Kit

Our Hydraulic Form Die Kit is designed to expand a standard case into an improved case design without having to fireform cases. Saves time, bullets, powder, primers and barrel wear.

Manufactured to the customer's specifications.

Custom Dies

Hornady® Manufacturing offers the advantage of making custom dies to your specifications. These custom-manufactured dies are available in either our Custom Grade™ or Match Grade™ die configuration, and can be made to load any cartridge.

Our custom-manufactured dies are made on precision CNC machines that produce extremely tight tolerances. They are designed from your chamber reamer drawing and/or three fired or parent cases, assuring a die that is a true match to your chamber.

Each custom-manufactured die is hand-crafted and polished for an unmatched finish. Elliptical expanders, shell holders, shell plates, trimmer pilots, bullet seating stems and alignment sleeves can be made to fit any bullet of any profile, lead or jacketed.

These precision dies give the handloader more control over the loading process. Increase your handloaded ammunition's accuracy on the bench or in the field with Hornady® custom-manufactured dies. Call 800-338-3220.

WHAT YOU'LL NEED TO ORDER A CUSTOM-MADE DIE:

- ✓ Cartridge Name
- ✓ Bullet Diameter
- ✓ Parent Case
- ✓ Three (3) Fired Cases
- ✓ Chamber Reamer Drawings
- ✓ Die Marking

Individual Dies & Accessories

Universal Decapping Die

Universal decapping die to decap military cases that have swaged primer pockets and are hard on conventional sizing/decapping dies.

No. 050085

1911 Auto Primer Tube Filler

Shorten your primer tube filling times with this fast and fun Hornady® 1911 Auto™ Primer Tube Filler. The ergonomic handle positions the tray at an optimum angle for feeding primers and fills a 100-count primer tube in 10-15 seconds. Includes small and large trays and tubes. Batteries not included.

No. 050098

Blank Ammunition Die Set

For loading blanks, this set produces a star crimp for all popular cartridges from 223 through 45-70. Compatible with 7/8" x 14 TPI presses.

No. 544591

Sure-Loc™ Lock Rings

Upgrade your dies with our Sure-Loc™ Lock Rings. Allows precise adjustments of all standard 7/8"-14 dies and accessories.

Clamps around the whole die and won't damage the threads. Applies constant pressure across the threads to hold the ring in place.

Wrench Flats: Remove and replace dies without pliers damaging the lock ring.

No. 044000
6 Pack No. 044606

Compatible with any brand 7/8"x14 dies.

Taper Crimp Dies

This die removes the flare from the case mouth and crimps the case mouth around the bullet while maintaining a sharp edge for proper headspace. Improves feeding of reloaded cases in semi-automatic handguns.

TAPER CRIMP DIES	ITEM NO.

500 S&W Mag	044702

Hornady® Die Wrench

Fits the flats of the Custom Grade™ dies spindle assembly, lock rings and die body.

No. 396490

Lock-N-Load® Deluxe Die Wrench

The Deluxe Die Wrench holds the shell plate and keeps it from rotating while you change plates and tighten the main press screw. It also adjusts the tightness of the spindle lock and the lock rings, and can tighten or loosen the die flats.

No. 396495

Click-Adjust Bullet Seating Micrometer

Precisely set bullet seating depth, just like dialing a scope turret, in click adjust .001" increments. It's a quick and easy way to achieve benchrest accuracy and consistency without the extra cost of another seating die. Hornady® die sets already include an in-line seater; simply replace the standard seating adjustment stem with the Click-Adjust Bullet Seating Micrometer.

No. 044097

Lock-N-Load® Light Strip

Light up your press with the Hornady® Lock-N-Load® Light Strip. With an adhesive backing, the Lock-N-Load® Light Strip can be used on any press or location on your reloading bench for extra light to help eliminate shadows, making safety and quality checks easier than ever. The Lock-N-Load® Light Strip features LED lights for a long life and plugs into a standard 110V outlet.

No. 044661

Quick Detach Reloading Mounting System

- Quickly and easily attach and detach presses and other reloading tools.
- Maximizes production when bench space is limited.
- Two cam locks keep plate stable during use and allow quick release for easy tool changeovers.
- Mounting hole configurations fit a variety of presses including the Lock-N-Load® AP, Lock-N-Load® Iron Press, Lock-N-Load® Classic, 50 BMG and 366 Auto Shotgun Press. Also fits the Lock-N-Load® Bullet Feeders, Cam Lock™ Trimmer, Lock-N-Load® Concentricity Tool, and the Neck Turning Tool.

Quick Detach Mounting Plate System
(16.5"x 5"x 2.5") . **No. 399697**

Quick Detach Mounting Plate Only
(14.5"x 5"). **No. 399698**

Lock-N-Load® Primer Pick-up Tube Kits

Stocking your reloading bench with extra primer pick-up tubes will allow you to load more rounds without stopping to refill primers. Compatible with the Lock-N-Load® AP™ and Lock-N-Load® Iron Press™

**3 Pack Large Primer
Pick-Up Tube No. 398511**

**3 Pack Small Primer
Pick-Up Tube No. 398509**

(Not compatible with 1911 Auto Primer Tube Filler)

Simplify YOUR SECURITY

One of the first responsibilities of owning a gun is properly securing it when not in use. But more than that, protecting your firearms and other valuables just makes sense. Hornady makes it easy with a variety of safes, vaults and accessories for your home, your vehicle or however you travel. By utilizing patented RFID technology, Hornady Security® RAPID® Safes offer the quickest, most dependable access to your firearm while providing unmatched security from unauthorized users.

As a firearms owner, you have many options for storage devices to fit your lifestyle and home. On the following pages, you'll find security products for handguns, rifles and shotguns. Explore the storage options, including products on Snapsafe.com, to see what we have available and determine what will work best for your situation.

SECURITY

Access all your Hornady® RAPID® Safes with a single RFI*d* tag.

No matter the number of RAPID® Safes you own, one tag can open them all. Simply program your preferred RFID tag (watchband, key fob or adhesive decal) then hold over the reader and the safe opens for quick access.

By using RFID technology, there's no need to find a key, register a fingerprint, or remember a combination.

Hornady offers a wide selection of RAPID® Safes, from one and two-gun safes up to the Ready Vault™ that holds up to 8 long guns and 14 handguns.

Fast and dependable touch-free entry with patented RFID technology.

Watchband Tag

Key Fob

Adhesive Decal

EVERY RAPID® SAFE COMES WITH MULTIPLE RFID TAGS

Every Hornady Security® RAPID® Safe can be programmed to read up to five different RFID tags.

Various tags and accessories are available. RFID decals can be placed on your phone or any other convenient placement.

Mobilis® Safes **NEW**

Discover the ultimate solution for safeguarding your valuable firearms, ammo and gear with Hornady Security® Mobilis® Safes. These safes offer an innovative modular design that ensures you get the security you need when you want. Gone are the days of struggling with moving companies or installers – the Mobilis® Safes can be transported and assembled piece by piece in any room of your choice. The included tool kit provides everything required for assembly, giving you the power to set up your safe in a matter of minutes.

FEATURES:

- Thick 9 gauge 2-ply steel exterior walls with pry-resistant 3/16" solid steel door and non-breach seal.
- Nine to fourteen 1-inch steel live locking bolts (depending on model).
- Square-Lok® interior organizing system maximizes storage space.
- Metal Square-Lok® shelves and rifle/pistol gun racks can be configured to suit your needs.
- Additional Square-Lok® accessories can be purchased separately.
- Built-in 120V outlet and USB power strip.
- Protective shelf and floor mats.
- 2300°F one-hour Fire Shield protection and heat-activated door seals.
- Durable powder-coated finish in matte grey.
- Stylish black nickel handles and keypad.
- UL Listed digital lock with EMP mechanical key backup.
- Pre-drilled for floor mounting.
- Lifetime warranty.
- Delivered right to your door.
- Manage your personal security code for 100% privacy.

RAPiD® Safe Ready Vault™

Available in two sizes, the Square-Lok® interior provides numerous configurations for maximum storage flexibility. Rearrange racks or purchase additional Square-Lok® accessories as needed. The Ready Vault™ provides organized space to keep all your guns and gear secure.

WiFi CONNECTIVITY KEEPS YOU INFORMED

Keep tabs on your Ready Vault™ safe through your smartphone. Download the Hornady Security® app and receive an alert when the safe is unlocked.

ADAPTABLE STORAGE

Square-Lok® gun racks (included) and other accessories (sold separately) fit wherever you choose on metal interior walls. The Hornady Security® line of LED lights, shelves, gun racks, hygrometer and dehumidifiers are Square-Lok® compatible.

PATENT PENDING GUN RACKS

Dual-purpose gun racks use spaces between barrels to accommodate up to eight long guns and 14 handguns. PVC coating protects the guns' finish while deep standoffs provide room for large optics.

PADDED FLOOR MAT

Neoprene floor mat prevents gun stocks from slipping and allows long guns to be stored safely upright.

SAFE AND READY

AC and battery power ensure your gun and other valuables are protected and ready 24/7.

***IMPORTANT:** Do not store loaded firearms in any safe or lock box. Follow local, state and federal laws for firearm storage and transport. Check TSA regulations and airline policies before traveling with any portable safe. Check dimensions of your firearm against safe's internal dimensions. Firearm and firearm accessories not included.

Welded Gun Cabinets

This fully welded security cabinet secures firearms that are up to 53 inches long. The anti-pick three point key lock system means only key holders have access. It has storage capacity for everything from rifles, shotguns, and handguns to gear and supplies. Pry-resistant concealed hinges prevent tampering.

- High quality steel paired with three-point locking mechanism and barrel key lock provide peace of mind.
- Fully adjustable shelf and gun racks.
- Shelf accommodates extra-long shotguns and rifles.
- Heavy-duty PVC coated gun racks.
- Neoprene floor mat.

RAPiD® Safe AR Gunlocker

The AR Gunlocker stows neatly under a bed, in a closet or the back of an SUV, providing total security with its fully enclosed design. Available in two sizes, secure up to three tactical-length rifles or shotguns and access them quickly and efficiently, thanks to RFID technology.

VERSATILE AND SECURE

Mount horizontally or vertically, and secure to wall, floor or other stationary object with pre-drilled mounting holes or included security cable.

EASY, CONVENIENT ACCESS

Spring-loaded door opens when unlocked to provide instant access to carbine-length weapons.

CERTIFIED CHILD-RESISTANT

Exceeds ASTM International and California DOJ safety standards for child and pry resistance, lock strength, drop/pick/saw tests and hinge attack resistance.

PROTECTIVE INTERIOR

Padded interior and foam gun mounts preserve firearms' appearance.

No. 98190

Holds up to two tactical length rifles.*

RAPiD® Safe Keypad Vault

Secure handguns and other valuables while maintaining convenient access with the fast, dependable entry that is the hallmark of RAPiD® Safe and its RFID technology. Big enough for two handguns but small enough to fit in a drawer or atop a shelf, this is one of our most affordable RFID-enabled RAPiD® Safes.

PROGRAMMABLE RFID TAGS

Two included RFID tags can be selectively programmed to open the Keypad Vault and any other RAPiD® Safe you own.

THREE ENTRY METHODS

Use the patented RFID reader, keypad code or backup key.

TOP-NOTCH SECURITY

Featuring heavy-duty, tamper-proof steel construction, vault includes pre-drilled holes for permanent mounting.

Exterior: 13.1"W x 11.0"D x 3.9"H

Interior: 10.6"x 7.8"x 3.3"

Weight: 13 lbs.

No. 97436

***IMPORTANT:** Do not store loaded firearms in any safe or lock box. Follow local, state and federal laws for firearm storage and transport. Check TSA regulations and airline policies before traveling with any portable safe. Check dimensions of your firearm against safe's internal dimensions. Firearm and firearm accessories not included.

All RAPiD® Safes include a digital keypad as an alternate form of entry.

RAPiD® Safe 2700KP and 4800KP

These RAPiD® Safes provide convenient, tamper-proof security for handguns and other valuables while you're at home or traveling. Their small footprint fits easily on a nightstand or in a suitcase, so your firearm is always protected and ready to go. With three sizes, there's an option for any size handgun.

CERTIFIED CHILD-RESISTANT

Exceeds ASTM International and California DOJ safety standards for child and pry resistance, lock strength, drop/pick/saw tests and hinge attack resistance.

SAFE AND READY

AC and battery power means your handgun is both protected and ready to go 24/7.

MOBILE SECURITY

Included cable allows safe to be secured to a stationary object. Meets TSA requirements for handgun safety in checked luggage.*

RAPiD® Safe 2700KP
[X-Large]
No. 98172

 Exterior: 12.7" x 8.7" x 2.9"
 Interior: 9" x 7.7" x 2.2"

RAPiD® Safe 4800KP
[XX-Large]
No. 98141

Fits two 1911-sized pistols or one large revolver.*
 Exterior: 10.5" x 12" x 2.9"
 Interior: 7.2" x 11" x 2.2"

***IMPORTANT:** Do not store loaded firearms in any safe or lock box. Follow local, state and federal laws for firearm storage and transport. Check TSA regulations and airline policies before traveling with any portable safe. Check dimensions of your firearm against safe's internal dimensions. Firearm and firearm accessories not included.

Fireproof Keypad Safe

The ideal solution for anyone who needs to secure more than one or two handguns but doesn't have room for a full-size vault. The Fireproof Keypad Safe provides robust security and flexible storage for everything from firearms to hobby equipment.

SECURE AGAINST THEFT AND FIRE

Heavy-duty 16-gauge steel body, extra thick 8-gauge steel door and four 1" diameter locking lugs keep out unauthorized users. Safe has a 30-minute fireproof rating up to 1,400° F.

FLEXIBLE STORAGE

Removable interior shelf offers flexible and secure storage of firearms, documents, jewelry, gear, collections, medications and more.

TWO ENTRY METHODS

Use keypad code or backup key.

Exterior: 12"x 15"x 16.5"
 Interior: 10.3"x 13.3"x 15"
 Weight: 49 lbs.

No. 95407

***IMPORTANT:** Do not store loaded firearms in any safe or lock box. Follow local, state and federal laws for firearm storage and transport. Check TSA regulations and airline policies before traveling with any portable safe. Check dimensions of your firearm against safe's internal dimensions. Firearm and firearm accessories not included.

Canister Dehumidifier XL
1500g of desiccant
No. 95906

Canister Dehumidifier
750g of desiccant
No. 95902

Rapid Dry™ Dehumidifier Stone

Sized perfectly for gun cases, the Rapid Dry™ Dehumidifier Stone can be recharged in the microwave.

No. 95898

Reusable Dehumidifier Bag

Prevent moisture damage in gun safes, cabinets and other enclosed areas. Recharge in warm oven for infinite reuse.

450g of desiccant
No. 95908

Cordless LED Safe Light

Twenty white LEDs provide 70 lumens of light for gun safes, closets, cabinets, drawers and corridors. With on/off/auto modes, light bar can be set to illuminate when motion is detected and shut off after 20 seconds. Includes two magnetic bases for attaching to metal walls or doors.

No. 96001

***IMPORTANT:** Do not store loaded firearms in any safe or lock box. Follow local, state and federal laws for firearm storage and transport. Check TSA regulations and airline policies before traveling with any portable safe. Check dimensions of your firearm against safe's internal dimensions. Firearm and firearm accessories not included.

Safe Accessories

TSA Cable Padlock

Protect belongings by using this all metal TSA-recognized padlock that allows TSA screeners to inspect luggage without damaging the locks.

2-Pack
No. 96022

Magnetic Accessory Mount

Powerful rare earth magnets securely hold metal ammo magazines, tools, or other metal accessories. Rubber coating protects firearms and accessories. Can be attached directly to metal cabinet surfaces, or use the included screws to mount nearly anywhere.

No. 95913

Premium Safe Anchoring Kit

The Premium Safe Anchoring Kit includes everything needed to secure your safe to a concrete floor. Four polymer shims help level the safe in place, while the included carbide concrete bit can be used to drill holes in the concrete floor. Place the anchor bolts into the drilled holes and tap into place with a hammer. Tighten the nuts with the included socket until the anchors expand into place.

No. 95851

Magnetic Gun Mount

Powerful rare earth magnets rated for 43 lbs. Rubber coating protects firearm and accessories. Compact design and included mounting screws allow installation nearly everywhere.

No. 95910

***IMPORTANT:** Do not store loaded firearms in any safe or lock box. Follow local, state and federal laws for firearm storage and transport. Check TSA regulations and airline policies before traveling with any portable safe. Check dimensions of your firearm against safe's internal dimensions. Firearm and firearm accessories not included.

Pistol Racks

Maximize storage in your gun safe or cabinet. PVC coating won't scratch or damage your gun's finish.

4-Gun Pistol Rack

Accessories

1 Team Hornady® Range Bag
 This durable nylon range bag has large compartments for the range shooter or uniformed officer. With embroidered Team Hornady® logos, this range bag can carry a variety of accessories. Imported.
No. 9919

2 Hornady® Rustic Oval Tin Sign
 .024" Thick Aluminum. 18"W x 12"H.
No. 99144

3 Reloading Red Zone Tin Sign
 Measures 18" x 12". Made in the USA.
No. 99130

4 Binocular Case
 Protect your binoculars, range finder, GPS or spare ammo with this quiet quick-access case. Built from tough, nylon Cordura® with a micro fiber liner and padded sides, the case features heavy-duty zippers and X-panel harness that distributes weight over four elastic straps. Measures 7.5" x 10.2" x 3.4".
No. 99128

5 Hornady® Shooters Cheek Pad
 Made of tough, nylon Cordura® with elastic loops and a zippered accessory pouch, this stock pad is the perfect accessory for your rifle. This versatile pouch can hold five cartridges on the exterior while providing a padded cheek weld. Available in left or right-handed models. Imported.
Black RH No. 99108
Black LH No. 99113
Tan RH No. 99110

6 Lock-N-Load® Bolt Ball
 This accessory enables better bolt handling for faster reloads and is easy to grip when shooting with gloves. No altering of the original bolt required. It adapts to most conventional round bolt handles.
No. 99123

7 Universal Sling
 Developed by the Hunter Company of Colorado, this durable leather and nylon sling is built to endure the toughest hunts.
No. 99107

8 Hornady® 17" Neon Clock
 Light up any room with the Hornady® 17" Retro Neon Clock! Featuring a chrome frame, and red and white neon. The light runs via power cord and the clock requires AA batteries (not included).
No. 99125

9 Binocular Harness
 Designed for comfort and flexibility, this harness distributes the weight of your binoculars over the four elastic straps and form-fitting X panel, alleviating neck pain. Easy to put on and take off, the X panel on the back features an imprinted Hornady® logo.
No. 99121

10 Joyce Hornady Tin Sign
 Measures 18" x 12". Made in the USA.
No. 99112

11 Hornady® Soft Pistol Case

Designed in collaboration with our friends at TUFF® products, this case features a rubber Hornady® embossed patch and can accommodate one semi-automatic handgun and five magazines, or one 5.5 inch barreled full size revolver and two speed loaders. Dimensions: 8½" x 13½" and 1½" thick (when empty). Heavy-duty YKK zipper and tough, nylon Cordura® are used for strength and durability. Imported.
No. 99117

12 Hornady® Buck® 110 Knife

Our 110 folding hunter knife features a Macassar Ebony Dymondwood handle and nickel-plated bolsters. The blade is made of 420 HC stainless steel for years of reliable use. Made in the USA.
No. 99126

13 "Moose" Velcro Patch No. 9900

Moose, the office mascot, roams the hallways at Hornady and greets visitors when they arrive.

Dies & Reloading Essentials

Series I: The most popular bottleneck rifle cartridges. Two die set: size die and bullet seater die.

Series III: A second tier of bottleneck rifle cartridges. Two die set: size die and bullet seater die. For slightly less popular cartridges.

Series V: The magnum handgun cartridges, and straight-wall rifle cartridges that require a special crimp (i.e. 450 Bushmaster is the only one). Four die set: size die, expander die, bullet seater die, and a special taper crimp die.

Series II: The most popular handgun cartridges. Three die set: size die, expander die, seating die.

Series IV: Another tier of bottleneck rifle cartridges, obscure, almost semi-custom. Two die set: size die and seater die. Very low volume. Includes the Nitro Express cartridges.

Get Loaded[®] 2024

Whether you're a novice or experienced reloader, you can stock your bench with presses, dies, and tools that give you complete control – all while earning **FREE BULLETS!** Choose from the most durable, precise and convenient tools on the market.

Get Loaded with Hornady!

500 FREE BULLETS

Hornady[®] reloading presses qualify for 500 free bullets. Plus, you'll find tools that speed up your reloading efforts like the Lock-N-Load[®] Case Feeder, Power Case Prep Center and more!

100 FREE BULLETS

Custom Grade[™] and Match[™] Grade Die Sets and other tools like the Auto Charge[®] Pro and M2 Digital Bench Scale qualify for 100 free bullets.

For complete details and to redeem, scan the QR code or go to hornady.com/getloaded2024. Promotion valid on items purchased Jan. 1, 2024 through Dec. 31, 2024. Some restrictions apply.
