LEARNING BY MOVING®

Helping children learn by having fun

The human brain uses the body to recognize the world around us. Using our bodies helps us to understand the laws of nature. So, when children play and have fun, it is serious business; they are actually hard at work, learning.

All Winther's products are designed to make children want to play. Our products invite activity. They create that magical space where youngsters lose themselves in play; involved, happy, and active. In this environment, children form healthy habits that will last a lifetime.

Novelties 2021

NEW
See page 42

Surfer Boat (665.00)

Funny push- and handcart shaped as a boat with room for one passenger.

NEW
See page 59

Mini FunRacer (407.20)

A great item for the little ones, who seek speed and thrills. With its unique steering system manoeuvred with one hand it stimulates the child's coordination skills. It runs very smoothly and requires only little space to make a turn.

NEW
See page 59

NEW
See page
71

Wall Rack (391.44)

Wall-placed rack for trikes and bikes. Saves lots of floor space. The front wheel is placed in the rack. Items are kept out of the way.

Cycle Rack (391.45)

Cycle rack for three scooters or two-wheelers that keeps them tidy and well-ordered. Should not be mounted near children's play areas.

winther

Our history

Winther is a Danish family business in its third generation.

Since the 1930s, Winther has produced high-quality products with a craftsman's pride, focusing on the play and movement of children.

1930 — 1940 — 1950 — 1960 — 1970

1930 An idea taking shape

Anders Winther loses one leg in a traffic accident and can no longer work as a blacksmith. Whilst, inspired by children playing in the snow, he starts to develop toboggans for children in his father-in-law's smithy.

1933 New modern factory

Production increases rapidly and Anders Winther builds his own factory with modern machines. His brother Frede Winther is also employed by the company.

1935 New products

Inspired by how children play outside, production of tricycles and scooters commences. More people are employed.

1940 - 45 World War II

The lack of raw materials takes Anders Winther on a brief detour to peat winning. Shortly after the end of the war, Anders Winther unfortunately dies at a young age. The company continues under the management of L M Jensen and Frede Winther.

1947 The first bicycle

The first bicycle with pedals located on the front wheel is launched.

1948 From local to national

Staff are employed to handle sales in Copenhagen. Winther now sells to all areas of Denmark.

1951 Improvements in quality

The first bicycle with a chain-and-sprocket drive is introduced and the quality of the products is improved. This is the starting point for the reputation of Winther bicycles for being robust and durable.

1955 The export market

Winther enters the export market. Winther starts exporting primarily to Northern Europe. Already in 1960, exports make up one-third of the company's turnover.

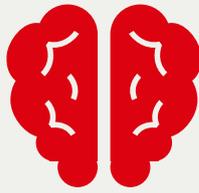

1959 A classic is born

In 1959, the first tricycle is launched. The cycle has been continuously developed and, today, it is a true classic.

1960 Focus on children's bicycles

To concentrate attention on children's bicycles, the other product lines are phased out.

GONGE

1998 Learning by Moving

Children's play and well-being is placed on the agenda and conceptualized during the 1970s. Winther joins forces with designers and experts in children's play and development. Play and movement produces happier children and stimulates their learning and healthy development.

The philosophy of 'Learning-by-Moving' becomes more specific. Motor development skills are considered in the design of the products.

2010 Gonge merges with Winther

The company Gonge Creative Learning merges with Winther. Gonge has a range of toys for indoor use and focuses on motor development skills and is thus a good supplement to the existing Winther ranges.

1973 Third generation

In 1973, Anders Winther – the grandchild of the founder – takes over the management of the company.

1978 The range is expanded

The range is expanded with junior bicycles and adult bicycles.

1980 — 1990 — 2000 — 2010 — 2021

1985 The daycare market

Daycare bikes for nurseries and kindergartens are added. The Mini Viking line is launched.

2003 Turtle Kiddy Bus

The model Turtle Kiddy Bus is launched.

2006 Kangaroo ladcykler

Kangaroo cargo bikes are developed and brought to the market.

2007 Focus on daycare bikes

Winther dedicates itself fully to the market of daycare bikes and divests the business area of junior and adult bicycles – with the exception of Winther Kangaroo cargo bikes and bike trailers. At the same time, the export market is developed with a vendor network.

2008 Circleline

The Circleline series is introduced.

1990 Viking

The Viking line is introduced and put on display at the world's largest toy fair in Nuremberg.

Winther today

2021 From local to global

More models and new series are added which all challenge the motor skills of children in different ways. The interest of the founder, Anders Winther, in children's play and development lives on today in the DNA of the company. And Winther's daycare bikes are now exported worldwide.

Mette Winther takes up the post of managing director.

You can find even more info about the history of Winther at www.a-winther.com

Back to School

It's time for the children to return to the playground and be active again – after a year that has been out of the ordinary.

The benefits of playful activity

Research suggests that outdoor activities are good for children and help lay a solid foundation for their learning.

The same – but different

Back to school is a familiar time that all parents know well. But this year it takes on a whole new meaning. It also represents a return to old routines which for a while had been put on pause. Not least, it is a long-awaited and joyous reunion with the playground, where children are best able to grow and develop. At last, month's of sitting still can give way to a wealth of fun activities for our children. And so at this juncture, it is especially important that we support this play, which is so crucial to fomenting our children's well-being.

Research suggests that outdoor activities are good for children and help lay a solid foundation for their learning. Plus, the fastest thing that spreads outside is good moods and big smiles.

By including movement and physical challenges as part of a child's everyday life, it is possible to help them to develop and automate fundamental motor skills at as early a stage as possible.

Playful activity is our philosophy

Physical play and movement are also a part of Winther's philosophy, or Learning by Movement as we call it here. This is a philosophy which has also found its way into our kids trikes, with active play

and physical development having been incorporated into the design of our models over the decades. Our trikes encourage all manner of spontaneous play and a wide range of physical and social activities.

Just take a quick glance at our catalogue and you will soon see for yourself: from the kid who intuitively picks up a Viking Scooter on the playground and whizzes off with the wind in their hair to the little flock of kids that heads off to the sandbox, arriving on their Mini Viking Racing Scooters or Tricycles. Or the bigger kids who really put pedal to the metal as they race on a Viking Bob Kart or a Viking Easy Rider.

Valuable playfulness

The play value is high, but just as importantly, it delivers those golden moments which make a positive difference to that so crucial stage of life that childhood is. Especially since play is not only good fun, but an opportunity to interact with other kids. Friendships forged through play are a huge part of a child's further development and learning. So whether it's back to school or back to the playground, we help kids by encouraging them to cast themselves head first into the big wide world of play that awaits outside. Not only does this bring them great and well-deserved joy in the here and now, but it will stay with them for the rest of their lives.

Learning by Moving®

Children learn by moving and all Winthers products are designed to make children want to play.

Children develop their knowledge and skills by stimulating the brain. Their physical activity creates stronger links between the right and left sides of the brain, which is why it is important that they crawl, walk, cycle and generally move around. Playing allows them to experience the world with their own bodies and to understand the laws of nature by feeling, exploring, trying out things and challenging themselves physically.

It starts with a trike. It ends up as social intelligence

When children play with their trikes or other wheeled toys, this play is their world. The trikes can play any part the children like, from the youngest child's observation games to the complicated role-playing of older children. Under the right conditions, children can rapidly turn their experiences into general understanding and awareness at a speed, and with a clear perception, that researchers find difficult to explain. All it takes is for children to be allowed to play freely.

Learning to know what is important

Children learn what is important as a reflex when cycling. When they are on a bike, they simply cannot look at everything. They have to stay focused, and they learn the difference between what is important and what is not.

Motor skills

Motor skills define the ability to move and to use the body, legs and hands productively in coordination with the senses. Good motor skills involve five different elements; strength, balance, coordination, a sense of three-dimensional space, and the ability to sense the world around us, which are used to direct how the body moves.

There is only one way to improve motor skills; practice, practice and more practice.

winther

Insights

Children learn by moving. To support and encourage children in their play activities, it is important that we give them access to a wide range of toys that inspire many different types of play.

By physiotherapist, Sigrid Mitchell

Biking is a part of life in many cultures and becoming more in others. It is a skill that gives you lifelong opportunities and builds a foundation for a healthy life of movement.

Biking stimulates the brain widely: Vision, vestibular system (balance), proprioception (joints and muscle), Cerebellum and all the other senses. Cerebellum refers to hand/eye and foot/eye coordination, which are skills in high demand, when navigating by physical and visual input.

How biking affects your Vision

When children are riding a bike, trike or scooter and navigating through the surroundings the eyes are constantly switching between the following skills:

Gaze stabilization: the ability to stay in focus on a target over time in all directions.

Smooth pursuit: the ability to move the eyes in all directions to follow an object.

Saccades: the ability to switch between targets in all directions while staying in focus.

Near/far: the ability to switch between converging and diverging while staying in focus.

Peripheral vision: the ability to stay aware of the surroundings while having one focus point.

How biking affects your proprioception

When sitting on the saddle, or with the feet pressing the pedals or the hands holding the handlebar the brain recognizes the contact with the bike and acts as if it has become an extension of the body.

When cycling you are moving joints in the foot, ankle, knee and hip as well as stabilizing the joints

in the arms and spine, using muscle tension, the Baroreceptors register pressure in the hands holding and steering the handlebars and the feet pressing on the pedals.

The brain is continuously working to adjust the tension and pressure, in response to the signals it receives, to make sure the movement fits the task, with regards speed and balance.

How biking affects your vestibular system

When children are riding on a bike, trike or scooter and moving forward and staying up right stimulating the Otoliths - mainly the Utricle, but the Saccule will be registering when going over bumps.

When you move your head to navigate you stimulate all 3 canals, which tells the brain the position of the head compared to the horizon, so the brain can make sure the body counter adjust, so you do not fall.

Please visit our website for more information about the benefits of biking.

Safety and quality

Winther is Danish design built with care; we care about what we do. Play is important, but high standards for safety and quality cannot be compromised.

A Winther product is true Danish quality, involving both new technology and old-fashioned craftsmanship.

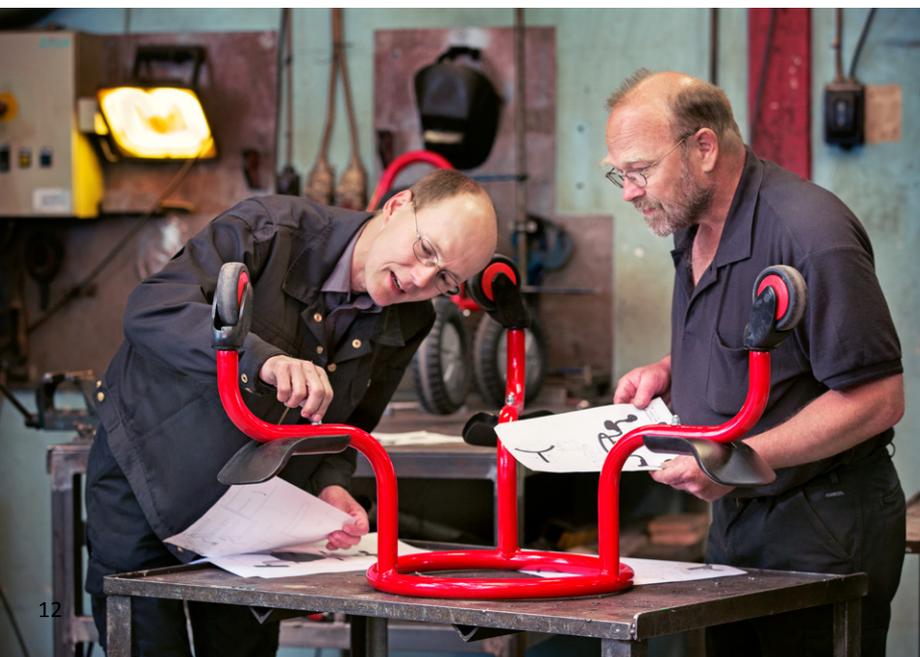

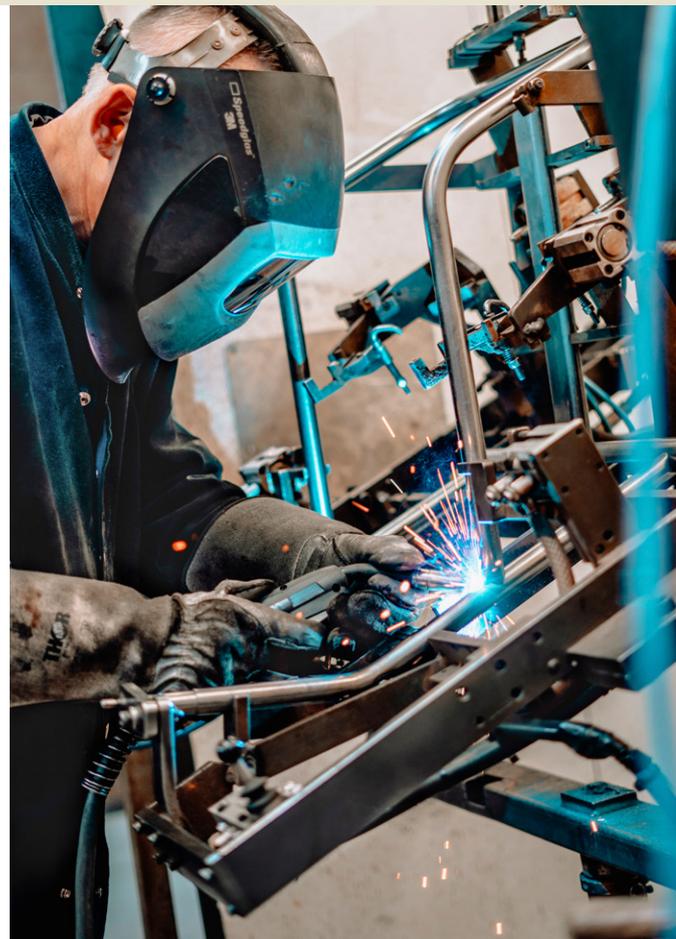

Modern production technology not only makes our wheeled toys affordable, it also ensures that they are robust.

Welding robots ensure our wheeled toys benefit from consistent weld quality and durable frames, and our powder coating is extremely strong and rust resistant.

Experience and skill

Our very experienced, highly skilled craftsmen perfectly complement the modern technology, providing the attention to detail necessary to maintain production quality. We think of even the smallest detail in every product, ensuring they are ergonomically correct, with no sharp edges. In our opinion, the joy of children's play should not be spoiled by mistakes in design or production.

This ensures that our wheeled toys can withstand hard knocks in the playground.

After sales service

At Winther, we take pride in delivering products that fulfil the needs of those who buy them and use them.

Service and cooperation are essential to us, and we are easy to reach with any feedback.

If any issues arise, we will do our best to resolve them quickly.

winther

Sustainability

*Nothing beats a good day's play in company
with one's favourite trikes and scooters.*

At Winther we care for future generations and we deal with resources in a responsible manner. Therefore, we use all our efforts to develop products with the highest durability and longest life cycle.

In kindergartens and at schools a lot of children check in and out each year, but Winther trikes and bikes continue to create joy for them year after year.

We use first-class components and proper craftsmanship in every joint to ensure that the trikes and bikes run smoothly. With one of the strongest coatings in the world, our products are capable of resisting the toughest challenge; children playing every day. Because of this, a Winther product is a solid long-term investment, making economic sense with time.

Spare parts

Winther offers a full spare part service set up. If one of our trikes needs a new wheel, pedal or handlebar grip, we can serve you with any spare part.

VIKING

For kindergartens, schools, after-school clubs
and playgrounds. Suitable for ages 2-12

Probably the best in the world

Viking is probably the world's best range of wheeled toys for educational use. The range covers a wide variety and covers many possibilities, and the Viking quality is second to none. Viking durability cannot be beaten and these products give children countless play opportunities. You will see our products all over the world, almost always in the company of children absorbed in investigating

themselves and their surroundings. Viking products are toys with great play and activity value. Each of the many different products is designed for children with different levels of motor skills and aimed at helping them in their play and development. The Viking range gives children the best access to play activities on a scale that suits their different builds.

Tricycle, Large
Model 452.00

This tricycle has a large front wheel, which allows slightly older children to use their strength. With a trailer, it becomes a tractor or Cinderella's pumpkin carriage.

Width: 57 cm
Height: 70 cm

Length: 92 cm
Seat height: 43 cm

13.0 kg 0.206 m³

4 8

Tricycle, Medium
Model 451.00

This tricycle is a Winther classic. Millions of children have proved its worth. They cannot wait to get started once they see it and try it out with a trailer.

Patent no. ZL201130425225.9

Width: 52 cm
Height: 61 cm

Length: 80 cm
Seat height: 35 cm

11.4 kg 0.151 m³

3 6

Tricycle, Small
Model 450.00

To a child, the small tricycle is love at first sight. It helps develop children's motor skills, trains their muscles, and develops their sense of coordination and space.

Width: 45 cm
Height: 51 cm

Length: 67 cm
Seat height: 28 cm

9.0 kg 0.103 m³

2 4

Easy Rider
Model 479.00

It is red and very cool with a low seat and a Harley-type handlebar. The large front wheel lets children work up a good speed and maintain momentum for hours on end.

Patent no. ZL201130425256.4

Width: 52 cm
Height: 62 cm

Length: 82 cm
Seat height: 15 cm

11.4 kg 0.165 m³

4 7

DELIVERED FULLY ASSEMBLED

Truck
Model 493.00

This sturdy bike provides children with opportunity for social role-play while moving sand and playground equipment around. Also exercises motor abilities and reflexes.

Patent no. ZL201130424897.8

Width: 52 cm
Height: 62 cm

Length: 103 cm
Seat height: 37 cm

16.0 kg 0.190 m³

4 7

Trailer
Model 476.00

This robust, stable multi-functional trailer can be easily attached to all tricycles and taxis. Slip-proof bottom. Can carry sand, toys or passengers up to 75 kg.

Width: 52 cm
Height: 25 cm

Length: 86 cm

11,5 kg 0.136 m³

A foundation for a healthy life of movement

Biking stimulates the brain widely: Vision, vestibular system (balance), proprioception (joints and muscle), Cerebellum and all the other senses. Cerebellum refers to hand/eye and foot/eye coordination, which are skills in high demand, when navigating by physical and visual input.

Ben Hur Tricycle
Model 465.00

Roman soldiers fighting a mighty battle - this tricycle stimulates imagination without compromising safety. Passengers standing up can hold on to the safety bar.
Patent no. ZL201130404545.6

Width: 58 cm
Height: 62 cm

Length: 100 cm
Seat height: 38 cm

17.2 kg 0.238 m³

4 7

Ben Hur Trailer
Model 466.00

Has Ben Hur been to Mars? No doubt – in a play universe near you. The Viking trailer fits all tricycle and taxis with a safety bar and slip-proof foot plate.

Width: 58 cm
Height: 58 cm

Length: 84 cm

10.0 kg 0.168 m³

4 7

TriCart
Model 469.00

An exciting alternative to the classic tricycle. The adjustable seat means the TriCart can be used by children of many different ages.

Patent no. ZL201130401690.9

Width: 57 cm
Height: 75 cm

Length: 100 cm
Seat height: 26 cm

14.8 kg 0.167 m³

5 12

Taxi
Model 462.00

Extremely popular, strong taxi that is ideal for use in all kinds of role-playing games. A safety bar is good for children to hold on to, and makes them feel secure.

Patent no. ZL201130401686.2

Width: 58 cm
Height: 62 cm

Length: 98 cm
Seat height: 38 cm

15.4 kg 0.230 m³

4 7

Twin Taxi
Model 468.00

Children use play to imitate adults or situations in their day-to-day lives. The Twin Taxi stimulates their imagination, and has room for three children.

Patent no. ZL201130425575.1

Width: 68 cm
Height: 62 cm

Length: 96 cm
Seat height: 38 cm

20.3 kg 0.300 m³

4 7

Scooter, Small | Model 460.00
Scooter, Large | Model 467.00

Mastering a scooter gives children a tremendous sense of achievement. First it was a tricycle. "But now I have grown up." "I can balance." It gives heaps of confidence.

Width: 47 cm Height: 76 cm Height: 86 cm	Length: 98 cm
8.6 kg 0.088 m ³	9.2 kg 0.088 m ³
4	6
6	10

Scooter, Maxi
Model 495.00

A fun and challenging scooter aimed at slightly bigger children. The wheels of the scooter will never stop turning as long as there are children on the playground.

Width: 47 cm Height: 93 cm	Length: 121 cm
10.6 kg 0.128 m ³	8 12

SAFETY ROLLER™

Safety Roller™
Model 475.00

Well-suited for children, who need to strengthen their balance and motor skills and children with reduced capabilities. The Safety Roller provides maximum stability. Patent no. ZL201130401703.2

Width: 50 cm Height: 76 cm	Length: 87 cm
8.6 kg 0.126 m ³	4 7
4	7

Kangaroo
Model 496.00

With this fun trike, the child can bring out deliveries – sand or toys – to friends at the playground. Load capacity 50 kg in the carrier box and 50 kg on the seat.

Width: 58 cm Height: 68.5 cm	Length: 105 cm Seat height: 52 cm
 18.5 kg	 0.437 m ³
 4	 7

Rickshaw
Model 463.00

Lots of fun for two – one child as passenger, the other pulling. Seat with back support, a safety bar, and a small wheel that ensures that the rickshaw does not tip up.

Width: 55 cm Height: 54 cm	Length: 130 cm
 15.1 kg	 0.235 m ³
 4	 12

DELIVERED FULLY ASSEMBLED

RowKart™
Model 497.00

This inspection trolley is the star of the playground. Children need a good sense of rhythm as they pull and push the handles for forward motion and steer with their feet. Patent no. ZL201130401687.7

Width: 62 cm Height: 59 cm	Length: 91 cm Seat height: 29 cm
 17.3 kg	 0.345 m ³
 4	 8

DELIVERED FULLY ASSEMBLED

FunCart™
Model 498.00

Cool driving characteristics making it exciting to ride. Steer by using the two handle pins making the rear wheels move. The child uses the entire body when driving. Patent no. ZL201130425591.4

Width: 53 cm Height: 48 cm	Length: 67 cm Seat height: 21 cm
 11.4 kg	 0.196 m ³
 4	 7

BikeRunner™
Model 490.00

BikeRunner™ Large
Model 474.10

The ideal play vehicle for children not yet ready for a scooter or bicycle. Provides a fun way of developing a good sense of balance and coordination skills.

Width: 44 cm Height: 52 cm	Length: 70 cm Seat height: 35 cm
Width: 45 cm Height: 70 cm	Length: 80 cm Seat height: 42 cm

 LEARNING BY MOVING

winther

Children's perspective

The language of movement is global

Children growing, learning and simply having fun on our trikes and bikes are what make all our hard work worthwhile. That is why feedback from users is so important to us.

To:
A. Winther A/S
Rygesmindevej 2
DK-8653 Them, Denmark

Dear ladies and gentlemen,

my name is Lea Fahle, I am a primary school teacher from Duisburg, Germany. With my class I recently conducted a unit of several lessons on the topic of "advertisement".

The children from class 3a are 24 eight- and nine-year-olds. They wrote advertising slogans for your Viking penny farthing because they know (and love!) the bike from school. Their task was to use rhymes, adjectives, antitheses, alliterations, anaphors or neologisms to create attractive slogans. They did a fantastic job and their work turned out very creative. As you can see, some of them even drew a "Winther bike shop".

They put much effort into writing and drawing the posters and would love to hear your feedback on their advertisements.

They are also quite excited about writing to a "real company" - the children explicitly asked me to tell you that they "hope you are doing well and feeling fine". ;-)

All of us look forward much to an answer (gladly in English, I will translate for the class).

Kind regards from Germany,

Lea Fahle

Lea Fahle
GGG Van Gogh Strasse
Van Gogh Strasse 60
47228 Duisburg

Who knows our products better than our users?

The kids are our best ambassador, therefore we were even more pleased to receive this letter from a German school, giving their view on Winther's Penny Farthing, expressed in slogans and colourful drawings.

Children's activity **A-B-C**

How to activate your children

WHO recommends that all children should be physically active for at least 1 hour/day. Being a regular part of a child's everyday life it boosts the children's learning abilities and well-being in general. And Winther's trikes and bikes do invite active play and make it easier to reach the activity goal. They are designed to make children want to play.

1

Already a champ

It starts with a beginner's push bike. It gives stability for the child and joy to master his own trike, too.

2

Hours of playing

The classic tricycle is a must on every playground. Many hours of playing await the child.

3

Good balance

After driving on a tricycle, it is a new world to scout around on two wheels. The Viking Scooter gives good balance training and a lot of confidence.

4

Teamwork and friendships

Biking also gives a good opportunity to interact with other kids. Children should be encouraged to go for a ride together. It fosters good teamwork and friendships that are vital for a happy childhood.

TRY TO IMAGINE...

Every year I wish for a horse for my birthday. Maybe I will get one this year. In the playground I imagine that I'm a beautiful horse, that has the strength to pull all of my friends in a carriage.

VIKING EXPLORER

Specialized wheeled toys for after-school clubs and playground. Suitable for ages 3-12

Stimulating advanced motor skills

This range is for the older kindergarten children, as well as for schoolchildren, for playgrounds in summer amusement parks, and for hotels to offer to guest children and for use at campsites.

These products are specially developed to stimulate the motor skills and the interests of slightly older children.

Children grow up too quickly

Childhood is a time of life that is getting shorter and shorter in modern society. Playtime should continue. It strengthens the ability to stay focused and to learn the difference between what is important and what is not. This ability is vital to human beings, especially in an age when it is easy to get distracted by information coming from tablets, computers and mobile phones.

This is why we have developed a special range of products that appeals to the imaginations of older children, inspiring them to play a little longer.

Easy Rider Model 479.74

This trike has a special appeal to children who like challenges, e.g. by playing they are in a rally or race. The broad and rough tyres are ideal for uneven surfaces.

Width: 59 cm
Height: 62 cm

Length: 80 cm
Seat height: 15 cm

12.15 kg 0.185 m³

4 7

Tricycle, Medium Model 451.74

Cool looking tricycle with broad and rough tyres that are ideal for uneven surfaces. This trike appeals to children who want to play and set their imagination free.

Width: 55 cm
Height: 61 cm

Length: 80 cm
Seat height: 35 cm

13.3 kg 0.16 m³

3 6

Tricycle, Large Model 452.74

This large trike may inspire older children to play a little longer. There is no end to where they can go with the broad and rough tyres, ideal for uneven surfaces.

Width: 61 cm
Height: 70 cm

Length: 87 cm
Seat height: 43 cm

14.71 kg 0.211 m³

4 8

Scooter, Maxi
Model 495.98

A classic on the playground now appearing in a new design. A fun scooter which is loved by all children. Challenges every child's sense of coordination and balance.

Width: 47 cm Height: 93 cm	Length: 121 cm
10.6 kg 0.128 m ³	 8 12

TriCart
Model 469.74

An exciting alternative to the classic tricycle. Built for off-road adventures and uneven surfaces. The adjustable seat makes it suitable for children of many different ages.

Width: 61 cm Height: 74 cm	Length: 103 cm Seat height: 31 cm
15.09 kg 0.189 m ³	 5 12

Penny Farthing, Large
Model 481.00

Amusing cycle that is a major challenge for balance and coordination skills. Solid rear tyre. Long seat that makes it fun for children of many ages. Front wheels: 20".

Penny Farthing, Small, Model 482.00 – please see page 22.

Width: 49 cm Height: 91 cm	Length: 101 cm Seat height: 54 cm
10.5 kg 0.149 m ³	 5 12

Chopper
Model 489.00

Cool Chopper for the big kids. The large front wheel lets children work up a good speed. This makes it ideal for racing, now bringing even more fun into the game, when challenging other kids on the racetrack.

Width: 58 cm Height: 88 cm	Length: 104 cm Seat height: 41 cm
16.4 kg 0.23 m ³	 5 12

Both the peripheral vision, near/far and focal vision are stimulated when navigating through the surroundings, avoiding obstacles and other bikers using saccades, smooth pursuit, converging and diverging.

BobKart
Model 488.00

A true classic on the playground. With a function like a soapbox car it invites the children to social games like a Go-Kart race. Pedals are footrest only.

Width: 69 cm Height: 59 cm	Length: 103 cm Seat height: 18 cm
20.0 kg 0.444 m ³	4 10

Surfer Boat
Model 665.00

Funny push- and handcart shaped as a boat and with room for one passenger, while other children act as a motor by pushing in the back or by pulling in the front."

Width: 58 cm Height: 66 cm	Length: 94,5 cm Seat height: 35 cm
24.0 kg 0.397 m ³	4 7

CIRCLELINE

For kindergartens, day-care facilities
and playgrounds. Suitable for ages 2-8

Attractive, modern design

Circleline is Winther's sporty range of trikes, bikes and scooters for the educational market. The line is made in an attractive, modern design and strong quality complying with all current safety standards on the market. The different models provide many opportunities to stimulate

motor skills, creativity and social skills. When designing Circleline, it was important that the products were easy to assemble. And they are. Each wheeled toy comes in two parts to put together – it is as easy as that.

Tricycle, Small
Model 550.50

The classic tricycle in a brand new design. Every child loves the freedom to get around on the trike. Easy to move forward, trains the muscles and develops motor skills.

Width: 45 cm Height: 53 cm	Length: 67 cm Seat height: 27 cm
8.0 kg 0.081 m ³	2 4

Tricycle, Medium
Model 551.50

A popular, robust tricycle suitable for most children. A must on every playground. Stimulates the play of children and develops motor skills.

Patent no. ZL201130424978.8

Width: 52 cm Height: 60 cm	Length: 79 cm Seat height: 34 cm
9.5 kg 0.116 m ³	3 6

Adjusting the tension

When cycling you are moving joints in the foot, ankle, knee and hip as well as stabilizing the joints in the arms and spine, using muscle tension, the Baroreceptors register pressure in the hands holding and steering the handlebars and the feet pressing on the pedals.

The brain is continuously working to adjust the tension and pressure, in response to the signals it receives, to make sure the movement fits the task, with regards speed and balance.

Tricycle, Large
Model 552.50

This tricycle is designed with a large front wheel enabling children up to 8 years of age to have fun on the playground. They will love to venture out on this trike.

Width: 58 cm Height: 71 cm	Length: 92 cm Seat height: 41 cm
10.5 kg 0.168 m ³	4 8

BikeRunner™ | Model 559.50
BikeRunner™ Large | Model 566.50

The BikeRunner is the perfect choice when children are developing their sense of balance. The bike is pushed forward using the feet.

Width: 46 cm Height: 62.5 cm Width: 45 cm Height: 72 cm	Length: 82 cm Seat height: 34 cm Length: 96 cm Seat height: 42 cm
 7.0 kg 8.5 kg	 0.080 m ³ 0.101 m ³
 3 4	 5 7

EasyRider
Model 553.50

Who will be the first on the playground to capture this great trike? You can imagine driving a Harley Davidson or a Formula 1 racing car.

Patent no. ZL201130404528.2

Width: 52 cm Height: 57 cm	Length: 81 cm Seat height: 19 cm
 11.0 kg	 0.161 m ³
 4	 7

Bicycle
Model 558.50

When riding this bicycle, the children have reached the freedom to explore the world. They can easily get around and use their motor skills.

Patent no. ZL201130425243.7

Width: 45 cm Height: 62 cm	Length: 80 cm Seat height: 34 cm
 7.5 kg	 0.091 m ³
 3	 6

PushBike
Model 560.50

Two rear wheels and no pedals make the pushbike stable and easy for children to maintain their balance while moving. A good start before driving a tri- or bicycle.

Width: 45 cm Height: 53 cm	Length: 66 cm Seat height: 27 cm
 7.5 kg	 0.082 m ³
 2	 4

Vestibular system

The canals and otoliths of the inner ear are both stimulated, when the body is moved forward, backwards or sideways compared to the surroundings, and turning the head to observe and navigate.

Rickshaw Model 572.50

New adventures lie ahead. A rickshaw provides lots of fun for two children – with one child as passenger, the other pulling. Seat with back support and a safety bar.

Width: 58 cm
Height: 59 cm

Length: 140 cm
Seat height: 22 cm

11.7 kg 0.269 m³

4 12

Scooter, Small | Model 556.50 Scooter, Large | Model 573.50

The scooter challenges the children's sense of coordination and balance. After driving on a tricycle, it is a new world to scoot around on 2 wheels!

5 10

Safety Roller™ Model 557.50

The Safety Roller provides maximum stability for children, who need to develop their balance and motor skills and children with reduced capabilities.

Patent no. ZL201130401705.1

Width: 51 cm
Height: 76 cm

Length: 83 cm

8.5 kg 0.123 m³

3 7

Push Wagon Model 571.00

This wagon with its sturdy box will give the children a lot of play value. The child may bring out deliveries in the form of sand or toys to their friends all over the playground.

Width: 48.5 cm
Height: 62 cm

Length: 59 cm

9.40 kg 0.211 m³

3 6

Taxi
Model 554.50

A taxi is lots of fun and provides many great play ideas. Children love the role-playing games bringing extra features into their games with friends.

Patent no. ZL201130404532.9

Width: 63 cm
Height: 61.5 cm
Length: 107 cm
Seat height: 35 cm

13.5 kg 0.258 m³

3 7

Twin Taxi
Model 555.50

A taxi for three children that opens up for social games and role-playing activities. The child can take his best friends for a ride, acting as a driver.

Patent no. ZL201430513216.9

Width: 71 cm
Height: 63.5 cm
Length: 103 cm
Seat height: 35 cm

19 kg 0.447 m³

4 7

Trailer
Model 570.50

This cool and stable trailer serves many purposes. The children can participate in role-playing by transporting sand to the construction site or toys from the sandbox.

Width: 58 cm
Height: 22 cm
Length: 76 cm

9.0 kg 0.116 m³

Kids Stroller
Model 568.00

Just the item for the child to take his or her best friend for a walk. The child will spend long periods of time walking another child or his or her favourite toy.

Width: 46 cm
Height: 64 cm
Length: 54 cm
Seat height: 31 cm

7.5 kg 0.114 m³

3 6

Police Model 562.50

Bad guys better watch out. This cool, black police trike has room for two little officers and is a natural centre for social activities on the playground.

Patent no. ZL201130424931.1

Width: 59 cm
Height: 61 cm

Length: 97 cm
Seat height: 34 cm

Fire Truck Model 563.50

The sandbox is on fire! But help is close by. This fun, red fire trike for two is ideally suited for role-playing and strengthens the development of social skills.

Width: 59 cm
Height: 61 cm

Length: 97 cm
Seat height: 34 cm

562, 563, 564 and
565 with STOP sign

Ambulance Model 564.50

Call the ambulance! There is a pretend sick little boy at the playground. Luckily, two medics are on the scene in no time on this exciting ambulance trike. Fast and fun.

Width: 59 cm
Height: 61 cm

Length: 97 cm
Seat height: 34 cm

School Bus Model 565.50

It is time for school! The driver will pick you up in a minute. This fun vehicle is excellent for role-playing with the classical scene of a driver picking up passengers.

Width: 59 cm
Height: 61 cm

Length: 97 cm
Seat height: 34 cm

TRY TO IMAGINE...

Tomorrow, I will take Karen for a safari in Africa. We will ride safari jeeps so we are safe from lions and snakes in the savannah. I will bring my camera to document the trip.

MINI VIKING

For day-care facilities and crèches
Suitable for ages 1-4

Finding new ways to move

The Mini Viking trikes and bikes represent a wide selection of products designed for use in day care facilities and crèches. They are suited for the kinds of motor skills children have at this age, and they are designed to help their development. The play value is high, and children

love the Mini Viking. The many different trike models help develop children's motor skills at an age when they are busy experimenting with using their own bodies, and finding new ways to move. That is why it is important that the Mini Viking line has an especially wide selection.

Tricycle, Low
Model 414.20

The development of children's motor skills is an aim in itself - and it should be fun. A good-quality tricycle for children as young as 1-year-old.

Patent no. ZL201130425574.0

Width: 43 cm
Height: 54 cm

Length: 61.5 cm
Seat height: 24 cm

5.3 kg 0.048 m³

1 4

Tricycle
Model 442.20

This is the classic children's tricycle with a foot plate and an adjustable seat. Many hours of playing await the child with this tricycle.

Patent no. ZL201130404534.8

Width: 44 cm
Height: 55 cm

Length: 57 cm
Seat height: 31 cm

4.89 kg 0.048 m³

2 4

Tricycle w/Tray
Model 447.20

It is time for the teddy bear to get out and see the world. Or the favourite doll to explore the Sahara. A popular classic with fixed-load platform.

Patent no. ZL201130404547.5

Width: 44 cm
Height: 54 cm

Length: 68 cm
Seat height: 28 cm

6.5 kg 0.076 m³

2 4

Trailer
Model 437.20

It is easy to attach this trailer to models 414.20 and 442.20. Ideal for transporting sand, toys, and other things that children love to cart around the playground.

Width: 40 cm
Height: 16 cm

Length: 60 cm

3.8 kg 0.049 m³

Easy Rider
Model 409.20

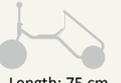

Now even the youngest drivers can cruise the playground on their very own Harley Davidson. It helps the kids role play, gain independence and an "I-can-do-it" spirit.

	
Width: 45 cm Height: 43 cm	Length: 65 cm Seat height: 13 cm
 5.5 kg	 0.066 m ³
 2	 4

Ben Hur
Model 411.20

Roman soldiers fighting a mighty battle - this tricycle makes it easy for more children to play together. Passengers standing up can hold on to the safety bar. Patent no. ZL201130404534.8

	
Width: 43.5 cm Height: 54 cm	Length: 75 cm Seat height: 23 cm

Height: 70 cm

Length: 96.5 cm

6.4 kg 0.046 m³

3 4

Using pedals

The Winther Tricycles are more stable being supported on the ground by the three wheels, but now the feet are not on the ground but on the pedals, which gives a little more challenge to the Utricle and the canals to keep the body up right, while they still register the forward movement and navigating.

Sack barrow Model 416.20

Children love to move and transport things with the sack barrow. Are we out on a farm? Or are we loading at a factory? Endless role-play options.

Patent no. ZL201130404542.2

Rickshaw Model 408.20

Fun for two children – with one child as passenger, the other pulling. Comfortable seat, armrest and back support to prevent the child from falling out.

Patent no. ZL201130401688.1

TRY TO IMAGINE...

Julia is always fun to play with. She has the funniest ideas. One day she suggested we should ride our bikes as if they were dolphins in the ocean. Imagine that!

MINI VIKING

For day-care facilities and crèches
Suitable for ages 1-4

Very high play value

The Mini Viking trikes and bikes represent a wide selection of products designed for use in day-care facilities and crèches. They are suited for the kinds of motor skills children have at this age, and they are designed to help their development. The play value is high, and children love the Mini Viking.

The many different trike models help develop children's motor skills at an age when they are busy experimenting with using their own bodies, and finding new ways to move. That is why it is important that the Mini Viking line has an especially wide selection.

EN71 · ASTM F963

Tricycle, Low
Model 414.14

The development of children's motor skills is an aim in itself - and it should be fun. A good-quality tricycle for children as young as 1-year-old.

Patent no. ZL201130425574.0

Width: 43 cm
Height: 54 cm

Length: 61.5 cm
Seat height: 24 cm

5.3 kg 0.048 m³

1 4

Tricycle
Model 442.14

The classic children's tricycle with a foot plate. Hours of playing await the child - also with a trailer attached.

Patent no. ZL201130404534.8

Width: 44 cm
Height: 55 cm

Length: 57 cm
Seat height: 31 cm

4.89 kg 0.048 m³

2 4

PushBike for one
Model 431.14

Suitable for the very young. The double front wheels provide extra support during the training of balance skills. Propelled forward using the feet.

Patent no. ZL201130404549.4

Width: 43 cm
Height: 41 cm

Length: 54 cm
Seat height: 24 cm

4.89 kg 0.048 m³

1 3

Safety Scooter™
Model 430.14

The toddler's first push along scooter. The design with 4 wheels makes it stable and attractive to ride for the smallest kids. Robust and durable.

Patent no. ZL201130424923.7

Width: 36 cm
Height: 33 cm

Length: 55 cm
Seat height: 22 cm

4.8 kg 0.041 m³

1 3

Racing Scooter™
Model 438.14

The toddler's first racer. It is not very big, but it is robust and durable. The anatomically correct design makes it comfortable to ride.

Patent no. ZL201130401701.3

Height: 38 cm

Length: 62 cm
Seat height: 24 cm

4.5 kg 0.043 m³

1 3

Mini BikeRunner
Model 412.14

A great BikeRunner for children who have not got the hang of riding a bike or a scooter. Its low step-through design makes it easy to get on for even very small kids.

Width: 41 cm
Height: 43 cm

Length: 73.5 cm
Seat height: 31 cm

4.5 kg 0.030 m³

2 4

How biking affects your proprioception

When sitting on the saddle, or with the feet pressing the pedals or the hands holding the handlebar the brain recognizes the contact with the bike and acts as if it has become an extension of the body.

Wide-Base Scooter
Model 449.14

A robust scooter with three wheels and a large foot plate. Offers maximum stability. Suitable even for very young children.

Patent no. ZL201130424900.6

Width: 43 cm
Height: 60 cm

Length: 60 cm

5.5 kg 0.048 m³

2 4

Twin-Wheel Scooter
Model 433.14

A challenging scooter that helps develop children's motor skills and sense of balance. The two rear wheels provide added stability for beginners.

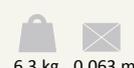

Patent no. ZL201130425239.0

Width: 43 cm
Height: 72 cm

Length: 84 cm

6.3 kg 0.063 m³

2 4

Scooter
Model 434.14

A classic scooter that provides a good challenge for children's motor skills and sense of balance. A world of fun at any playground with young children.

Width: 43 cm
Height: 70 cm

Length: 96.5 cm

6.4 kg 0.046 m³

3 4

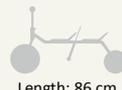

Taxi
Model 413.14

A trike for two children, which encourages the driver to take his best friend for a ride around the playground. Hours of fun awaits.

Width: 42 cm
Height: 53.5 cm

Length: 86 cm
Seat height: 25 cm

6.38 kg 0.121 m³

1 4

Tricycle w/Tray
Model 447.14

It is time for the teddy bear to get out and see the world. Or the favourite doll to explore the Sahara. A popular classic with fixed-load platform.

Patent no. ZL201130404547.5

Width: 44 cm
Height: 54 cm

Length: 68 cm
Seat height: 28 cm

6.5 kg 0.076 m³

winther ACCESSORIES

Wall Rack and Cycle Rack

Take care of your products

Even the strongest equipment suffer unnecessary wear unless it is looked after properly. Two-wheelers and scooters last longer if you put them away carefully.

To help with this, Winther has developed two different storage systems that make it easy to keep play areas and bike sheds tidy and in good order. One rack is wall-mounted, and the other is a combi-rack for three two-wheelers.

NEW

NEW

Wall Rack | Model 391.44

Wall-mounted rack for trikes and bikes. Saves lots of floor space. The front wheel is placed in the rack. Items are kept out of the way.

 
1.0 kg 0.004 m³

Cycle Rack | Model 391.45

Cycle rack for three scooters or two-wheelers that keeps them tidy and well-ordered. Should not be mounted near children's play areas.

Comes fully assembled in boxes of two.

 
4.5 kg 0.044 m³

TRY TO IMAGINE...

Whenever we head out for a trip in the Kiddy Bus, we always have a good time. Sometimes we pretend that the bus is a carriage on the roller coaster.

Tommy, 3 years

Other Senses

The tactile sense is stimulated by the wind, air temperature, sun, rain felt on the skin of the face and body. Also, the smell and sound are stimulated.

TURTLE KIDDY BUS

For day-care facilities and crèches. Suitable for ages 6 months up to 3 years (max. 15 kg)

A great trip for the children – and their adult!

The Turtle Kiddy Bus makes children want to go for lots of outdoor rides. It makes outdoor activities easier and safer for both children and adults. The Kiddy Bus is not only robust, it also features a well-thought-of design that focuses on safety, durability and ergonomics. It is combined with a number of practical details and - of course - room to do what children do.

The Kiddy Bus is available in different models, with room for both four and six children aged 6 months up to 3 years (max. 15 kg). This makes the Turtle Kiddy Bus a great advantage in day-care facilities and crèches. It is also useful in fun parks, theme parks and zoological gardens.

The Turtle Kiddy Bus is intended for use on pavements, walkways and roads.

Easy to push, easy to steer, easy to love

We all know that children and their gear can be quite heavy. We have therefore focused on the ergonomics of moving the Kiddy Bus around. The Kiddy Bus is made of plastic and aluminium, which keeps it extremely light, and makes it easy to push.

The front wheel turns, which makes it easy to maneuver the Kiddy Bus and change direction. There is no need to lift the Kiddy Bus to turn corners.

The children sit in pairs opposite each other, making it easy to talk with their friends. They get in and out through a side door, just like in a real bus. It is fun for children, and it saves adults the strain of repeated heavy lifting.

Design: Leif Hagerup

Learning by Moving

All in all the biggest benefit is learning new skills by joyful play with multiply repetitions, failing and trying again which create this unique myelination process in the brain, where the nerves gets extra insulation of its axon enabling them to transport the signals/information faster, enabling you to get really good at what you are doing.

Therefore, it is important to challenge children physically in many different ways, so they keep exploring the opportunities of the brain and body.

WINTHER PLUS

For day-care facilities, crechés,
kindergartens and private use

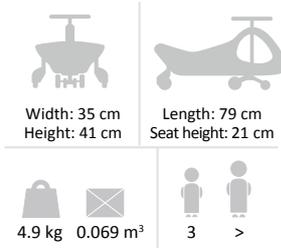

Winther PlasmaCar

Model 951.00 red | Model 951.01 blue

With its sleek lines and low profile there is no doubt that the PlasmaCar is built for race. But there is no need for gasoline. The PlasmaCar is propelled by a renewable and inexhaustible resource: kid-power! And it is easy to operate. A sideways wiggling motion of the child's body is all it takes. Absolutely safe, absolutely fun! Not recommended for use on hardwood floors or laminated flooring.

- Maximum load: 55 kg on uneven surfaces. 100 kg on smooth surfaces
- Built to last: High quality plastics
- No sharp edges
- No pedals or gears
- No batteries required
- Very simple and safe to operate

Bike Helmet

Model 192.55

Children's safety helmet with size adjustment and adjustable chin strap with safety closure. Children must not use this helmet when climbing or during other activities where there is a danger of strangulation.

Size: 52-56 cm

Winther and Gonge - playing together

Winther produces trikes and bikes and other wheeled toys for “learning by moving”. Gonge produces toys and educational products that stimulate play and movement for “creative learning”. These two philosophies match so well that merging the companies was a natural development.

Winther and Gonge both supply kindergartens, schools and other institutions globally. The two companies also supply the retail market. And the range of products of the two brands complement one another to offer a wide variety of ways to children playing, moving and learning. Gonge was merged with Winther on 1 July 2010.

**Ask for Gonge’s catalogue at win@a-winther.com
and learn more about Gonge’s products at www.gonge.com.**

Winther Family Bikes

The Kangaroo family bike for two or four children gives freedom of movement for small groups of children – and for institutions and childminders. Find more information about this product as well as contact details on this website:
