HPW-DUST HIGH PRESSURE DUST SUPPRESSION

WHAT IS A HIGH PRESSURE DUST SUPPRESSION SYSTEM?

HPW-DUST High Pressure Dust Suppression System is the most innovative dust control system for mobile machinery in demolition, street cleaning, quarrying, crushing, recycling etc. It produces atomized water mist to suppress the dust and prevents the emissions from spreading to the environment.

BENEFITS

- Targeted water mist to the dust source
- Minimal water consumption
- Reduces health hazards at worksites
- Saves time, space, labor costs and water
- Reduces PM10 dust concentrations

FEATURES

- Effectively binds dust emissions
- Small droplet size
- Cabin operated
- A washing gun for pressure washing
- Optional Double Dust boosting system

APPLICATIONS

- Street cleaning
- Demolition
- Recycling
- Quarrying
- Mining

MACHINERY

- Excavators
- Loaders
- Tractors & Agricultural Machinery
- Crushers & Screeners
- Street Sweepers, Cleaning Machinery

OUTPUT CHARACTERISTICS
