Slovakia, Czechia, Austria, Brazil, Turkiye, Portugal
September 2017 - June 2024

Bachelor in Architecture

Bachelor in Information Services Design

Masaryk University - Czechia
September 2022 - Present

PROFILE

My background in architecture provides a strong foundation for UX/interaction design. Architecture teaches a human-centered approach, focusing on the needs and comfort of users, whether in physical or digital spaces. This experience in creating functional and aesthetically pleasing environments translates directly to designing intuitive and engaging user experiences. My skills in spatial visualization, attention to detail, and empathy for users enable me to craft solutions that enhance both usability and satisfaction.

EXPERIENCE

Interaction Design
MUNI September 2023 - Present

Classroom Renovation for Children with Developmental Learning Disabilities

User Experience Research
MUNI September 2023 - Present

Mix of Quantitative and Qualitative User Experience Research
