## The European diabetes community welcomes the new EU Initiative ‘Healthier Together’ to reduce the burden of non-communicable diseases

The European Diabetes Forum (EUDF AISBL) welcomes that the European Commission is working on a new initiative ‘Healthier together’ to support EU countries in reducing the burden of non-communicable diseases.

The European diabetes community is committed to support the implementation at country level of the focus areas laid out by the European Commission: promotion and prevention, better knowledge and data, screening and early detection, diagnosis and treatment management, and quality of life of patients.

We believe this new initiative has the potential to be a gamechanger in the fight against non-communicable diseases and the diabetes community looks very much forward to contributing to the development of specific objectives and actions in the course of 2022.

We look forward to the next steps and engagement to improve the lives of people living with non-communicable diseases such as diabetes.
