Sytems – Network Engineer

MarineSecure is a fast-growing IT company in the superyacht industry. We operate worldwide with 24/7 service in a niche market of the maritime sector, providing IT consulting services to the most astonishing private vessels in the world.

Due to the growth of our business, we are looking for Systems - Network Engineer, who wants to work on cutting edge projects, designing and supporting high-quality infrastructure for superyacht owners worldwide.
As our new colleague you will be responsible for supporting and guiding our junior staff in their work, ensuring that client's excellence and security of IT systems and networks on client's yachts worldwide. On a daily basis, your main responsibilities would be:

- Build and design advanced IT (Cisco) networks for superyachts.
- Analyze and test existing hardware, software, and networking systems.
- Troubleshoot: quickly and efficiently resolve technical issues with networks, hardware, and software
- Take charge of projects or provide IT technical support and advice to project managers on the most suitable IT solutions during projects
- Deploy and support infrastructure on Premises and in the Cloud
- Protect our customers organization from cyber threats. Project, configure, implement, and maintain all security platforms and any other related software, such as anti-virus, routers, Anti-SPAM, switches, intrusion detection or intrusion prevention, firewalls, cryptography systems, SIEM, and MDM
- Guarantee network security best practices are executed through auditing: router, change control, switch, firewall configurations, and monitoring
- Work collaboratively to ensure customers have devices that are fully operational and secure

Qualifications:
- You demonstrate flexibility, client-orientation, problem solving attitude and ready to take ownership
- You like to work independently and can communicate clearly with customers and colleague
- Bachelor's degree in computer science, information technology, or similar
- 5+ years of experience in System Management and/or Network Management, and/or Security Management and/or Cloud Management
- Have experience with Network management (Cisco, Juniper)
- Experience with Operating Systems management (Linux, Windows)
- You have experience with cyber-security
- Fluency in English. Dutch and/or German, Arabic skills will be a great asset

What do we offer
- Interesting job, in a young, fast-growing and friendly team in a hierarchy-flat organisation. Opportunity to grow professionally and travel internationally to client's sites (up to 25% of working time).
- A 40 hour contract with a probationary period of 1 / 2 months.
- Laptop, iPhone and subscription from the company
- Coverage of public transport expenses
- Competitive salary and Possibility of a pension plan
- Training budget opportunities
- Office in the center of Amsterdam, reallocation support for new hires from EU-states

If you feel excited about this opportunity, we want to hear from you careers@marinesecure.com. We are an equal opportunity employer and value diversity at our company. We do not discriminate based on race, religion, color, national origin, gender, sexual orientation, age, marital status, or disability status.
