

Developing and improving the entrepreneurial skills of people with a migration background

WE CAN is a 2-year project funded by the European Erasmus + fund that aims to stimulate and support the integration of migrants in Europe through social innovation. The project seeks to reverse the disproportionate economic effects resulting from COVID-19 pandemic on migrants, through social innovation by strengthening the role of migrants in the local community through (social) entrepreneurship.

WE CAN offers migrants the opportunity to follow activation and training programs to strengthen their entrepreneurial capacities or to improve the skills needed to act as community navigators within their own communities. WE CAN will use the strength and expertise of adult education and relevant civil society organizations at the local and international level (networks, multi-stakeholders platforms) to deliver the activation and training programme.

WE CAN will be implemented in the **Netherlands, Germany, Italy and Spain** to jointly find solutions to common problems in the field of socio-economic inclusion of migrants.
