### **Registration is open!**

The COVID-19 pandemic has shown that there is a need for alternative solutions for the care sector. Our TeleNursing training provides nurses and other healthcare providers with the tools to provide effective care remotely. The use of the platform and the content of the training is initially available to a limited number of healthcare professionals.

Registration for participation in the training is open and interested parties can register using the QR code.

TeleNursing's overarching goal is to develop a digital transformation plan for the healthcare sector to improve the digital skills and competencies of healthcare professionals. The development and implementation of the training is a key component of this plan.
