ABOUT

ONLINE LESSONS

COMPARING FOUR COUNTRIES

WHAT HAVE WE LEARNED?

- **Different countries use different online platforms like:**
 - Frog, Google Classroom, Seneca Learning, Zoom, Skype, Teams, Moodle, Google Forms.
- **Students want to have more interaction during lessons.**
- **Students want to have more interaction with their teachers.**
- **Positives of remote learning are:**
 - Independence, more time for extracurricular pursuits, students who live more remote have more time, room for more innovative ways of learning/teaching.
- **Negatives of remote learning are:**
 - Lack of collaboration with classmates, less teacher support, university preparations are put on hold, no practical education.
- **Training actors could be used for more online practical education.**
- **Not all students have the same privileges when it comes to internet access, technical tools, etc. Teachers should be aware of this.**
- **Make sure teachers as well as students know how to use the online platforms.**
- **Don't use too many platforms, this becomes confusing for the students.**
- **Keep exams and tests going, it gives students the motivation to keep learning.**
- **Give students enough time to answer the questions during online tests.**
- **Make the courses more suitable for online learning, separate main and side issues.**
- **Last but not least is hard to get used to this new way of learning, stay involved with your students.**
