Ayurvedic all-in-one-package:

During your first visit we will discuss your current concerns and symptoms, as well as your detailed health history.

The objective during this consultation is to create a complete physical, mental, emotional, and spiritual picture of who you are through discussion and diagnosis.

After your initial consultation, a follow-up visit will be scheduled within short time.

I will present my diagnosis and will discuss the recommendations and therapy plan.

1-4 weeks later will be a follow-up consultation.

At this time we can discuss your experience with the given recommendations, make any necessary changes,

or explore any challenges you may have experienced.

Symptoms will be reviewed for any changes/improvements.

As Ayurveda is focused on treating the root cause of disease,

a last follow-up visit will be held for incorporating recommendations over time.

Regular, guided effort will have the most profound impact on your health and well-being.
