BACKGROUND PERFUME.SUCKS

PERFUME.SUCKS is the scent collection of Swiss perfumer Andreas Wilhelm.

For over twenty years, he has been creating perfumes on behalf of manufacturers around the world.

Perfumes that are overlaid with stories that are conveyed to you through advertising images and packaging. The contents of the flacons are mystified, the ingredients nowhere identified.

For his collection, Wilhelm relies on full transparency. The bottles are transparent, the ingredients printed on them. For him the focus is on the composed scent and nothing else.

We let the scent tell the story. Wanna smell it?

ATTITUDE PERFUME.SUCKS

A perfume stuns all the senses. A perfume creates an illusion. A fictional story that is told to you through the advertising images, the packaging, the bottle and a mysterious liquid.

You can no longer really perceive the scent itself. It is superimposed by this story.

That's why we say:

PERFUME.SUCKS

Our mission is to focus on full transparency. Our recipes are common good, there for you to spread, hack, wear, enjoy.

Smell the story. And make it to your own.

COLOR COLLECTION PERFUME.SUCKS

The color collection consitst of 7 different perfumes. All of them have been developed for a certain project but they have been refused by the customer. As the perfumers heart was crying we wanted to give these amazing blends a second chance and we started the brand in 2016.

Since then the range has grown up.

The collection is available in 30 and 50 ml.
