President's Report:

Hi All

Who would have thunk someone talking about insurance would have been interesting? But John Barkers presentation about the effects of Covid on the industry was very insightful. Thanks Reesy for organizing that for us.

All board members please note the next board meeting will be on Tuesday 2nd Feb, 7.00am at One Pear Tree.

On the next page there's an update from Mikaela Fowler the Ray White coordinator of last years 'Little Ray of Giving' program. Donated present numbers were down on previous years which is to be expected and they weren't able to wrap the presents which were distributed by Anglicare. All this said 93 presents for under privileged kids at Christmas is still a great effort during these difficult times, so well done to all that assisted in the program.

International, Youth & Vocational Director John Albery, advised that our candidate for the National Youth Science Forum Charlotte Thompson, is having a fantastic time with all the programs and guest speakers she is getting to see, albeit on line. Can't wait to have as a guest to tell of her experience.

Tony Carter is going to look at rebooking our weekend away at Flowerdale in May.

History was made at our club meeting last week with Stace being the 1st person ever to be sacked as box holder at the fines session, by the Sgt Brendan!!

Cheers

Shane

Ray White Frankston's: Little Ray of Giving Update:

I believe we had 97 gifts delivered, a little light on from our previous years but it was a difficult year and with our office closed due to regulations it proved difficult to receive gifts.

Unfortunately we didn't get a photo of the entire pile of gifts but this is quite a few of them!

International, Youth and Vocational:

Latest from Charlotte and the NYSF:

We are arranging a date in the very near future for guest speaker status!

Message from Charlette: "We are just starting the third week of the NYSF and so far, it has been amazing! The program has been really interesting, really eye-opening to all the different career opportunities available, and really engaging. My favourite parts so far have been: a lecture on venomous animals and the possibilities for use of venom in the medical scene, a lecture on ancient genomics, a live-cross to Casey Station in Antarctica with the Australian Antarctic Division, and a question-and-answer session with Dr Karl Kruszelnicki!

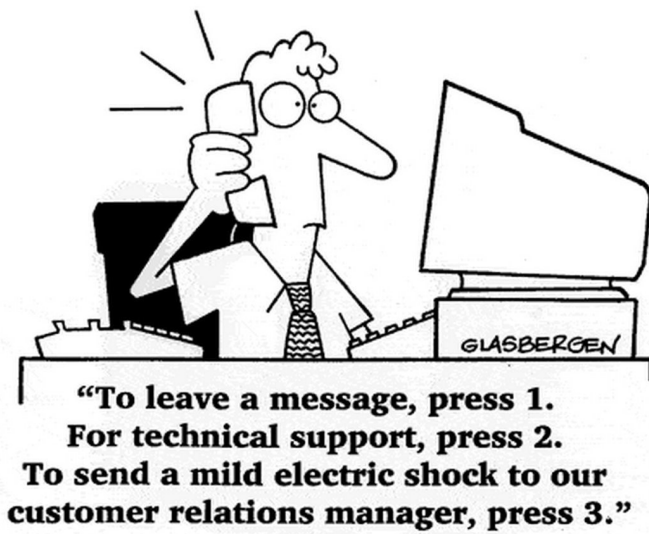

Everything has been operating smoothly from a technology point of view with very minimal technical difficulties, and I have heard whispers that they are trying to organise some opportunities for Victorian and NSW students that missed out on the in-person visits due to COVID.

The program has managed to stay engaging for the students and staffies by organising interest-group meet-ups, trivia, games and even a formal dinner tomorrow night.

I have just finished the rotary presentation, which was quite interesting and when over Rotary, Rotaract, and RYLA".
