

Given our strong focus in research, our team would like to know how you assess strengths and weaknesses of research papers. Please read the below paper and write a 250 word (maximum) critique. Your critique should include an assessment of both strengths and weaknesses of the papers.

Paper: [Neuroendocrine Response to Fenfluramine Challenge in Boys](#)

What are we looking for?

We would like the critique to contain 3 components.

1. Brief summary of the paper with its significant findings.
2. Strengths including examples such as external/internal validity, power, controls, blinding, results and data interpretation, etc.
3. Weaknesses including examples such as external/internal validity, power, controls, blinding, etc.
4. We would like the critique organized in this order while abiding by the word limit.

Please submit your assessment in .docx or .pdf format to caribbeanresearchgroup@gmail.com. The subject of the email and the file name should include your first and last name. Your application will not be considered complete until this is submitted.
