

The power of seaweed in a fibre

OTTO

Future since 1901

Seaco organic

by Gebr. Otto

Our quality Seaco organic is a blend of finest, GOTS-certified organic cotton with the innovative cellulose fibre SeaCell™. The perfect combination of the best raw materials, high-tech spinning and environmentally friendly dyeing results in a highly functional yarn with a wide range of applications.

The ground seaweed, which are integrated permanently wash-resistant into the SeaCell™ fibre, protect the skin from cell-damaging free radicals. The natural moisture level of the skin enables an active exchange of the minerals, vitamins and trace elements that are richly present in the seaweed. These beneficial substances stimulate the cell regeneration process and have a soothing, anti-itching and anti-inflammatory effect.

The fluffy, silky yarn quality guarantees a noticeable sense of well-being with maximum comfort.

Seaco organic consists exclusively of renewable raw materials which are environmentally friendly and 100% biodegradable. The seaweed used for the SeaCell™ fibre is harvested exclusively from the unique ecosystem of the Icelandic fjords.

Fields of application

- | health & wellness textiles
- | sports & leisure textiles
- | bed linen
- | day & nightwear
- | socks & stockings

OTTO
SeaCell™

70% ORGANIC COTTON (CO)
30% LYOCELL (CLY)

Good to know

- | Sustainable manufacturing process of fibres & yarns
- | Seaco organic meets the requirements for the product label
MADE IN GREEN by OEKO-TEX®
- | Good pilling values through high-quality organic cotton & selected spinning process
- | Durable with high strength
- | Fibre fineness & length SeaCell™: 1.7 dtex, 38 mm
- | Min. 25% SeaCell™-fibre content required in the finished textile
- | Raw & dyed

Features

- gentle to the skin
- skin protection
- high wearing comfort
- renewable raw materials
- sustainable production
- biodegradable
