

Thesis at KONVOI

At KONVOI we develop a mobile, preventive security system for parked trucks in road freight traffic.

With optimized radar sensors we create a detection area around the truck, which enables us to analyze movement patterns of persons to potentially initiate security measures. For this purpose we develop embedded systems based on our customer requirements. Since October we have received the EXIST funding program of the BMWi and moved into our own office in the StartUp Dock of the TU Hamburg. Here we are currently working on product development in a small, communicative team and need your support!

Writing a bachelor's or master's thesis often feels like a burden at the end of your studies, but it really shouldn't be. Rather, it is a time that can also be used to gain practical experience in specialist areas or to establish contacts in the corporate world. So there are good reasons to take valuable time for your thesis. We offer many opportunities for this, which we will be happy to explore with you. In addition, we maintain very good contact with the Institute for Technical Logistics (ITL) at the TU Hamburg, which is headed by Prof. Kreuzfeldt, who has also taken on the mentorship during our funding period. This means that we will of course help you to find a suitable faculty and to fulfill scientific requirements.

What you bring along:

- The desire to learn new things and to reach your limits (just like us by the way)
- Abilities for analyzing and application development close to our customer requirements
- Basic knowledge of the programming languages C or C++ (and Embedded C)

What we have at KONVOI:

- Fun in daily work routine, which is mainly determined by many degrees of freedom
- Excitement for new things and openness to change
- Transparent communication and honesty are our strengths

Ideally, you feel like trying your hand in an independent, super fun team while tackling software projects with lots of question marks. Just get in touch with us via email, via WhatsApp or call us directly. We look forward to hearing your story and your interest in joining us. We would be happy to introduce you to KONVOI and look forward to hearing from you.
