# **Deliverable 1: Minutes of the kick-off meeting**

Version: 2020-10-28

### 1. Introduction

The kick-off meeting for the RFCS project ControlInSteel took place on 14.10.2020. Members of all project partners were present:

#### Participants

- Francesca Marchiori, RINA Consulting CSM
- Maddalena Murri, RINA Consulting CSM
- Joaquin Ordieres-Meré, Universitas Polytechnica Madrid (UPM)
- Valentina Colla, Scuola Superiore Sant'Anna (SSSA)
- Stefano Dettori, Scuola Superiore Sant'Anna (SSSA)
- Moritz Loos, Betriebsforschungssinstitut (BFI)
- Marcus Neuer, Betriebsforschungsinstitut (BFI)

## 2. Timeline

## 3. Minutes

- Introduction of all partners
  - Expectation of the project
  - Work committed so far
- Presentation of project administration
  - Timelines
    - The project timeline was discussed with respect to the deliverables
    - Discussion of the table of deliverables (attached to this document)
  - Review of project proposal
    - Mapping of solution space onto impact space
    - An important remark was made here, noting that the EU will also be highly interested in the barriers, roadblocks and problems encountered while putting a specific technology into place. Here, the team decided to add this "issues/difficulties"dimension to the portfolio of analysis spaces. An analysis of this dimension will help to identify potential counterstrategies or tools that foster project success.
    - Ontologies vs. Taxonomies
    - Discussion about DissI2M technology and how to reuse it for the ControlInSteel project
- Discussion of the project list
  - The finalized list has to be compiled until the end of the year
  - Some projects have to be considered to be added to this list
  - This point is work in progress
- Topic: Covid-19 crisis and its effect on the project
  - The project has two mayor aspects: a) the theoretical review of the existing projects and b) the conduction of workshops.

#### **CONTROL**<sup>N</sup>**STEEL**

- The theoretical aspects will remain unaffected by the crisis, as most of this work relates to retrieving information and evaluating the project results.
- The conduction of workshops is heavily affected by the current situation. Here, the project team refined their dissemination strategy in order to adapt to the situation, putting focus on alldigital webinar and lectures, with an emphasis on long-term usage. That means, the achieved dissemination material is planned to be available on the website even long time after the project has finished.

- Scheduling of dissemination events
  - To adequately reach the target audience, the event planning is of great importance. Here, the team agreed on rigid time plan for "save-the-date" announcements, Abstract-retrieval and performance of the webinars/workshops.
