

DECISION IMPLEMENTATION

After the decision is before the next decision. What's coming next?

Many implementation steps can already be thought about and prepared before the final decision is made.

COMMUNICATION

Who informs whom about what?

Do we have to follow a certain order in the flow of information?

IMPLEMENTATION

Who goes on with what specifically?

What framework conditions are needed?

FEEDBACK

By whom, for what, in what way, until when?

How do we know that the decision was the right one?
