

## Fitting instruction luggage rack Ducati Scrambler (all Scramblers incl. Desert Sled)

**Parts list:**

- 1x luggage rack
- 1x left bracket
- 1x right bracket
- 4x mushroom head screw M8x16
- 4x cylinder head screw M8x20
- 4x Washer D8,5
- 4x self-lock nut M8

**tools:**

- hex wrench (Allen key) 5mm
- hex wrench ( Allen key) 6mm
- (ring) spanner 13mm

to mount the luggage rack the Ducati sub frame for side bags is needed! The luggage rack is designed for this bracket and the frames for the bags can be mounted together with the luggage rack.

**1.**

Mount the left and ride bracket under the plate using 2x mushroomhead screw M8x16 on each side. Bolt on a M8 self-lock nut and a washer on each screw from the downsite  
**Don't tight the nuts, done later!**

## 2.

Fitting the rack at the bike.

Position the rack at the mounts from the backside of the bike. Screw in the 2 cylinder head bolts M8x20 on each side and tight them with the 6mm Allen key

## 3.

Now align the plate on the brackets and tight them with a 5mm Allen key and a 13mm wrench for the nut at the bottom.

**FINISHED! 😊**

**First mount of the luggage rack is done now and can be easily mounted and removed within 1-2 minutes. If you already want to use the frames for the side bags combined with the rack, they are positioned on the outside of the rack brackets and bolted on together.**
