WATER BOTTLE FROM SUGAR CANE

A reusable Sugar Cane Bottle, filled with English spring water, that is just too precious to leave behind.

Bottle Up encourages you to keep refilling your bottle.

The affordable sustainable solution to single-use plastic. When you need water on the go, but don't want to leave any waste behind: Bottle Up. The sugar cane bottles are BPA-free and easy to clean so when you're finished you can refill your bottle with tap water and use it again and again.

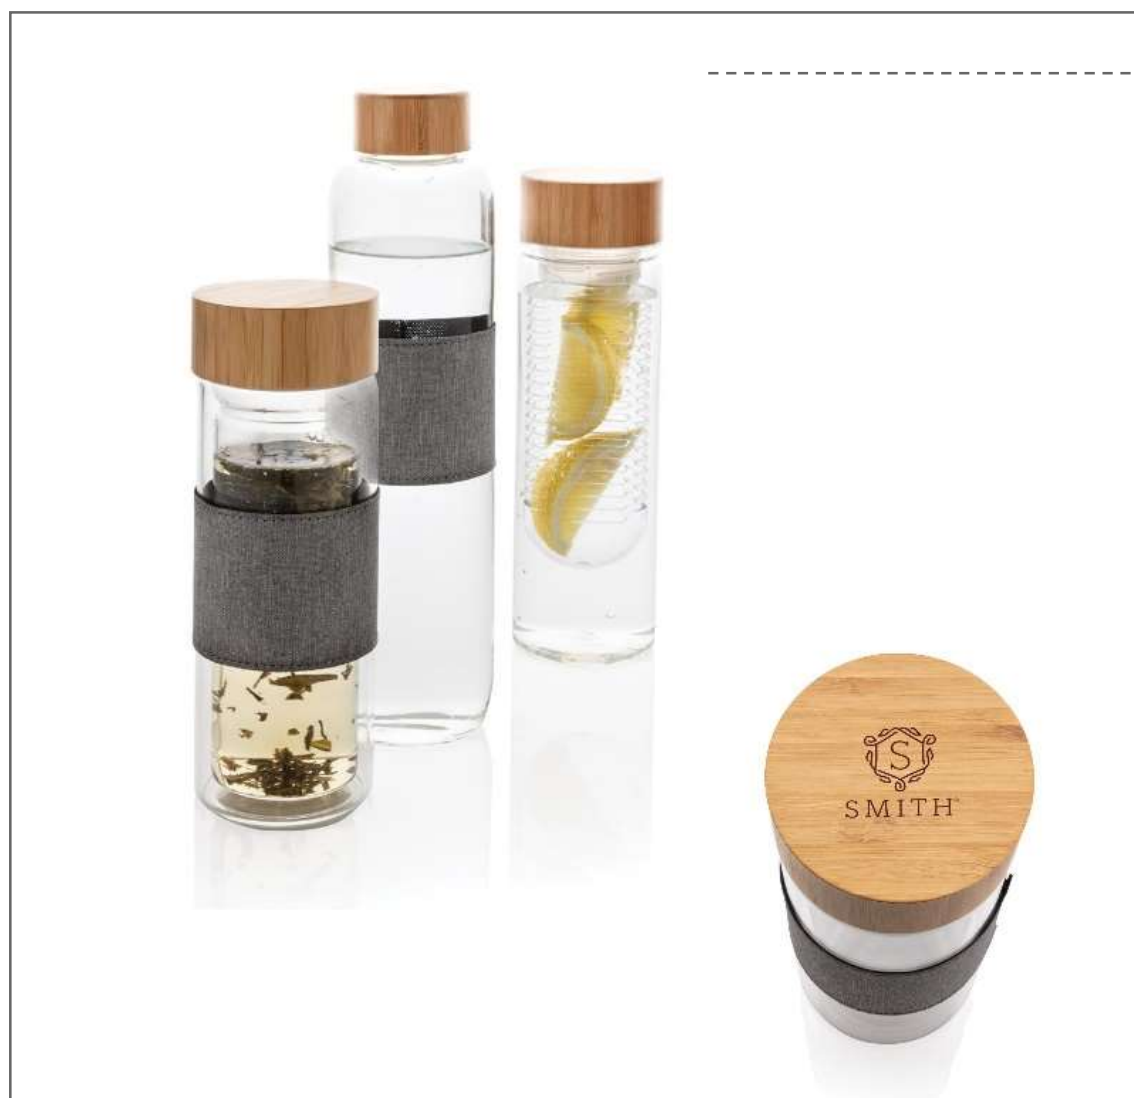

Starting-price : 2,59EUR/Net*

DOUBLE WALL BOROSILICATE GLASS BOTTLE

No more buying plastic water bottles from the shops but reuse your own durable bottle from the Impact Collection.

By using durable glass and stainless steel materials you improve the re-usability of products compared to single use products. With the focus on water, 2% of proceeds of each sold Impact product will be donated to Water.org. Supporting your sustainable lifestyle, the Impact double wall glass bottle with bamboo lid reduces your plastic waste and improves your hydration habits.

Made of borosilicate premium-quality glass, this double wall bottle is extra resistant to big thermal changes, so it's safe to carry your hot tea too. A beautiful sleeve completes the look. Capacity 360ml. BPA free.

NATURAL BOTTLE

This reusable water bottle is made from bamboo (lid) and sugar cane (bottle). This means your drink has no artificial plastic taste or smell.

Both plants absorb CO₂ from the air while growing. So, by using this natural bottle, you're helping to reduce greenhouse gasses and put an end to single-use plastic bottles.

BIO BIDON

The Bio Bidon – the first organic bottle in the world. Made in Europe! This revolution in bottles is not only great for sport as part of a healthy lifestyle – it also contributes to a better environment. The organic bottle neither smells nor tastes of plastic like regular plastic bottles do, and of course, it's also BPA-free.

The Bio Bidon is manufactured in an environmentally friendly way: no scarce raw materials are used to produce it – only renewable sugar cane. Cultivation of sugar cane absorbs CO2 and reduces greenhouse gas emissions. The materials used meet food safety requirements and are fully recyclable.

An added benefit is that the Bio Bidon neither smells nor tastes like plastic. We want to encourage people to drink tap water as a healthy, cheap and environmentally friendly alternative to water sold in disposable plastic bottles. You can use the Bio Bidon not only while doing sport, but also while you're on the go instead of disposable bottles. In summary: a sustainable and healthy alternative to a regular plastic bottle!

GLAS REBOTTLED

These glasses (and bottles) used to be wine bottles! Every year more than 440 million wine bottles will be thrown away after 1 time use. Rebottled wants to be the first glass producer that works with circular glass work. Instead of throwing away the bottles they want to create new products.

Rebottled actively partners with the community to divert thousands of wine bottles every week that would have been otherwise thrown away, working towards a 10 million bottle rescue mission. Once collected they then transform the bottles into fun and functional glassware and decor such as planters, candle holders and vases. If you collect your own glass bottles and bring it to us, we can upcycle it into new products! It is possible to print your logo with silkscreen printing method.

RICE CUP 2 GO

There's a lot of rice in the world. Which means there's also a huge amount of rice-related waste in the form of leaves, husks and more. And now, coffee cups are being produced from this waste.

- Cups are made of rice husk fibres (80%) and lignin starch (20%)
- Available in two sizes
- Can be safely used in the microwave and placed in the dishwasher
- Global food standards agencies and health regulations including FDA, LFGB, SGS, ROHS, TUV and REACH have certified the products as safe, and the cups have been patented.
- The cups are melamine-free and BPA-free, as well as fully decomposable. Composting takes around two to three years on a compost heap, and there are zero chemicals in the cups that can harm the natural environment.

PLA & CORK CUP

This natural, reusable coffee mug is going to be the envy of your colleagues when it's sitting on your desk at the office. And the way it's made is the perfect combination of design, functionality and sustainability.

The exterior of the mug is made from 100% FSC-certified cork, which is both biodegradable and renewable. The interior of the mug is made from a compostable material called polylactide (PLA). The two are fused together using a patented technique (that doesn't involve glue) to create a double wall that's not only sustainable but also keeps your drink warm for hours. And the mug can even go in the dishwasher – which is handy!

CUP OF COFFEE-GROUNDS & SUGAR-CANE

What could be better to turn into a coffee cup than the very ingredients that go into making the drink... coffee grounds and sugarcane!

The cup even smells like coffee, which adds to the sensory experience – whether it's to wake you up in the morning or to give you that bit more energy in the afternoon.

The Coffee Based material is a mixture of used coffee grounds and sugar cane ethanol. The used coffee grounds are a waste stream from the coffee industry or office environments.

MILK-CARTON PEN

This pen is made from recycled Tetra Pak drinks cartons!

The paper and cellulose from Tetra Pak drinks cartons are recovered and reused. Only polyethylene and aluminium are left over, which are processed into fine granules and used to create the milk-carton pen. Only the ink filling is the “normal” ink filling of a ballpoint.

Excellent for writing due to the 1 mm “soft-writing”, replaceable ink cartridge.

Recycling the drinks cartons leads to savings of 75% on fossil fuels, 90% on water, and up to 70% on CO2 emissions (compared to using new raw materials).

The recycling symbol on the clip shows that your company takes corporate social responsibility seriously.

Starting-price : 0,90 EUR/Net*

ZARA VERTRIEB GMBH
we deliver ideas

BAMBOO PEN

The outerpart is 100% bamboo. The innerpart is the “normal” ink filling of a ballpoint.

Bamboo is a fast growing plant with timber specs. It grows to maturity in 5 years versus 30 – 120 years for timbers. After a bamboo plant is harvested, four to seven new plants will grow from its roots.

No replanting necessary, just like that, made possible by nature. Bamboo is known for its hard surface, making it a robust and long lasting material. Despite its hardness it is very suitable to craft.

STONE PEN

This pen is made from 45% stone waste and 55% PP.

Stone material (Calcium Carbonate) uses far less resources (no water, no fossil fuels, no bleach, no toxins) than a regular plastic production method.

Starting-price : 0,79 EUR/Net*

*all prices incl. 1C print/1 position, excl. VAT & freight

we deliver sustainability

RPET PEN

This pen is made from 1 recycled PET bottle (RPET material) .

How do we get RPET from plastic bottles?

- Collect plastic bottles
- Clean and shred them
- Process them into small granules
- Create new products, like fabrics and other items

Why choose RPET?

- Saving of 75% on fossil fuels during production, and another 5% during incineration.
- Plastic, including polyester, is made from petroleum. Recycled plastic products reduce CO2 emissions by 70%.
- Recycled polyester uses 90% less water than regular polyester, and recycled bottles don't end up in the ocean.

RPET delivers the same high quality and comfort you're used to.

HOT SOLUBLE BAG

This bag will dissolve in water!

It is made from Polyvinyl alcohol, also known as PVOH, PVA, or PVAL. This is a synthetic polymer that is produced using Calcium Carbide (a non-fossil component) which forms Polyvinyl Alcohol (PVA) and natural gasses. PVA is soluble in water and bio-degrades. In hot water it will even disappear in just seconds!

The composition of Polyvinyl alcohol is $\text{CH}_2\text{-CH-OH}$ and when dissolving it splits into water (H_2O) and Carbon (C). Carbon is not a gas and will therefore not enter the air as a greenhouse gas.

How long it would take to dissolve in our rivers and oceans? In 1-6 months it will be gone (depending on watertemperature, turbulence, salinity etc.)

Note: It will only dissolve in permanent water, so it is no problem to use during rainy weather.

Starting-price : 2,79 EUR/Net*

ELEPHANT POO PAPER BAG

Worldwide 4 billion trees are cut down annually just to make paper! But paper can easily be made tree-free without this huge impact on the environment.

- One elephant produces 500 kg dung every day which is enough to make 1000 sheets of A4 paper or 20 journals or 150 carry bags.
- We can save 14.400 mature trees (40' tall) everyday, if we could use only 10% available Elephant dung in the world. It also solves dumping problem and stop generation of Methane gas.
- Fewer chemicals – the production of regular paper uses many chemicals, which pollute the soil when thrown away. Dung paper is naturally produced, using no harmful chemicals, and it acts as manure when it's thrown away.
- Less water – after paper production, the water is re-used for irrigation.
- Less waste, better cleanliness – using animal waste to create something new helps keep the elephants' habitats clean.

UPCYCLED FLIP-FLOP KEY-CHAIN

Floating keyrings made from recycled flip-flops in Kenya!

A large part of the world's population, especially in developing countries, walks around on flip-flops made from rubber foam (polyurethane). These types of shoes are cheap to buy, but not sustainable. Coupled with an underdeveloped waste processing system, this means that in countries like Kenya, those flip-flops end up littering the environment and the oceans.

The flip-flops that wash up on shore are collected by employees from Ocean Sole, who are paid a fair wage. This encourages local people to keep their beaches clean. First, any stones, glass or other debris is removed from the flip-flops, after which they're thoroughly washed and disinfected. The foam is then sanded down until smooth, and the key rings are cut by hand – a lengthy process.

Shapes of the key-ring can be customized!

AWARE™ RPET GROOMING BAG

No greenwashing, but telling a true story about sustainability! This collection is made with AWARE™ tracer. With AWARE™, the use of genuine recycled fabric materials and water reduction impact claims are guaranteed, by using the AWARE disruptive physical tracer and blockchain technology. Save water and use genuine recycled fabrics.

If you choose this item you save 5 litres of water and 9 plastic bottles have been reused. With the focus on water, 2% of proceeds of each sold Impact product will be donated to Water.org. Keep your toiletries stylishly stowed and neatly organised while you're on-the-go in the AWARE™ RPET Toiletry Bag. It boasts a spacious main compartment, with plenty of room for your grooming essentials. A front zippered pocket provides additional storage space for small necessities. Interior and exterior 100% recycled polyester with AWARE™ tracer. PVC free.

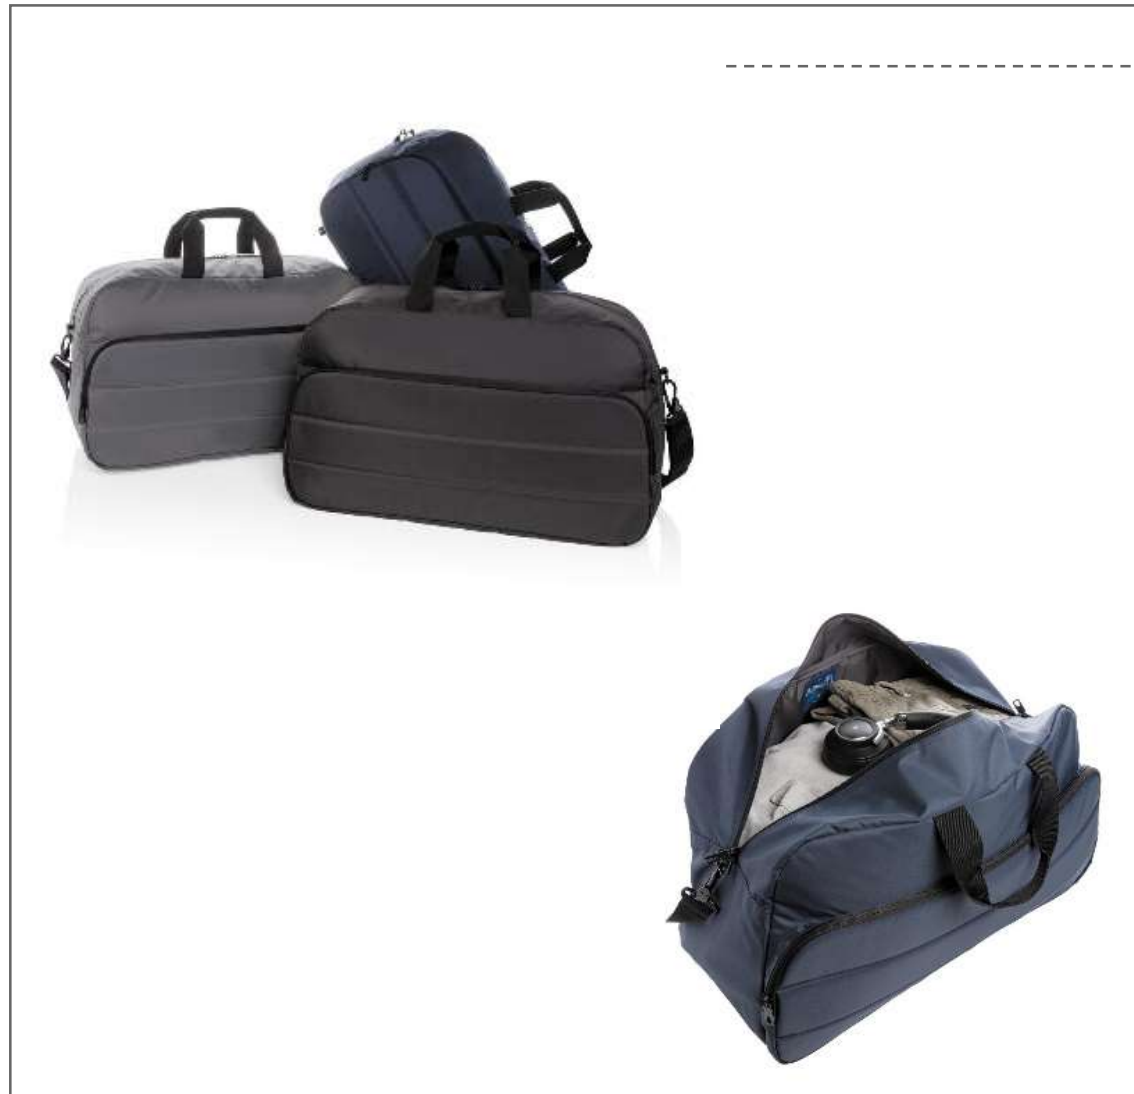

Starting-price : 8,79 EUR/Net*
