

Strategic Partnership with Uviva Technologies as US Distributor of Next Generation Zinc Oxide Portfolio

Press Release:

FOR IMMEDIATE RELEASE

5 September 2023

Uviva Technologies Partners with SPI for US Distribution

Leading Zinc Oxide manufacturer partners with SPI a key supplier of fine chemicals, performance actives and excipients.

Arlington, Texas, September 5, 2023. SPI – (Silicones Plus, Inc.) and Uviva Technologies announced a partnership for SPI to distribute Uviva Technologies Zinc Oxide portfolio for sunscreen and personal care throughout the United States.

Jeroen van den Bosch, Managing Director of Uviva Technologies, commented: "Our Eclipse zinc oxide portfolio is built on a unique particle morphology that has shown both the desired performance factors and aesthetics for next generation sunscreen applications."

Justin Brown, CEO/Owner, SPI, said, "We are extremely excited to announce our new partnership with Uviva Technologies. Their expertise in the sun care market in creating effective and highly innovative Zinc Oxide options is a game changer. The Uviva team has conducted expansive clinical research along with consumer insights to bring next generation Zinc Oxide to market."

Jeroen van den Bosch, added, "SPI's deep knowledge and relationships across the personal care industry, excellent technical capabilities, and formulation expertise make them an ideal fit to represent the Uviva portfolio. We are thrilled to partner with SPI to further strengthen our presence in the United States."

At the core of Uviva technologies portfolio is Eclipse Z, a range of high performing zinc oxide products. The top-of-the-line product, Eclipse Z1, outperforms industry benchmarks on both performance and aesthetics. The Eclipse Z line-up consists of three base grades of zinc oxide, that each address specific performance and/or regulatory needs.
