

Actuator Solutions GmbH, a joint venture of SAES Getters Group and SMAIIA GmbH, is an innovative technology company based in South of Germany. Our core technology is motion control driven by shape memory alloy (SMA) technology. With an enormous empirical background and in a passionate team we concentrate on real SMA compliant applications in the fields of medical technology, electronics, wellness and automotive.

We are currently looking to recruit an

Process engineer (m/f/d)

Your future tasks

- Develop new processes and manufacturing methods internally as well as with external partners and experts
- Work in a team with R&D, production and quality departments to ensure new product developments and launches
- Evaluation of new technologies and materials
- Establish and maintain statistical design of experiments (DoE)
- Prepare process risk analyses (PFMEA) and support product design risk analyses (DFMEA)
- Introduction and support of qualification measures (IQ, OQ, PQ)

Your profile

- Technician or degree in mechatronics, mechanical engineering or precision engineering
- Profound knowledge and professional experience in the development and introduction of manufacturing processes, process optimization, preferably in the medical device market
- Experience in project management
- Excellent planning and organizational skills
- Good skills in CAD, ideally in Solid Works
- Knowledge of shape memory alloys technology and material desirable but not mandatory

The ideal candidate will have self-assurance and the ability to make decisions independently but also to integrate into the team. Very good knowledge of MS Office applications as well as fluent English skills.

Why us?

- Flexible working hours
- Option to work from home
- Participate in innovative products
- Attractive job bike leasing programme
- An appreciative and cooperative working atmosphere

Interested? We look forward to receiving your application

Actuator Solutions GmbH, Richard-Stücklen-Straße 19, 91710 Gunzenhausen
