

Thank you for your interest in these areas of TBGM, which are particularly in need of support.

Area 1

TBGM plans to set up a functioning digital room with 10 computers to enable additional online programmes and training for children and young people. A fully functional computer costs between 7,500 Rand - 9,000 Rand (approx. 385€ - 460€) each. A digital room is already available. Once the computers are available, they will assist job seekers in searching for online job opportunities and will be used for study and research purposes for school work and other purposes. Specialised computer classes will be offered to help children in particular learn how to use digital media.

If you would like to contribute to the cost of a computer, you will know exactly where your money has gone.

We will inform you as soon as enough money has been donated for the first computer.

Area 2

There are also plans to plant turf on a recently prepared pitch for basketball and football. This is very important, as physical fitness is greatly encouraged and a beautiful grass pitch also has a positive impact on image and self-esteem.

The project can be realised in two phases.

Firstly, the smaller basketball court, which would cost around 20,000 rand (approx. €1,000) and then the football pitch, which would cost around 83,000 rand (€4,250)..

:

They have already started with the smaller field
