

EUDF UPDATE – JUNE 2021

STRATEGIC FORUMS @WORK

EUDF will develop solid policy recommendation on three core topics: Data and registries, Integrated Care and Self Care, Technology & Digitalisation.

We published 3 viewpoint stories where the chairs of the strategic forums give their perspective and first learnings. <https://www.eudf.org/our-work/viewpoints/>

“Integration needs to be at the foundation of diabetes health care in every setting and country in Europe” Angus Forbes tells us how the members of the EUDF Integrated Care Strategic Forum are taking a step towards that goal.

“It takes more than just a registry to improve care.” Robert Heine tells us what it does take, based on the ongoing discussions from the Data and Registries Strategic Forum of the European Diabetes Forum. Watch the video with Robert Heine [here](#).

“We have to create the opportunity for people with diabetes in Europe to benefit from the added value of the application of digital solutions.” Peter Schwarz tells us how the wide range of voices in the EUDF Self-care, Technology and Digitalization Strategic Forum are helping make that aim a reality.

EVENTS

On 25 May, EUDF & EFPIA organized a joint webinar “Investigating the syndemic threat of COVID-19 and chronic disease: The diabetes case”. Unlocking the potential of the European Health Data Space to improve diabetes management in crises and beyond. Find the recording [here](#) and the [blogpost](#).

UPCOMING EVENTS

EUDF symposium at the virtual EASD Annual Meeting 2021: It takes more than just a registry to improve care: How can we use data to raise awareness and initiate action to improve outcomes for people with diabetes?

29 September 2021, 14:00-16:00 (CET) Register here for the EASD virtual Annual Meeting: <https://www.easd.org/annual-meeting/easd-2021.html>
