SORDIN

SUPREME

HUNTING MILITARY SHOOTING AIRSOFT

The Sordin Supreme

Noise-level dependent ear muff with the highest performance

The Supreme electronic ear muff protects you from hazardous noise, while allowing you to listen to surrounding sounds at the same time. The ambient sound is picked up by two microphones mounted on the outside of each cup and reproduced through speakers inside the ear muff.

The advanced electronic design compresses the hazardous noise down to a safe level, while allowing you to hear other harmless sounds. In Supreme Pro versions, you can communicate face-to-face with others and hear commands and instructions without removing your ear muff, even when other people are shooting right next to you.
