BEHIND THE SCENES

Nanocoat on walls and floors of bathrooms, an invisible coating that allows water drops to run off.

Water softening system, through which we obtain purified and extremely soft water. With this system, you need less soap. Your skin and hair feel nicely soft. You might also notice that water, tea and coffee taste better.

Microfiber bed linens from Sleeptime feel light, almost like silk, absorb and ventilate well.

THEN AND NOW

The villa, which was called Van Hasselt Pavilion in former times, owes its current name to the series of 15 ancient silver linden trees located in the adjacent park, directly adjacent to our garden. The villa has a rich history. From 1930 to the late 70s, it was an orphanage as part of the convalescent Decanije The Association for Railway Staff. Thereafter, it became a colony camp for children, where "pale noses" were able to recuperate for 6 weeks. From the late 70s was the property privately inhabited and in 1999 Erika became the owner of the property. Mid-2011, Erika and Grieto renamed the building to Villa Zilverlinde and transformed it into a Bed & Breakfast for meeting and group accommodation.

8 CASTLES

CASTLE VORDEN

De Horsterkamp 8 - 7251 AZ Vorden

Vorden Castle was first mentioned in 1315. It played a role in the Eighty Years' War and during the English Wars. It was looted, set on fire, partly destroyed, and constantly restored to the demands of time. In 1976 after the restoration, it functioned as a town hall. In 2004 it was sold to Karin de Rouw, who decorated the castle in a historical atmosphere and opened it up as an inhabited castle. In an audio tour the castle lady and lord tell about the castle and the objects in it.

DEN BRAMEL

Almenseweg 47 - 7251 HN Vorden

Den Bramel has certainly existed since 1396 as an estate. The current building was built around 1650. More than a hundred years ago, Wilhelm Thate's father bought the estate and mansion for him. He had just completed his agricultural studies and was a true nature lover. That can still be seen in many places on the estate. The Thate family still lives there.

DE KIEFTSKAMP

Lindeseweg 6 - 7251 NK Vorden

The Kieftskamp, in Louis XV style, was built in 1776 by Johan Hendrik Brass. He was an extremely skilled man who worked for the noble families as a manager, mediator, intermediary and adviser. There is a bee garden on the estate. The house is privately inhabited.

DE WILDENBORCH

Wildenborchseweg 20 - Vorden

The Wildenborch was an impregnable fortress 6 to 7 centuries ago with 4 gate buildings, 3 canals and 3 drawbridges. It was then one of the castles of the Wisch knights. The largest gatehouse that stood in the middle of the canal forms the core of the current building. When the Damian Staring took possession of the castle, they gave it its current shape around 1782. His son was the poet Anthony Staring, who had a lot of influence on the region. The water features on the estate recall the past and in Almen you can visit the Staring Museum. Descendants of the Staring family still live in the castle. The gardens are open to the public on a regular basis.

8 CASTLES

CASTLE HACKFORT

Baakseweg 6 - 7251 RH Vorden

The heart of the castle is a 700-year-old fortified tower, a keep. The walls of this tower can still be seen in the cellars. In the centuries the castle has been expanded. Knight Berend van Hackfort is the most famous resident of the castle. The Westerholt family transferred the estate and castle to Natuurmonumenten five years ago. These days, holiday apartments have been furnished. The basement is occasionally open to the public. Restaurant "Keuken van Hackfort" is located in the Coach House.

CASTLE ONSTEIN

Onsteinseweg 15 - 7251 ML Vorden

Castle Onstein was built in 1613 by a young family from Deventer. A century later, the mayor of Zutphen further embellished the house and had ornamental gardens laid out in French style. Today the castle is inhabited by Hans Melchers, the founding father of Museums MORE in Gorssel and Ruurlo.

DE WIERSSSE

Wiersserallee 9 - 7251 LH Vorden

De Wiersse, was owned for 7 - 8 centuries by a lady who was head of a women's monastery just across the border in Germany. The tenants had to pay the rent at the castle. Another part of history starts when Victor de Stuers marries the daughter of the family who then inhabits the castle. As initiator of the preservation of monuments in the Netherlands, he takes charge of the renovation of the castle and inspires his daughter to decorate the gardens. The beautiful gardens are open to the public on a regular basis.

HUIS MEDLER

Ruurloseweg 115 - 7251 LD Vorden

Estate Medler has been owned by the Van Dorth tot Medler family for 3 centuries. The estate is still being exploited today based on the income from the lease of the associated farms. About five hundred years ago a house was built for the first time at the current location. Before that, behind the current castle, on an island surrounded by a canal, called "De Pol", stood a fortified house. The Van Dorth family had a Catholic church built in the village of Kranenburg. The house and estate are privately owned. Walks can be made on the estate.

MORE HISTORY

Villa Zilverlinde, formerly the “Van Hasselt Paviljoen” children’s recovery center, has been standing in the beautiful De Decanije village park in Vorden for 100 years, right in the center of Vorden. The current owners have established a B&B, group accommodation and marketing agency there.

OLD LAND

The villa stands on land that was donated to the church by the lords of Hackfort and Vorden more than 500 years ago. Thus it became a Vicarie (a religious good) dedicated to Saint Anthony. From the revenues of this site the costs associated with the church could be paid. In the century that followed, the park was owned by the Galée family, three generations of Vorden mayors.

REPAIR PLACE

Around 1900, the Association for Railway Staff bought the area and a convalescent home was established. In 1922 a pavilion was erected opposite the main building, intended as a convalescent home for children. It was given the name of the initiator, Dr. Van Hasselt. Four years later, the current set-up turned out to be too small and the building was built to the shape it still looks like today.

PALE NOSES

After the war it became a holiday colony, where children could recuperate for 6 weeks. “Pale noses” still come to look inside and experience where they have been as children. In 1993, the Decanije, including the two buildings, was sold to a project developer. He realized 40 luxury apartments and sold the plot with the villa to private individuals.

CURRENT OWNER

In 1999, Erika Vreeswijk purchased the building and lived there for five years. When she first got out of the car in the parking lot, she thought “I belong here.” Yet she left the building and Vorden to, partly driven by homesickness, re-occupy the building seven years later, together with her new partner.

VILLA ZILVERLINDE

The villa has been thoroughly decorated, embellished and made suitable for guests. The name was changed to Villa Zilverlinde, inspired by the 15 age-old silver linden trees in the park. The former sleeping and play rooms for boys and girls are now very spacious rooms where guests come to enjoy the peace, nature and everything there is to experience here.
