Sports Fun for the Digital Age

Using technology and gamification, we merge all forms of ball sports with computer gaming. In a time where it gets harder and harder for kids and adults to start and keep up with sports, we provide a highly engaging and attractive experience to make you move.

If you're looking for a way to get your kids and yourself away from that tablet and back onto the court, we've got you covered!

Just like a computer game

Any Ball
Any Wall
Anytime

MultiBall

MultiBall delivers fun with every ball.

As long as an object is larger than 5cm, it can be used to play all the games.

The system is very precise in detecting every ball to keep your motivation up even on the most challenging levels.

How It Works

MultiBall enables you to enjoy sports fun, intuitive and without supervision.

Simply touch the wall to reach the menu and pick your favorite game or training module.

The first ball on the wall starts the application.

Just touch the wall to have fun

Games Included

MultiBall has a wide range of games for any skill level.

Newly created applications and games will be installed and updated automatically into your system.

Easy to Install, Hard to Break

MultiBall is an easy to install device.

Our system can be used anywhere, including schools, training facilities, sports stadiums & leisure centers.

The MultiBall system can be installed on any wall stable enough to be hit by a sports ball. All hardware is designed for maximum durability and **24/7 use** in facilities such as schools and sports centers.

Hi-Tech for Hi-Fun

What you need to set up MultiBall:

(not supplied)

Screws have to be chosen according to wall structure.

Tools: Allen key, impact driver, water level

A Projector

Any wall that is strong enough to be hit by a sports ball.

The MultiBall Setup

MultiBall can be installed easily by attaching the sensor frame and the console to a wall. The console can be mounted on top, on the sides or below the sensor frame depending on the location.

The Projector

MultiBall requires a projector (not included) mounted on the ceiling and connected via HDMI cable. We offer projector packages and are happy to help you to pick the right model.

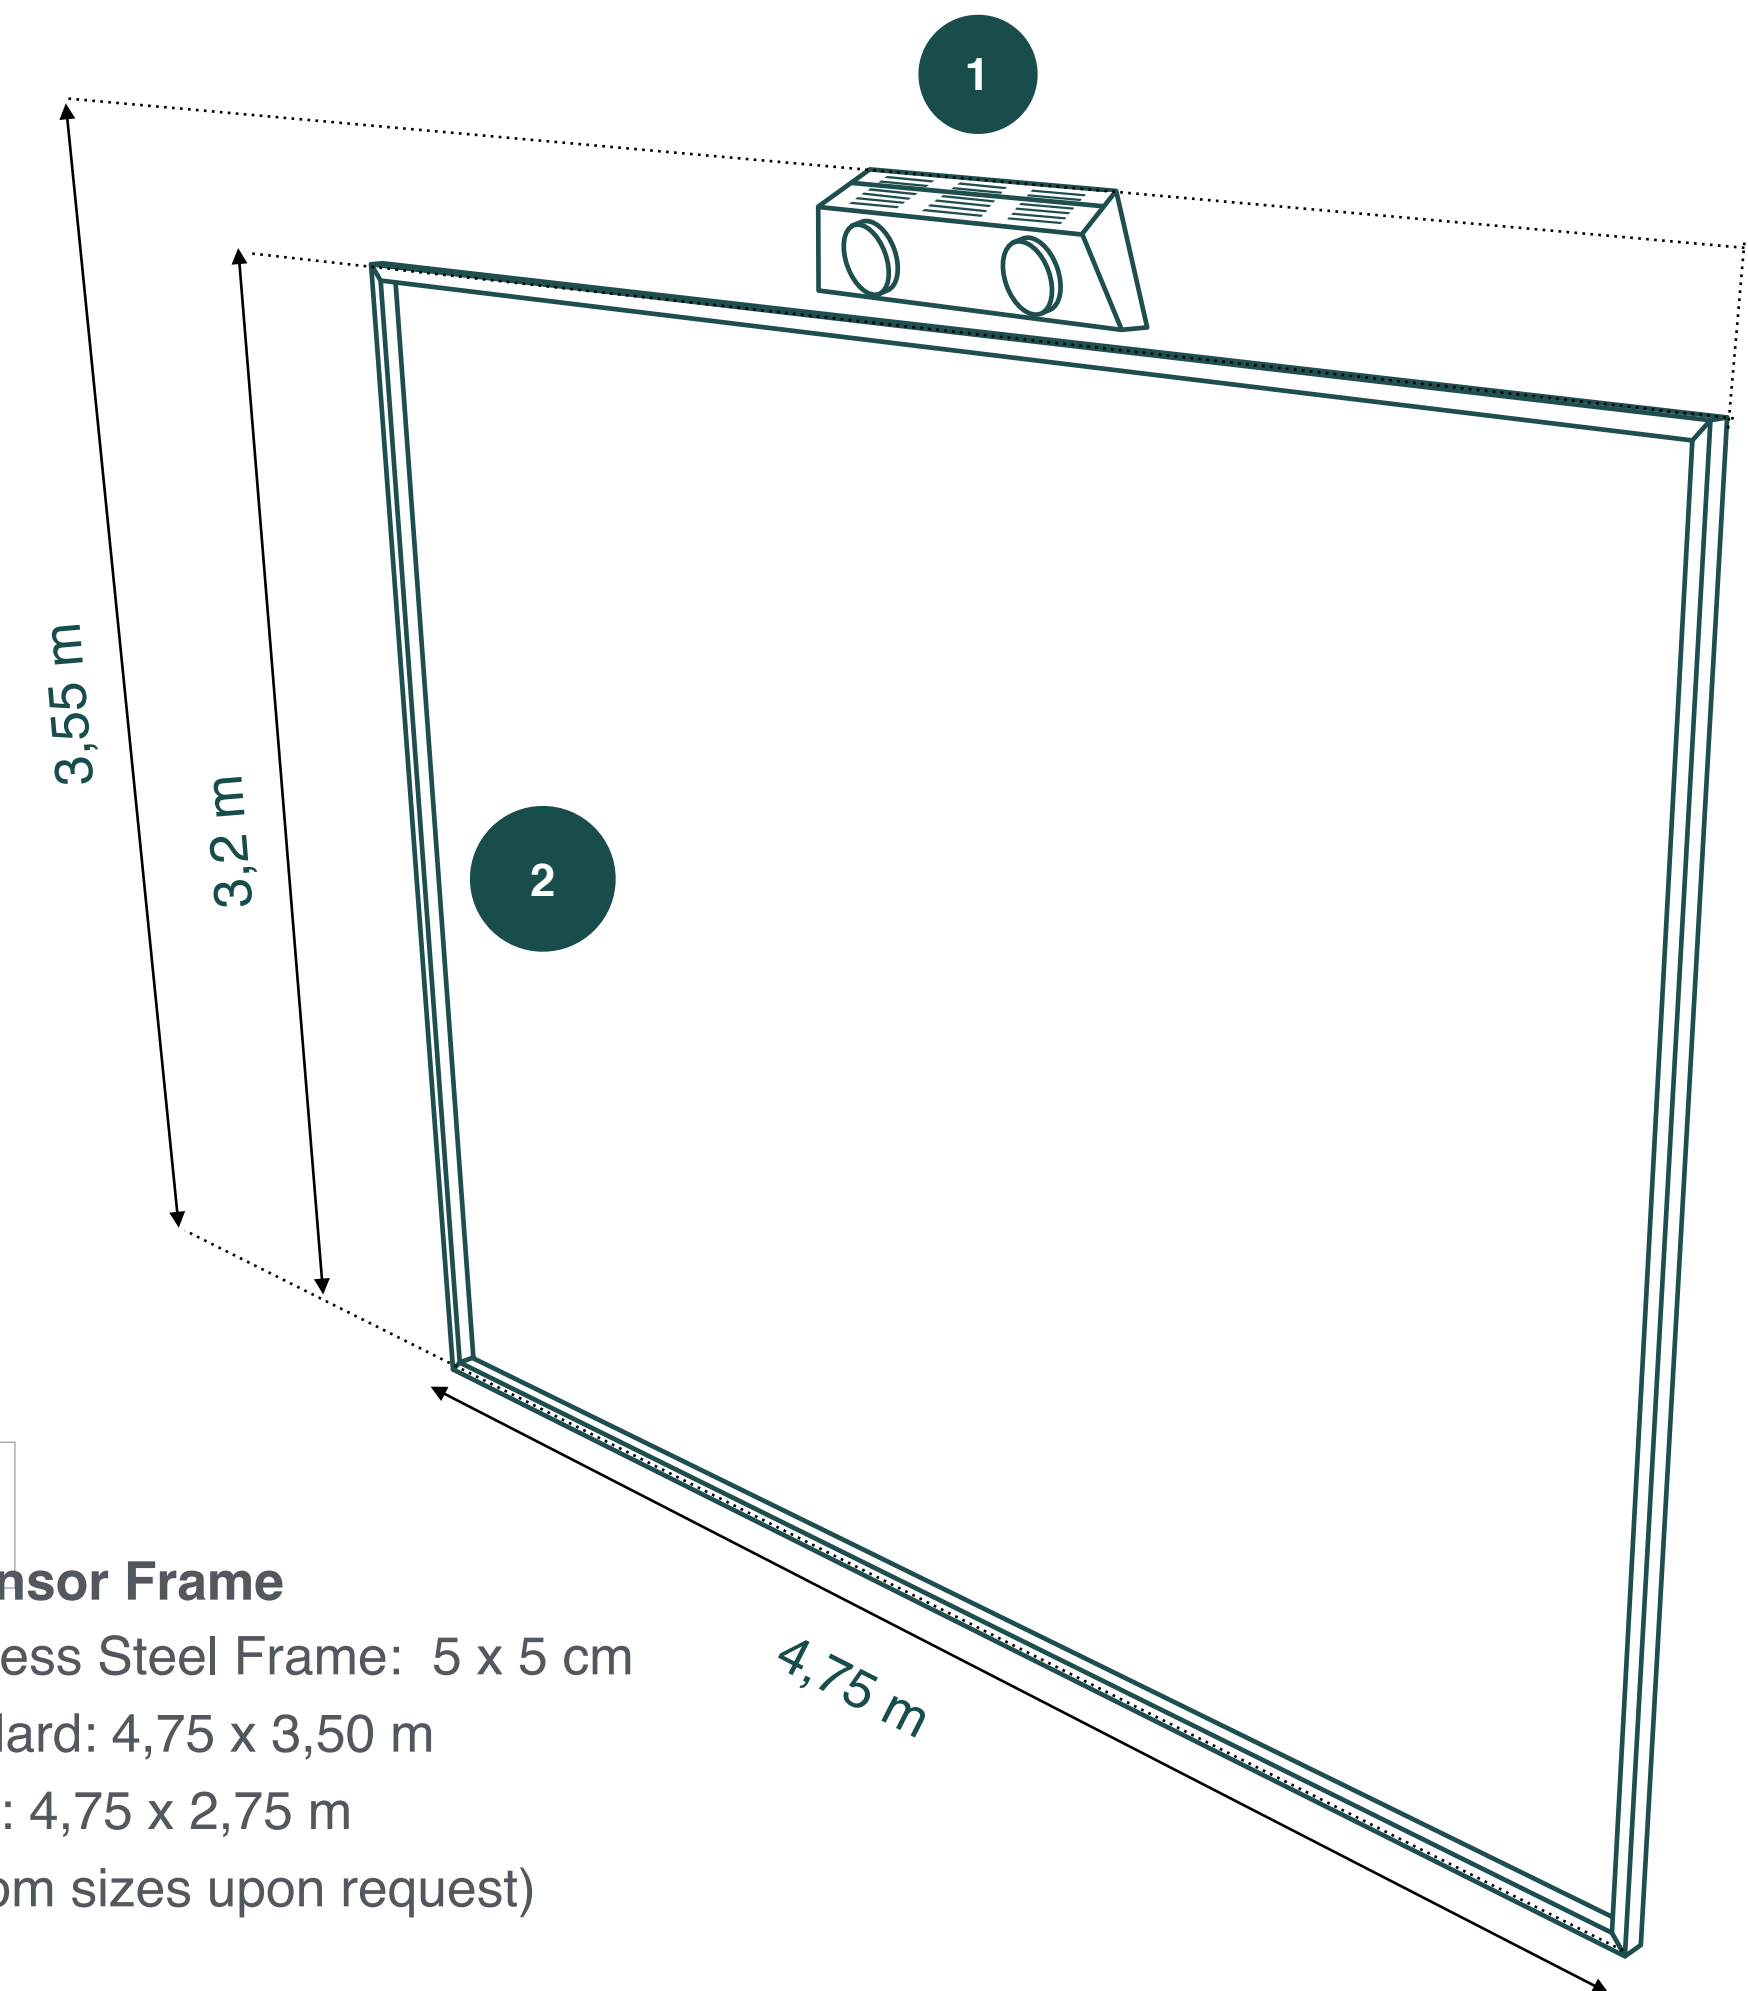

Internet Connection

MultiBall connects to the internet and receives updates and new games automatically. Connect the console via a standard network cable (RJ45) or a phone hotspot via USB.

Turning white walls into interactive sports courts

1: Console

holds all processing units, sensors and loudspeakers. 1,2 x 0,35 m
