Bio

Francis Kaiser started her carrier as an artist in 2021. Although she studied fine arts at university and always painted for herself, she worked as a teacher and educator for several years. But her love and dedication belongs to art. And that is why she decided to focus on her talent as a painter. She has held several art exhibitions - personal and groups - in Germany. Also her works have been selected for international exhibitions - for example "MOOD" organized by Art Fluent from Boston, USA.

Francis Kaiser is specialized in drawing and painting realistic portraits and human figures. Her paintings are characterized by the mix of traditional painting and digital collages. With the play of light and shadow Francis Kaiser creates atmospheric and intimate interior scenes. Above all children are the main subjects of her paintings. Another series of works are her musician portraits.

Besides her personal andz free painting projects Francis Kaiser works as an illustrator. She mainly does illustrations for editorials and (child-)books.

K AISERSWERK
