

i.MIX is an SMP adhesive that hardens quickly without humidity even between diffusion-proof parts and has a very high final strength. The perfect small handling for the assembly of bathroom accessories.

Product features

- 2K-SMP adhesive
- Complete curing between airtight surfaces
- Adhesive solution for bathroom accessories
- Ideal as an accessory pack
- Easy handling
- Fast curing time (4 hours)
- Hazardous substance identification free
- Removable without residue
- Made in Germany

Applications

- Installation of sanitary accessories such as towel rails, toilet roll holders, mirrors, soap baskets, shower bars, grab handles, etc.
- Dispenser systems for the commercial and public sector such as soap dispensers, paper towel dispensers, etc.
- Installation of shower / partition systems such as wall profiles, floor profiles, etc.
- Bathroom furniture
- Mirrored cabinets

ADHESION SPECTRUM

Suitable materials are ABS, PMMA, PC, PVC, GFK epoxy, GFK polyester, anodized aluminum, bare aluminum, zinc, V4A steel, PA 6.6, glass, ceramics, mirrors, automotive alloy 6016, textiles, fabric, cardboard. Due to the large variety of different plastics and compositions as well as materials that are prone to stress cracking, preliminary tests are recommended.

PRE-TREATMENT OF THE SURFACES

In order to achieve reproducible results, the stable subsurface must be prepared according to the state of the art. All undefined surfaces must be removed using a suitable process and the adhesive applied to the prepared surface promptly. For this purpose, mechanical and/or chemical pretreatment or cleaning using rubbing alcohol, isopropanol or acetone is recommended, depending on the part to be joined and the requirements to be expected. Before applying an adhesion promoter or the adhesive, the substrate must be stable and free of dust, oil and grease.
