

Actuator Solutions GmbH

Actuator Solutions GmbH is a joint venture of SAES Getters Group and SMAIIA GmbH and an international leader in development and manufacturing of shape memory alloy applications. With our mechatronic components and actuators, we supply numerous renowned companies in the medical, electronics, wellness and automotive sector.

For our location in Gunzenhausen we are looking for a new team member as soon as possible

Junior Firmware-/Software Developer (f/m/div) for „Embedded Systems“

Discover your opportunities as a part of our innovative team.

Your responsibilities

- Development of systems and electronics (mainly firmware and software) internally and in cooperation with external companies
- Supporting the production team in technical matters and issues with regards to series production
- Development and execution of test runs including corresponding documentation

Your profile

- A degree with a relevant focus on software/firmware development
- Sound knowledge in firm/software engineering
 - Microcontrollers (mainly STM32 and STM8) and C
 - Linux and TCL desirable
- Your profile includes knowledge within one or more areas such as
 - Python, tkinter, Qt, networking, IAR Embedded Workbench for Arm and STM8, Raspberry Pi, Visual Studio, Android Studio, PyCharm, Matlab or dSpace.
- Very good written and spoken English knowledge and competent use of MS Office applications.
- You are a team player and look forward to working with our internal and external interfaces.
- You bring along a high level of motivation and flexibility and you are able to work independently.

What you can expect

- Flexible working hours
- Participate in designing innovative products
- Intensive and sustainable training
- Company bike leasing
- Free parking on site
- Regular and demand-oriented qualification and skills development

Contact – we are looking forward to hearing from you!
