## 2. 会议主题摘要

本次会议将在北京洪堡论坛的框架下，探讨一个具有全球意义的重要问题：能源转型过程中关键原材料的短缺。从稀土需求的爆炸式增长到如今的锂需求，如何在此背景下实现工业的去化石化是我们面临的重大挑战。作为北京洪堡论坛的分论坛，我们将延续以往会议的传统，结合中德两国在锂资源行业的努力，探讨如何在技术和经济上为减少二氧化碳排放及关键性能源的可持续利用做出贡献。具体而言，我们将探讨如何形成新的绿色创新价值链，循环利用锂渣，为工业的去化石化提供技术和经济上的解决方案。同时，我们将重点关注锂电池和电动汽车的发展，推动绿色交通和可再生能源的普及。

会议的核心议题包括：

- 全球锂市场的机遇和挑战
- 锂精炼技术与供应链的可持续发展
- 锂电池的前景与电动汽车的发展
- 循环经济中的环境、社会和治理(ESG)标准
- 回收与再利用

### 2024 Annual Conference

Time: 13:00-17:00 (Beijing) / 7:00-11:00 (Berlin), September 21, 2024 (Saturday)

Venue: Room 222, Administration Building, University of International Business and Economics

DC: WANG Yazhou, Director of the Technology Investment Promotion Center, Nanjing Xingang National Hi-tech Industrial Park

IC: Prof. Dr. Ralf Wehrspohn, Co-CEO of German Institute for Technology and Economics of Lithium (ITEL) and Professor of Martin-Luther-University Halle-Wittenberg

#### Conference Guests

## Abstract of Session:

This year's conference, part of the Beijing Humboldt Forum, will address a globally significant issue: the scarcity of key raw materials in the energy transition. From the explosive growth in demand for rare earth elements to the current surge in demand for lithium, achieving industrial defossilization in this context is a major challenge.

As a subforum of the Beijing Humboldt Forum, we will continue the tradition of previous meetings and combine the efforts of China and Germany in the lithium resource industry to explore how to contribute to the reduction of carbon dioxide emissions and the sustainable use of critical energy sources from both technological and economic perspectives. Specifically, we will explore how to form a new green innovation value chain and recycle lithium slag to provide technological and economic solutions for industrial defossilization. At the same time, we will focus on the development of lithium batteries and electric vehicles, promoting green transport and the spread of renewable energy.

Key themes of the conference:

- Opportunities and challenges in the global lithium market
- Sustainable development of lithium refining technology and supply chain
- Prospects for lithium batteries and electric vehicle development
- Environmental, Social and Governance (ESG) standards in a circular economy
- Recycling and reuse
