*Pinze di presa pneumatiche serie TEC
Pneumatic TEC series gripping*

IE - 300/309

Pinze di presa con chiusura parallela

TEC-P 16/20/32/50/63

Gripping pliers with parallel clamping

TEC-P 16/20/32/50/63

IE - 310/317

Pinze di presa con chiusura a leva

TEC-L 20/32/50/63

Gripping pliers with parallel lever

TEC-L 20/32/50/63

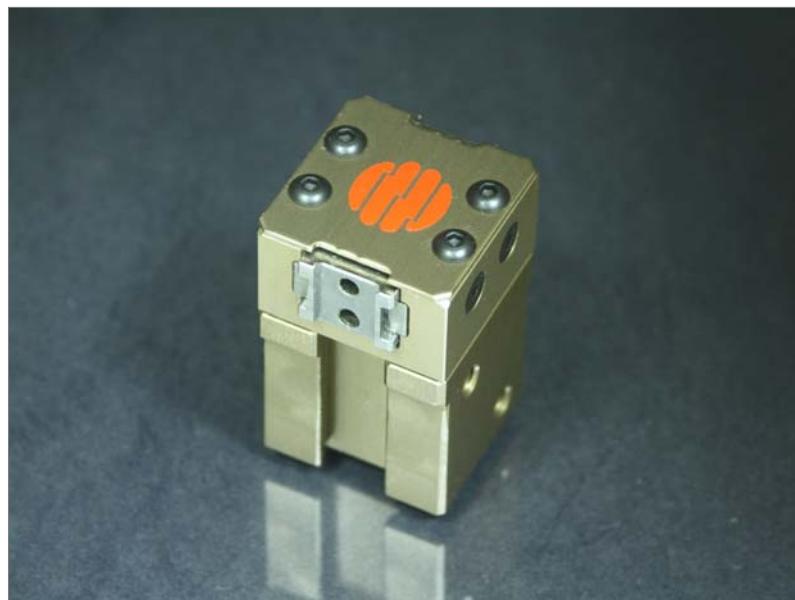

IE - 318/325

Pinze di presa con chiusura irreversibile a ginocchiera

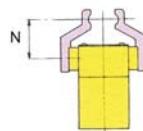

TEC-G 20/32/50/63

Gripping pliers with irreversible toggle clamping

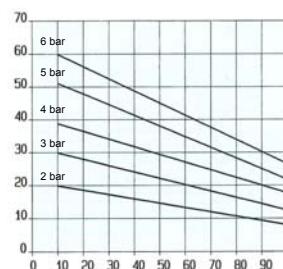

TEC-G 20/32/50/63

Corsa 6 mm - Stroke 6 mm

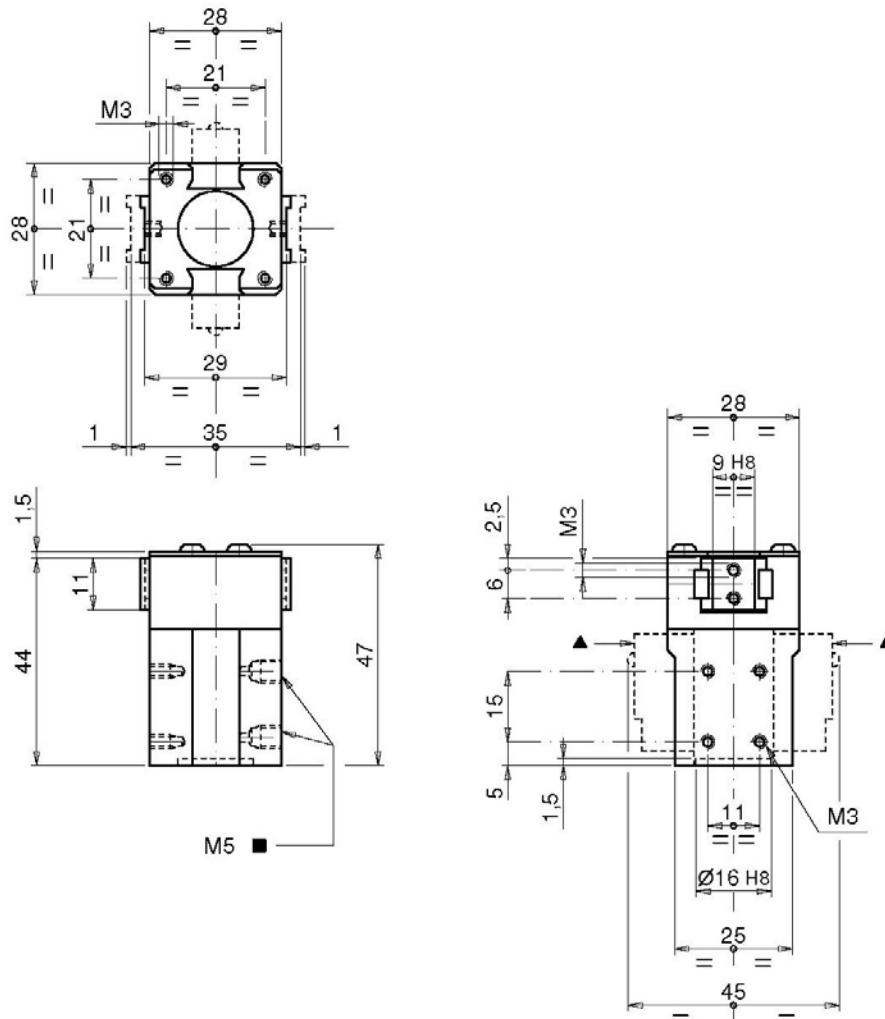

Forza = N - Force = N

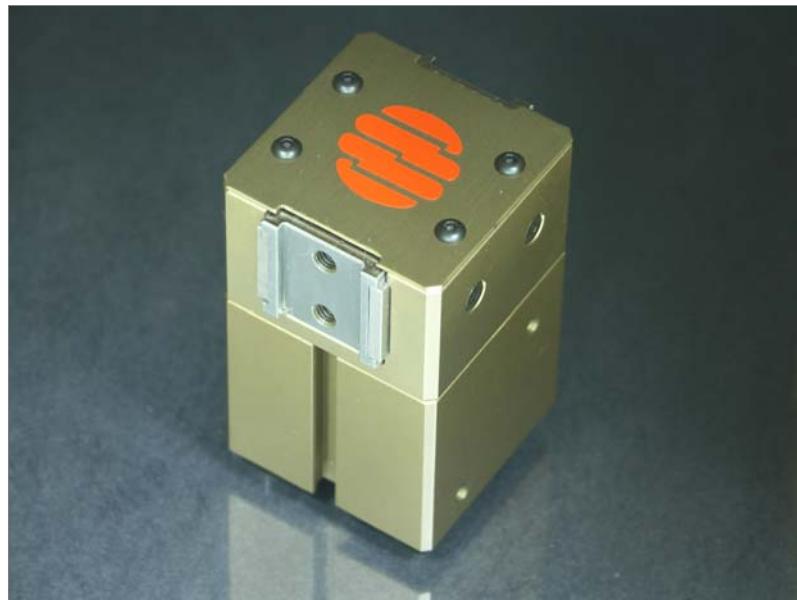

Z: Distanza dall'asse cursore = mm - Z: Distance from cursor axis = mm

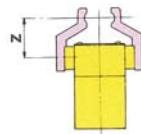

- Pinza parallela autocentrante particolarmente indicata, grazie alle guide prismatiche portanti, per presa di pezzi anche distanti dall'asse di scorrimento delle guide (vedi diagramma)
- Terminali e meccanismo interno interamente guidati durante la loro corsa
- Pistone integrato con potenze elevate
- Controllo di fine corsa con sensori magnetici con Led (optional)
- Sistema di guida che permette corse elevate e precise
- Peso Kg 0.30
- Parallel, self-centering pliers especially suited - thanks to the supporting prismatic guides - for gripping workpieces also far from the sliding axis of the guides (see diagram)
- Terminals and internal mechanism completely driven during their stroke
- Built-in piston high powers
- Limit stop control by means of magnetic sensors with Led (optional)
- Guide device ensuring long and precise strokes
- Weight Kg 0.30

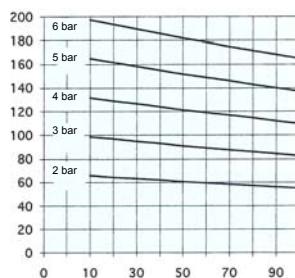

■ *Alimentazione aria 2 ÷ 6 bar – Air feed 2 ÷ 6* ▲ *Sensore di finecorsa a contatto reed (optional) – Reed contact proximity sensor (optional)*

Corsa 10 mm - Stroke 10 mm

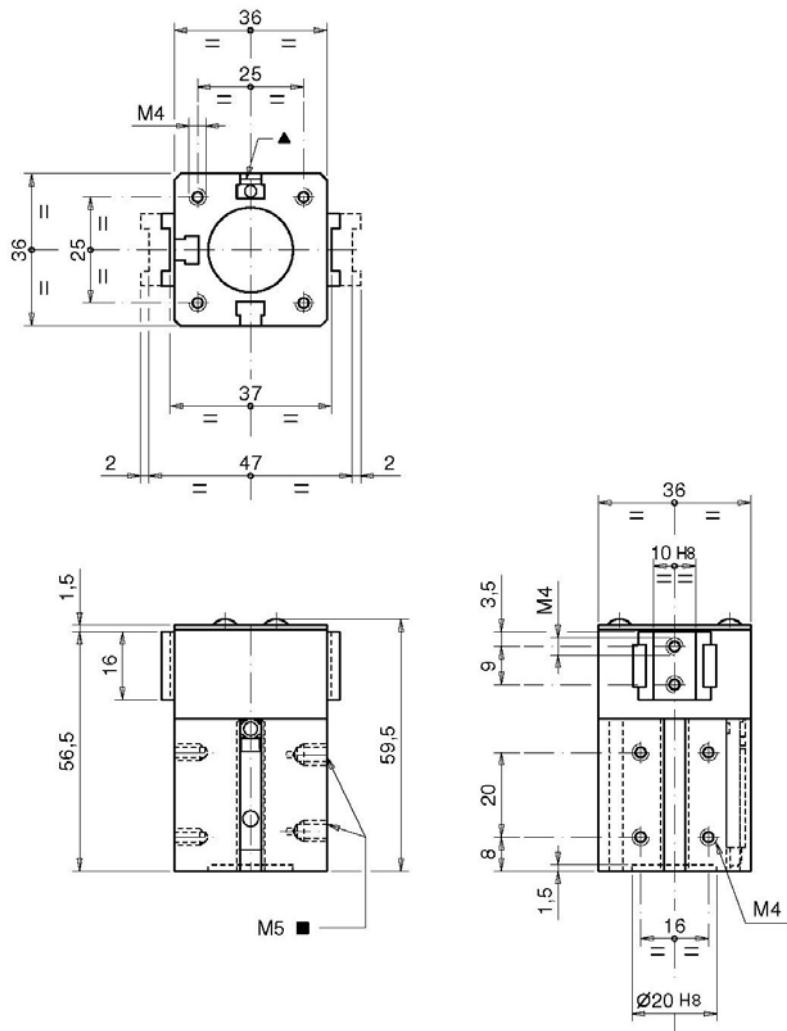

Forza = N - Force = N

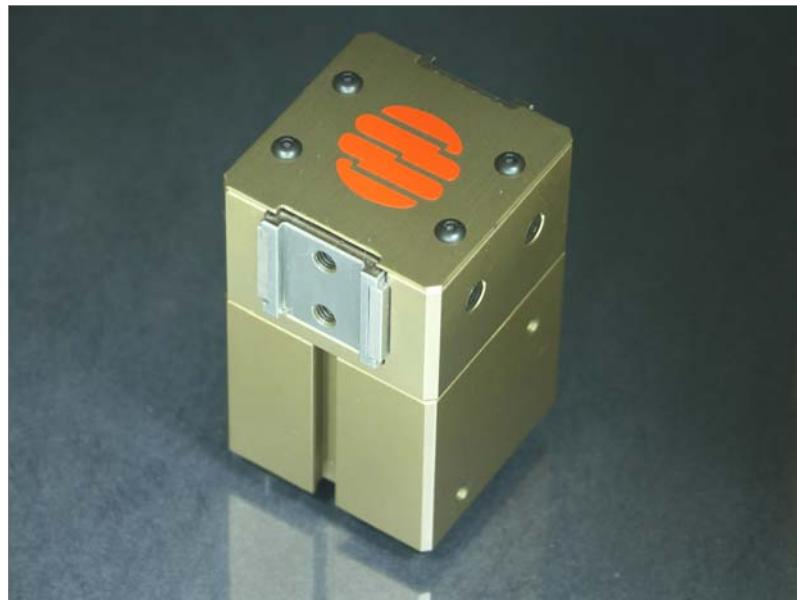

Z: Distanza dall'asse cursore = mm - Z: Distance from cursor axis = mm

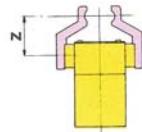

- Pinza parallela autocentrante particolarmente indicata, grazie alle guide prismatiche portanti, per presa di pezzi anche distanti dall'asse di scorrimento delle guide (vedi diagramma)
- Terminali e meccanismo interno interamente guidati durante la loro corsa
- Pistone integrato con potenze elevate
- Controllo di fine corsa con sensori magnetici con Led (optional)
- Sistema di guida che permette corse elevate e precise
- Peso Kg 0.35
- Parallel, self-centering pliers especially suited - thanks to the supporting prismatic guides - for gripping workpieces also far from the sliding axis of the guides (see diagram)
- Terminals and internal mechanism completely driven during their stroke
- Built-in piston high powers
- Limit stop control by means of magnetic sensors with Led (optional)
- Guide device ensuring long and precise strokes
- Weight Kg 0.35

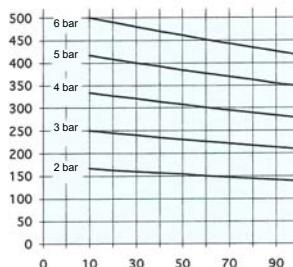

■ Alimentazione aria 2 ÷ 6 bar – Air feed 2 ÷ 6 ▲ Sensore di finecorsa per scanalatura 8 (optional) – Proximity sensor for T-slot (optional)

Corsa 16.4 mm - Stroke 16.4 mm

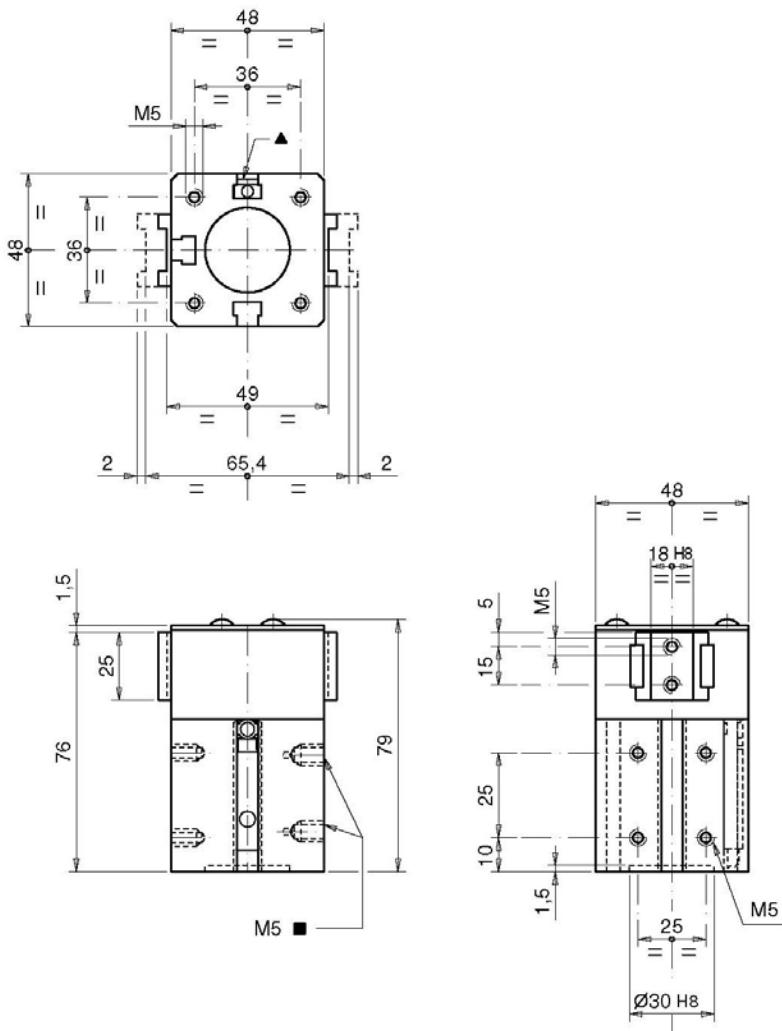

Forza = N - Force = N

Z: Distanza dall'asse cursore = mm - Z: Distance from cursor axis = mm

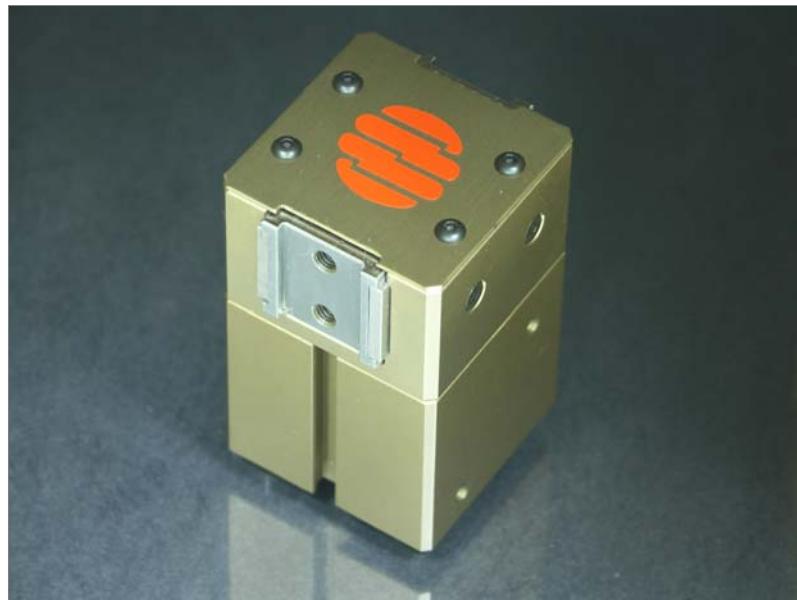

- Pinza parallela autocentrante particolarmente indicata, grazie alle guide prismatiche portanti, per presa di pezzi anche distanti dall'asse di scorrimento delle guide (vedi diagramma)
- Terminali e meccanismo interno interamente guidati durante la loro corsa
- Pistone integrato con potenze elevate
- Controllo di fine corsa con sensori magnetici con Led (optional)
- Sistema di guida che permette corse elevate e precise
- Peso Kg 0.50
- Parallel, self-centering pliers especially suited - thanks to the supporting prismatic guides - for gripping workpieces also far from the sliding axis of the guides (see diagram)
- Terminals and internal mechanism completely driven during their stroke
- Built-in piston high powers
- Limit stop control by means of magnetic sensors with Led (optional)
- Guide device ensuring long and precise strokes
- Weight Kg 0.50

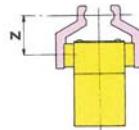

■ Alimentazione aria 2 ÷ 6 bar – Air feed 2 ÷ 6 ▲ Sensore di finecorsa per scanalatura 8 (optional) – Proximity sensor for T-slot (optional)

T E C P 5 0

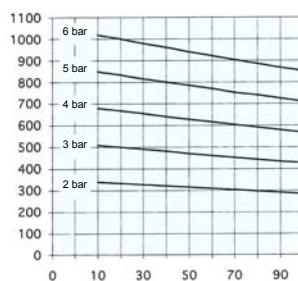

*Pinze di presa con chiusura parallela
Gripping pliers with parallel clamping*

Corsa 20 mm - Stroke 20 mm

Forza = N - Force = N

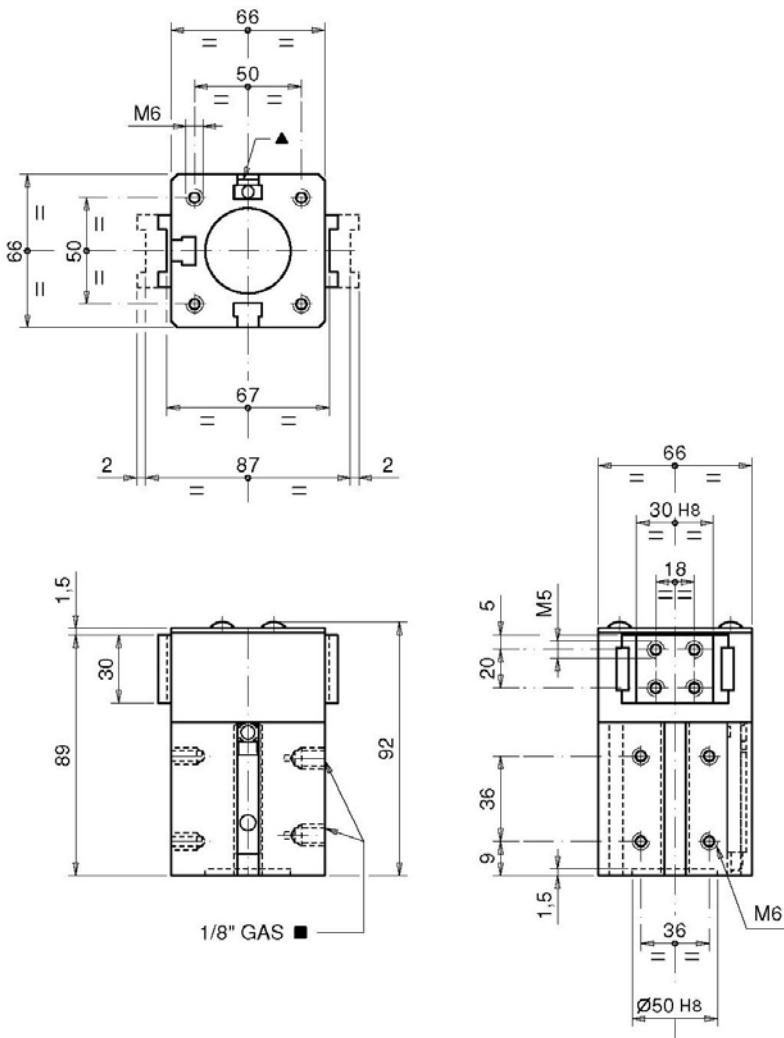

Z: Distanza dall'asse cursore = mm - Z: Distance from cursor axis = mm

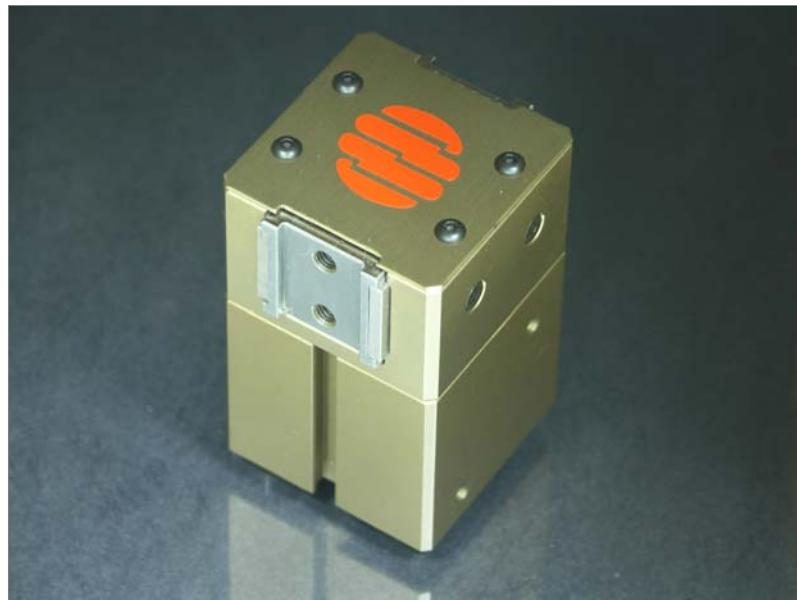

- Pinza parallela autocentrante particolarmente indicata, grazie alle guide prismatiche portanti, per presa di pezzi anche distanti dall'asse di scorrimento delle guide (vedi diagramma)
- Terminali e meccanismo interno interamente guidati durante la loro corsa
- Pistone integrato con potenze elevate
- Controllo di fine corsa con sensori magnetici con Led (optional)
- Sistema di guida che permette corse elevate e precise
- Peso Kg 1.20
- Parallel, self-centering pliers especially suited - thanks to the supporting prismatic guides - for gripping workpieces also far from the sliding axis of the guides (see diagram)
- Terminals and internal mechanism completely driven during their stroke
- Built-in piston high powers
- Limit stop control by means of magnetic sensors with Led (optional)
- Guide device ensuring long and precise strokes
- Weight Kg 1.20

T E C P 50

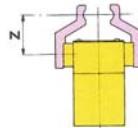

*Pinze di presa con chiusura parallela
Gripping pliers with parallel clamping*

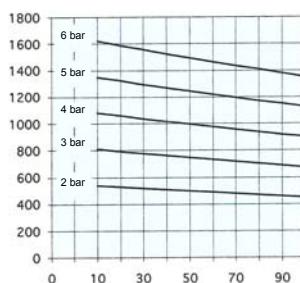

■ *Alimentazione aria 2 ÷ 6 bar – Air feed 2 ÷ 6* ▲ *Sensore di finecorsa per scanalatura 8 (optional) – Proximity sensor for T-slot (optional)*

Corsa 28 mm - Stroke 28 mm

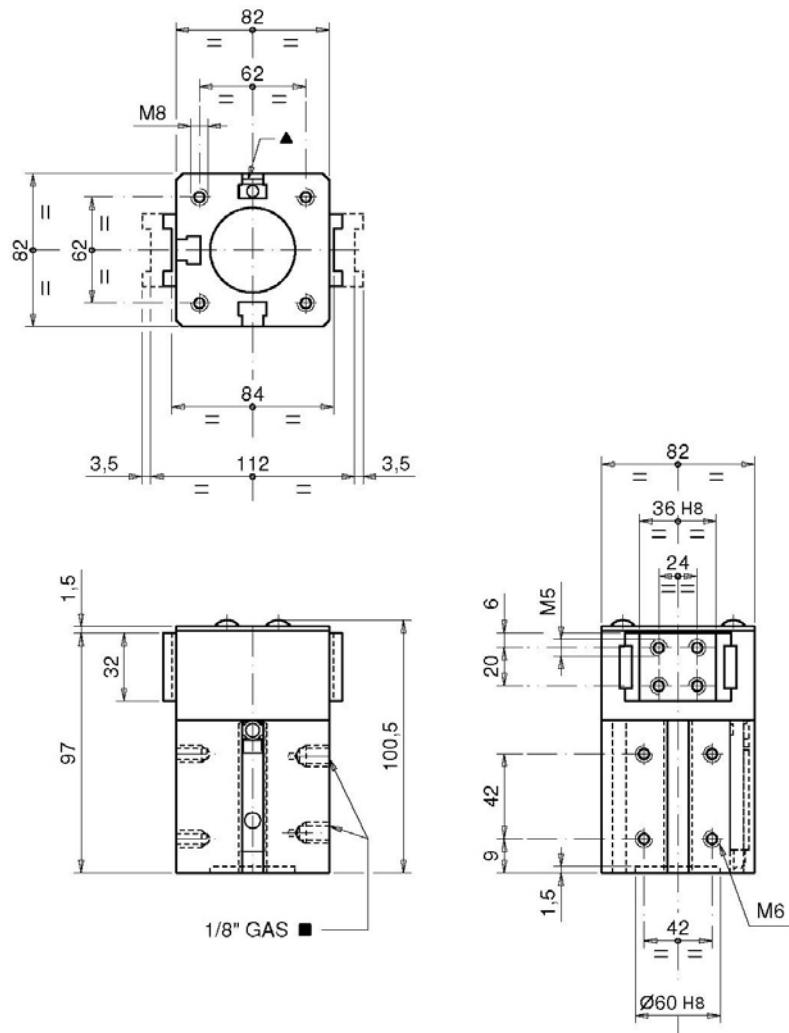

Forza = N - Force = N

Z: Distanza dall'asse cursore = mm - Z: Distance from cursor axis = mm

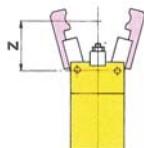

- Pinza parallela autocentrante particolarmente indicata, grazie alle guide prismatiche portanti, per presa di pezzi anche distanti dall'asse di scorrimento delle guide (vedi diagramma)
- Terminali e meccanismo interno interamente guidati durante la loro corsa
- Pistone integrato con potenze elevate
- Controllo di fine corsa con sensori magnetici con Led (optional)
- Sistema di guida che permette corse elevate e precise
- Peso Kg 2.00
- Parallel, self-centering pliers especially suited - thanks to the supporting prismatic guides - for gripping workpieces also far from the sliding axis of the guides (see diagram)
- Terminals and internal mechanism completely driven during their stroke
- Built-in piston high powers
- Limit stop control by means of magnetic sensors with Led (optional)
- Guide device ensuring long and precise strokes
- Weight Kg 2.00

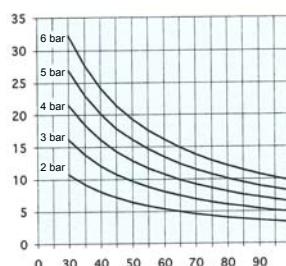

■ Alimentazione aria 2 ÷ 6 bar – Air feed 2 ÷ 6 ▲ Sensore di finecorsa per scanalatura 8 (optional) – Proximity sensor for T-slot (optional)

Apertura max 90° - Max opening 90°

Forza = N - Force = N

Z: Distanza dal fulcro = mm - Z: Distance from fulcrum = mm

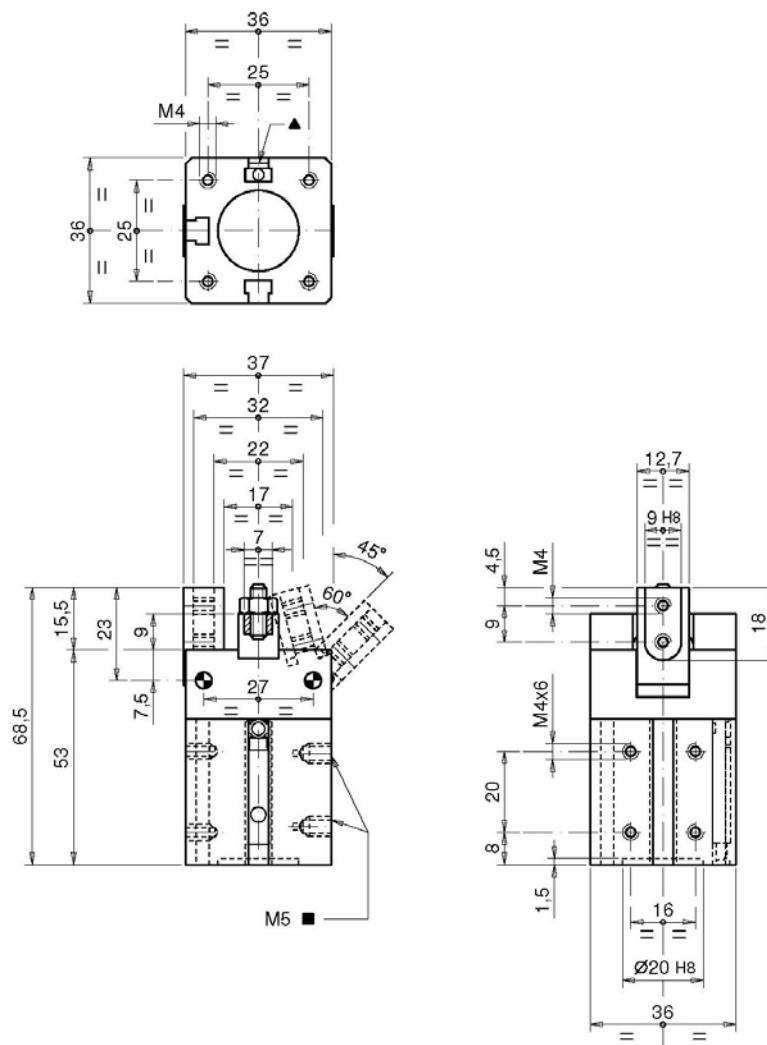

- Pinza con movimento a leva autocentrante con corsa di apertura elevata. Adatta a tutte le soluzioni di presa in condizioni normali ove non siano richieste prestazioni particolari
- Angolo di apertura regolabile da 0° a 90°
- Meccanismo interno interamente guidato durante la sua corsa
- Pistone integrato con potenze elevate
- Controllo di fine corsa con sensori magnetici con Led (optional)
- Peso Kg 0.30

- Pliers with self-centering lever movement, with long opening stroke. Suited for any kind of gripping in normal conditions whenever no particular performances are required
- From 0° to 90° adjustable opening angle
- Internal mechanism completely driven during its stroke
- Built-in piston high powers
- Limit stop control by means of magnetic sensors with Led (optional)
- Weight Kg 0.30

Pinze di presa con chiusura a leva

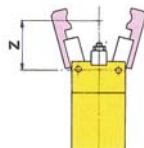

Gripping pliers with lever clamping

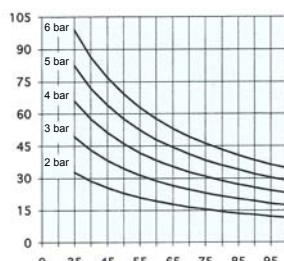

■ *Alimentazione aria 2 ÷ 6 bar – Air feed 2 ÷ 6* ▲ *Sensore di finecorsa per scanalatura 8 (optional) – Proximity sensor for T-slot (optional)*

Apertura max 90° - Max opening 90°

Forza = N - Force = N

Z: Distanza dal fulcro = mm - Z: Distance from fulcrum = mm

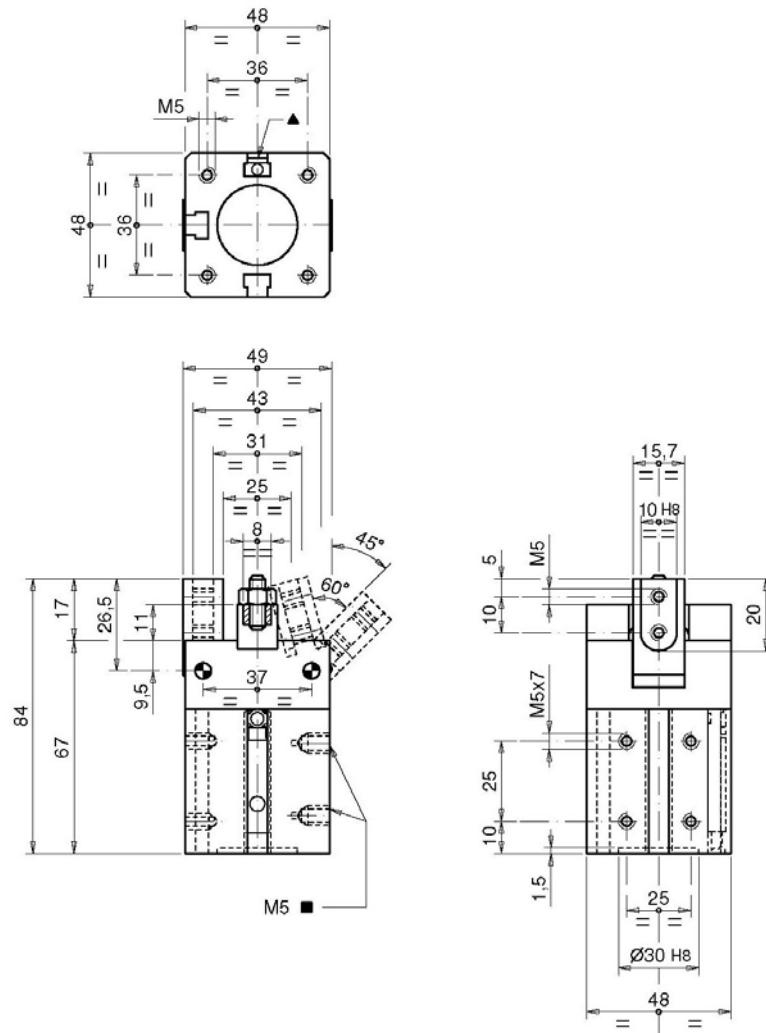

- Pinza con movimento a leva autocentrante con corsa di apertura elevata. Adatta a tutte le soluzioni di presa in condizioni normali ove non siano richieste prestazioni particolari
- Angolo di apertura regolabile da 0° a 90°
- Meccanismo interno interamente guidato durante la sua corsa
- Pistone integrato con potenze elevate
- Controllo di fine corsa con sensori magnetici con Led (optional)
- Peso Kg 1.80

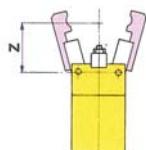

- Pliers with self-centering lever movement, with long opening stroke. Suited for any kind of gripping in normal conditions whenever no particular performances are required
- From 0° to 90° adjustable opening angle
- Internal mechanism completely driven during its stroke
- Built-in piston high powers
- Limit stop control by means of magnetic sensors with Led (optional)
- Weight Kg 1.80

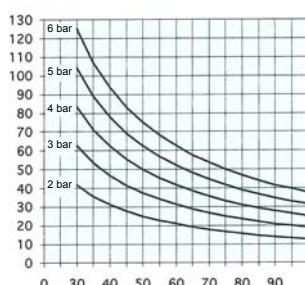

■ Alimentazione aria 2 ÷ 6 bar – Air feed 2 ÷ 6 ▲ Sensore di finecorsa per scanalatura 8 (optional) – Proximity sensor for T-slot (optional)

Apertura max 180° - Max opening 180°

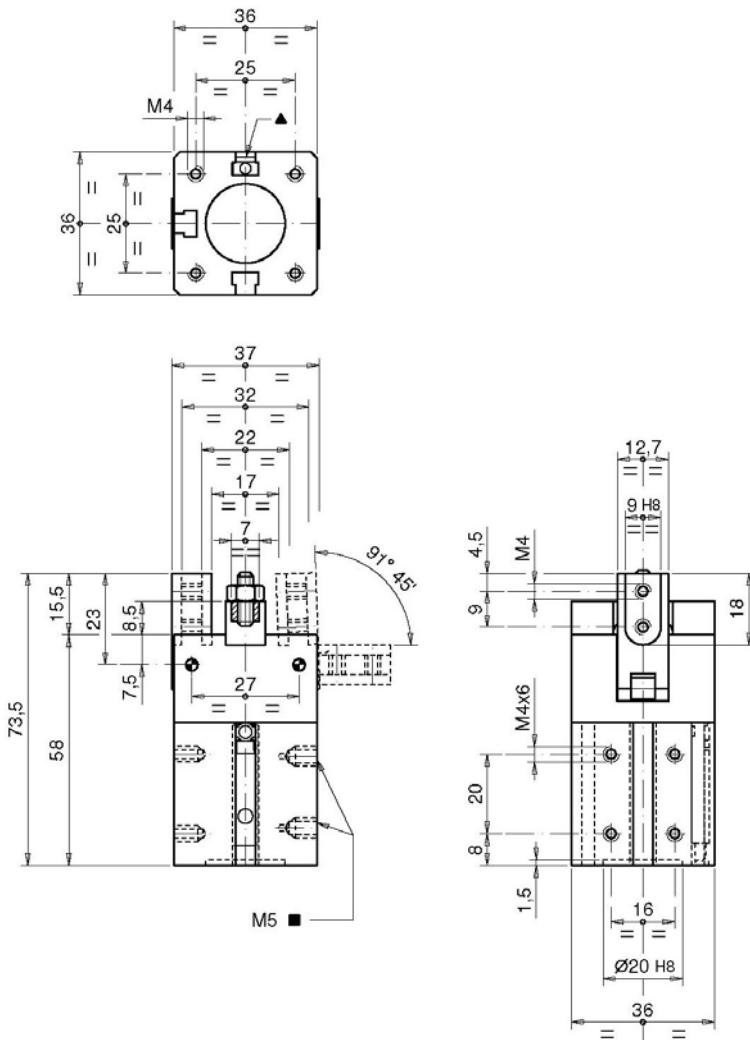

Forza = N - Force = N

Z: Distanza dal fulcro = mm - Z: Distance from fulcrum = mm

- Pinza a ginocchiera autocentrante con apertura a 180° e autobloccaggio meccanico dei pezzi. Adatta alla manipolazione di pezzi pesanti, dotata di grande capacità di tenuta (grazie all'irreversibilità delle leve), il bloccaggio è garantito anche in assenza di aria
- Angolo di apertura regolabile da 0° a 180°
- Mecanismo interno interamente guidato durante la sua corsa
- Pistone integrato con potenze elevate
- Controllo di fine corsa con sensori magnetici con Led (optional)
- Peso Kg 0.30

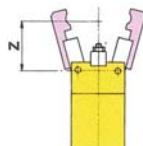

- Self-centering toggle pliers with 180° opening angle and mechanical self-clamping of the workpieces. Suited for handling heavy workpieces, with a high gripping strength (thanks to the irreversibility of the levers), clamping is assured also in case of air failure
- From 0° to 180° adjustable opening angle
- Internal mechanism completely driven during its stroke
- Built-in piston high powers
- Limit stop control by means of magnetic sensors with Led (optional)
- Weight Kg 0.30

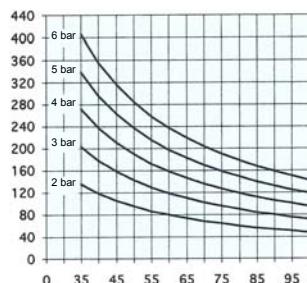

■ *Alimentazione aria 2 ÷ 6 bar – Air feed 2 ÷ 6* ▲ *Sensore di finecorsa per scanalatura 8 (optional) – Proximity sensor for T-slot (optional)*
