3.11 と三春の櫻 <福島県>

福島は樹齢 1000 年を超えるという三春の桜が有名で、枝垂桜 であり、その様から滝桜ともいわれる。一方 3.11 の東日本大震 災では、巨大地震と津波、さらに未曽有の原発事故の三つの災難 に見舞われ、いまだに完全な復興からは遠い状況にある。

この作品では、桜の旧字「櫻」が「木」と「えい 嬰 みどりご」 とからなること、「嬰」は二つの貝と女とからなり、その甲骨文 字「戦」は、生まれたての嬰児を悪霊から守るために貝で作ら

In Fukushima prefecture, a cherry tree more than 1000 years old in the Miharu district is famous. It is a weeping cherry tree and called as Taki-sakura (waterfall cherry tree) characterized by its long drooping branches. In my work, I expressed the old kanji form of the cherry tree " 櫻 " with a combination of a tree " 木 " and an infant "嬰 Ei or Midorigo" which is so composed with two shells and a woman and its inscriptions on bones

and tortoise carapaces "comes from hieroglyphics of the ceremony of a female " "giving a necklace "made of shells to the infant wishing it to be free from evil spirits. And radioactive rays caused by Power

Plant Accident is expressed by an arrow " , and victim of the desaster by "敬 " which comes from

hieroglyphics of old qiangic people who were offered as sacrifice. At the center of my work, "a child "shows

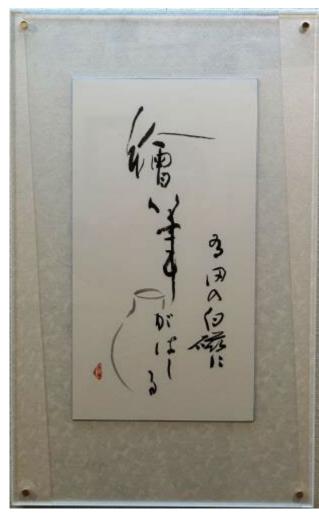

the infant who gets the necklace of shells and stretches its one hand to try to keep "敬 \*\*\* safe from radioactive rays.
