

USA student prospect - Toro tour

My name is Jonathan Larsson. I am a 27-year-old professional golfer, and I can help you find a university in the USA. When I was 19 years old, I moved to the USA, and I lived there for a fantastic five years. What enabled me to go was my golf abilities and my grades. If you have the dream to live and study in the USA and you act on it, it will be something you will never regret.

I have made many connections with colleges and universities in the USA, and together we will find a school that matches your golf abilities. I started this business in early 2023, and so far, I have helped two people find a university, and I have assisted one with transferring. What I offer is top-level service where I am always available to you, and I am able to answer all your questions. The application process can be complicated, and therefore I have set up a step-by-step process where I instruct you exactly how it all works, leaving no space for confusion. If you are a top-level golfer and you want to study in the USA, I can find a new home for you.

If this sounds interesting, I suggest we book a meeting, free of charge, where we get to know each other and discuss what you are looking for. The meeting is free of charge, and I just want to explain how I work and give you an idea of what you can expect based on your grades and golf abilities. I remember that I had so many questions about college, and I had no one to ask for help. If you are unsure if this is what you want, or if you want to go through the application process by yourself, you can take this opportunity to speak to an expert free of charge, where I provide some free help. If you like what I present, we can sit down again, and I can share what school would be best for you and help your dream come true.

I work with all types of universities ranging from junior colleges, NAIA schools, NCAA Division I, Division II, and Division III. I make constant new connections, and based on where you want to study and what you are looking for, I can make that connection with your dream school. My services cost 2000 euros, which includes everything you need, step-by-step instructions for Visa, SAT, TOEFL, and all documents the schools need to have you accepted.
