December	\$175.00	\$299.00	\$115.50	\$90.00	\$99.00
January	\$187.50	\$345.00	\$120.00	\$99.00	\$110.00
February	\$212.50	\$385.00	\$187.00	\$165.00	\$143.00
March	\$275.00	\$500.00	\$350.00	\$300.00	\$280.00

We are licensed to supply Rainbow Trout (*Oncorhynchus mykiss*) fingerlings for stocking of farm dams and private waterways. Our fingerlings are available from late September through to the end January. All stock is supplied with release and acclimatisation instructions. Every order is supplied with relevant documentation and permit numbers. **Orders are essential.**

FAQ's

- Rainbow trout are cool climate fish and require water that is neutral in pH. Ideal water temperature is 10 to 15 DegC. Temperatures above 18 are dangerous and above 22 degrees C fatal. Zinc, even in very small amounts is toxic to juvenile trout. (Do not use galvanised tanks, pipes or harvest water from a GAL roof.)
- Trout take more than 12 months to achieve plate-size. The hatching season is winter. We usually have fingerlings available from end September until **about early December.**
- Both summer temperatures and the size of fingerlings from December onwards have an impact on successfully transporting the fish. High dissolved oxygen content is important in water systems housing trout - achieve this through aeration or by circulating water in a way that exposes it to as much air as possible (BUT remember that hot air will make hot water!)
- Should we feed our fish in a dam? We do not recommend feeding your trout unless you do not have adequate natural food in the dam. Feeding domesticates the trout and they lose their natural instincts, making them prone to predators.
- We ship fingerlings in poly bags containing water and pure oxygen. They are then packed in styrofoam boxes packed with ice appropriate for the journey. Fingerlings will travel overnight safely.
- For pick-up from the farm you will need to supply eskies for transport; we can supply styro boxes at a cost of \$18 each.
- We ship to most major centres in NSW. If your address is not serviced by our courier network we will make arrangements for you to pick up your order at a mutually agreed point. Please call if you want a quote on shipping. *From December onwards, due to the size of the fish, fingerlings need to be shipped in live transport tanks – call us for a quote.*
