Geierwand

Höhlensteintal - Toblach / Val di Landro - Dobbiaco

■ Gemeint ist nicht die Geierwand mit den alpinen Routen, sondern der darunter liegende Sportklettergarten. Der etwas anstrengende Zustieg lohnt sich dank der hohen Felswand in gelbem Dolomitgestein mit interessanten, bis zu 35 Meter langen Routen. Durch die Ausrichtung nach Süden kann es an sonnigen Sommertagen ziemlich heiß werden. Deshalb ist der Klettergarten besonders in den Übergangsmonaten zu empfehlen.

■ **Anfahrt:** In Toblach die Straße Richtung Cortina nehmen. Dieser Straße für mehrere Kilometer folgen, beim Ausblickspunkt auf die Drei Zinnen vorbei und weiter bis man wenig später den Dürrensee erreicht. Am Ende des Sees befindet sich auf der linken Seite ein Parkplatz.

■ **Zustieg:** Vom Parkplatz die Straße überqueren und beim Auslauf einer Schotterrinne einem steilen Weg nach oben folgen, der dann durch den Wald und anschließend wieder über die steile Schotterrinne direkt zum Klettergarten führt.

■ Questa non è la Geierwand delle vie alpinistiche, ma la falesia di arrampicata sportiva che si trova appena sotto. Come premio per un accesso piuttosto faticoso ci aspetta una parete di roccia molto alta e decisamente interessante, con vie su dolomia gialla lunghe anche fino a 35 metri. La parete è esposta a sud e quindi nelle giornate estive potrebbe essere troppo caldo; per questo motivo è consigliabile venire qui in primavera e in autunno.

■ **Come arrivare:** da Dobbiaco prendere la strada verso Cortina e proseguire per alcuni chilometri. Oltrepassare il panorama delle Tre Cime e continuare avanti fino al Lago di Landro, alla fine del quale sulla sinistra si trova un parcheggio.

■ **Accesso:** dal parcheggio attraversare la strada e allo sbocco del ghiaione procedere sul sentiero ripido in salita, attraversare il bosco e alla fine tornare sul canale di ghiaia per arrivare direttamente alla falesia.

Find all tops of Val Pusteria / Landro Valley on the **VERTICAL-LIFE APP**.

■ With Geierwand we do not mean the wall with the alpine routes, but the sportclimbing crag lying below. The somewhat strenuous ascent is worthwhile thanks to the high wall in yellow dolomite rock with interesting, up to 35 meters long routes. Due to the southern orientation, sunny summer days can be quite hot and this climbing crag is particularly recommended in the transitional months.

■ **Arrival:** In Toblach/Dobbiaco take the road in the direction of Cortina. Follow this road for several kilometers, pass up the view of the Three Peaks and continue until you reach the Dürrensee/Lago di Landro lake. At the end of the Lake, a parking lot is located on the left side.

■ **Approach:** Cross the street near the parking lot and take a steep path near the end of the gravel gully. This path leads up through steep forest and then continues in the steep gravel gully directly to the crag.
