

COUNTERS ES

– If you are using shelves place them into the structure, so that the marked side is at the bottom.

– ES– 1x2:
First complete the two parts of the top desk and then place the top desk onto the rods on the structure.
(When dismantling, follow the picture.)

– ES– 2x2:
Place the folded two-part top desk onto the rods on the structure and then unfold.

EUROcounters ES

instruction manual

packaging

Working procedure:

- Remove the structure from the packaging.
- Open the structure so that the 4 rods for attaching the top desk are at the top.

- Unwrap the magnetic bars and attach them to the magnets in the hubs. Fix the 180° magnetic bars to the side of the structure by inserting them into the hole in the hub, following the picture.
- The structure is ready for installing the graphics.

- It is advisable to allow the graphic panels to lie flat for about 30 min. before placing onto the structure.
- To hang the graphic panels start with one of the middle panels and to finish place the two end cap panels.

Graphic panels can be cleaned using water and detergent; laminated panels can also be cleaned with an alcohol-based cleaner.

Always roll up the graphic panels with the print on the outside!

Never slide the magnetic bars on top of each other, it would damage the magnetic field!!!

Notice: one or two shelves are possible
Max. load of table: 20 kg
Max. load of shelf: 10 kg

Notice:
For interior use only!

Flight bag for graphic panels.

Flight bag for EScounter.
