IF AIR QUALITY IS ABSOLUTE PRIORITY

Then you have come to the right place at H2Optimizer! Clean air is increasingly important. Not just now that the Covid-19 virus has the world in its grip. Substances such as particulate matter, exhaust fumes and pollen are also unpleasant or even harmful to our health.

The Airfixr helps us to get healthy air and fights bacteria, fungi, viruses and fine dust in an effective way. The Airfixr is a professional air purifier that uses various proven technologies. The device purifies and disinfects the air in a room by using a filter, UV-C light, titanium dioxide and ionization.

The Airfixr is therefore the solution in the fight against harmful micro-organisms and aerosols that float in the air. Moreover, clean air does not have to be expensive, the Airfixr proves that too!

Features and benefits of Airfixr air purifiers:

- Fine dust, micro-organisms and aerosols are treated effectively
- It is not harmful to the environment
- Improve air quality and therefore better for health
- Any unpleasant odors in a room are neutralized
- Provides a fresh and pleasant working and living environment
- The strength of the UV-C lamps is high/higher
- The combination of titanium dioxide and UV-C lamps ensures a higher disinfection yield
- A low number of Decibels
- The Airfixr is durable (replacement of filter and UV-C lamp possible)
- The housing is made of stainless steel (safe and does not discolor due to UV light)
- The Airfixr is a European product – assembled in NL
- The Airfixr is easy to use.
- The device has a good price/quality ratio
