

PERSONALIZED MUSIC COMPILATIONS

recordings or playlists arranged and curated BY GUEUSH

INTRODUCTION:

So you are looking for a refreshing sound for your brand, restaurant, shop or project. Changing dusty background music into personally selected uplifting sounds is what I do.

As a DJ and record collector my knowledge for music reaches beyond what Spotify can offer. Ever since the music evolution, digging into sounds was what I did before Spotify even existed. Although I must say, it made the digging and discovering music a lot easier for us.

Nowadays you can find a lot of sounds on Spotify, even for a non music lover there is plenty to discover, but for some people this web of music can also be an overwhelming thing. That's why you need a professional music connoisseur to help you arranging these sounds in the style you would love without any stress.

See it as a well organised wardrobe, a storytelling piece of art or a homemade cake brought to you with a lot of love. Once you'll receive the playlist, this will give you the same feeling of satisfaction.

HOW IT WORKS:

We meet up and talk about what your wishes are musicaly. I analyse and will check which sounds fit to your project. Thinking of lounge, house, disco, funk, groovy tunes, ballads, rock, indie, pop, ... you name it. Everything is possible.

Once we have an idea that fits your style and concept, it is my turn to work something out.

These playlists are personalised. You can share them with your clients to give them something special or you just keep it for yourself to fill in the space of your brand, concept, bar or restaurant with a unique vibe.

Because my name is on it, we decide the artwork and style together.

The arrangement of the playlist cannot be adjusted as this is for me a form of art. You do not mess up someone's art. Your playlist is unique, made by someone who understands music as a profession. Your playlist will live a lifetime.

PRICES:

SPOTIFY PLAYLISTS:

40 track playlist = 2 hours arranging and selecting the finest tunes (incl. initial interview) = 250 euro's

80 track playlist = 3,5 hours arranging and selecting the finest tunes (incl. initial interview) = 385 euro's

* adjustments need to be made to the playlist = 25 euro/half an hour
